Ref: 00054816 – Hot spots project  
Sarajevo, 4 June 2009

**NOTE TO THE FILE**

**Subject:** Parallel award under BIH10 for Government contribution pertaining to Hot spot project

This Note to the file is prepared to justify opening and awarding of the parallel award/project under BIH10 Business Unit to administer the Government of BiH – Municipality of Tuzla contribution pertaining to the “Strengthening Capacities in BiH to address Environmental Problems through Remediation of High Priority Hot Spots” project with project ID 00054816.

This project is a Regional project administered under Montenegro office as a multi-country project – each CO project budget is presented as one output project. Due to regional nature and role taken over by the Montenegro CO, the GMS distribution under this project is rather specific whereby 1% out of 7% directly goes to CO MNE, while other 6% is distributed in line with distribution guidelines.

If run through the existing output project under MNE10, GMS pertaining to the BiH Government cost-sharing contribution would therefore follow the same GMS distribution, which is incorrect. In order to avoid this, proposal/award ID **BIH10/00057578**, project ID **00071207** is opened in Atlas and will be linked in parent/child relationship to the overall Regional project.
