Closure Stage Quality Assurance Report

Form Status: Approved		
Overall Rating:	Highly Satisfactory	
Decision:		
Portfolio/Project Number:	00112883	
Portfolio/Project Title:	Soutien aux activités générarices de revenus durables	
Portfolio/Project Date:	2018-11-01 / 2021-12-31	

Strategic

Quality Rating: Exemplary

1. Did the project pro-actively identified changes to the external environment and incorporated them into the project strategy?

- 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

Evidence:

Le projet a su d'adapter et tirer profit des spécificités du contexte en ajustant constamment sa stratégie a ux réalités de sa zone d'intervention.

the project's RRF included all the the developments settings1 as put indicator, if relevant. (both	nis need falls outside of the UNDP

Relevant

Quality Rating: Satisfactory

3. Were the project's targeted groups systematically identified and engaged, with a priority focus on the discriminated and marginalized, to ensure the project remained relevant for them?

Closure Print

- 3: Systematic and structured feedback was collected over the project duration from a representative sample of beneficiaries, with a priority focus on the discriminated and marginalized, as part of the project's monitoring system. Representatives from the targeted groups were active members of the project's governance mechanism (i.e., the project board or equivalent) and there is credible evidence that their feedback informs project decision making. (all must be true)
- 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the discriminated and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
- 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected
- Not Applicable

Evidence:

Le projet a ciblé les 1200 personnes (1000 jeunes à risque et 200 formateurs, fonctionnaires, autorités lo cales) avec accent sur les plus vulnérables. Ces bén éficiaires ont été consultés à l'occasion des visites d e terrain et leurs avis pris en compte tout au long de la mise en œuvre du projet..

4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?

- S: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
- 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team.
 There is little or no evidence that this informed project decision making.

Evi			
	dence:		
ive at ét	e projet a généré des leçons apprises à la fois au eau interne (mécanisme de suivi) et externe (Eval ion finale du projet en cours). Les dites leçons on é utilisées pour piloter le projet de manière à assu l'efficacité du projet.	lu t

eve	lopment change? 3: There was credible evidence that the project re		ciaries (either directly
eve		eached sufficient number of benefic indirectly, through policy change) to there are explicit plans in place to oject results to advocate for policy	ciaries (either directly o meaningfully contribute scale up the project in the change).
	3: There was credible evidence that the project re through significant coverage of target groups, or i development change. 2: While the project was not considered at scale, future (e.g. by extending its coverage or using pro	eached sufficient number of benefic indirectly, through policy change) to there are explicit plans in place to oject results to advocate for policy	ciaries (either directly o meaningfully contribute t scale up the project in the change).
eve	 3: There was credible evidence that the project rettrough significant coverage of target groups, or indevelopment change. 2: While the project was not considered at scale, future (e.g. by extending its coverage or using product the project was not at scale, and there are not scale. 	eached sufficient number of benefic indirectly, through policy change) to there are explicit plans in place to oject results to advocate for policy plans to scale up the project in the B	ciaries (either directly o meaningfully contribute scale up the project in the change).
eve	3: There was credible evidence that the project re through significant coverage of target groups, or i development change. 2: While the project was not considered at scale, future (e.g. by extending its coverage or using pro 1: The project was not at scale, and there are no dence: e projet spécifique n'est pas à l'échelle, mais en co binaison avec d'autres intervenions similaires du le eau de pays, les autres zones du pays seront cou	eached sufficient number of benefic indirectly, through policy change) to there are explicit plans in place to oject results to advocate for policy plans to scale up the project in the B	ciaries (either directly o meaningfully contribute t scale up the project in the change).

No documents available.

6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.

- 3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)
- 2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)
- 1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

Evidence:

Le projet dispose d'indicateurs désagrégés par sexe aussi bien au niveau des cibles que des résultats. D es ajustements ont été faits pour que 50% des béné ficiaires soient des femme/filles.

7. Were social and environmental impacts and risks successfully managed and monitored?

- 3: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- 2: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

	e projet a fait l'objet d'SES et risques identifiés éta at faibles. Ces risques ont fait l'objet de suivi et gé cout au long de la mise en œuvre du projet.

Management & Monitoring

- 9. Was the project's M&E Plan adequately implemented?
- 3: The project had a comprehensive and costed M&E plan. Baselines, targets and milestones were fully populated. Progress data against indicators in the project's RRF was reported regularly using credible data sources and collected according to the frequency stated in the Plan, including sex disaggregated data as relevant. Any evaluations conducted, if relevant, fully meet decentralized evaluation standards, including gender UNEG standards. Lessons learned, included during evaluations and/or After-Action Reviews, were used to take corrective actions when necessary. (all must be true)
- 2: The project costed M&E Plan, and most baselines and targets were populated. Progress data against indicators in the project's RRF was collected on a regular basis, although there was may be some slippage in following the frequency stated in the Plan and data sources was not always reliable. Any evaluations conducted, if relevant, met most decentralized evaluation standards. Lessons learned were captured but were used to take corrective actions. (all must be true)
- 1: The project had M&E Plan, but costs were not clearly planned and budgeted for, or were unrealistic. Progress data was not regularly collected against the indicators in the project's RRF. Evaluations did not meet decentralized evaluation standards. Lessons learned were rarely captured and used. Select this option also if the project did not have an M&E plan.

Evidence:

Le projet dispose d'un plan de S&E budgétisé, avec des indicateurs, baselines et cibles bien définis. Les données collectées ont permis un suivi adéquat du p rojet. L'évaluation du projet a été conduite dans le re spect des normes et standards de l'organisation.

10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?

Closure Print

- 3: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- 2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)
- 1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

Evidence:

Le comité de pilotage du projet a fonctionné comme prévu dans le document de projet et les rencontres ont été documentées.

#	File Name	Modified By	Modified On
No	documents available.		

11. Were risks to the project adequately monitored and managed?

- 3: The project monitored risks every quarter and consulted with the key stakeholders, security advisors, to identify continuing and emerging risks to assess if the main assumptions remained valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk and were updated to reflect the latest risk assessment. (all must be true)
- 2: The project monitored risks every year, as evidenced by an updated risk log. Some updates were made to management plans and mitigation measures.
- 1: The risk log was not updated as required. There was may be some evidence that the project monitored risks that may affected the project's achievement of results, but there is no explicit evidence that management actions were taken to mitigate risks.

Evidence:

Les risques ont fait l'objet de suivi et de mise à jour à au moins à une une fréquence annuelle dans Atla s.

13. Were project inputs procured and delivered on time to efficiently contribute to results?

3: The project had a procurement plan and kept it updated. The project quarterly reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)

 2: The project had updated procurement plan. The project annually reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)

1: The project did not have an updated procurement plan. The project team may or may not have reviewed operational bottlenecks to procuring inputs regularly, however management actions were not taken to address them.

15. Was the project on track and delivered its expected outputs?
Yes

No

Evidence:

Le projet a réalisé les principaux résultats attendus de sa mise en œuvre.

List of Uploaded Documents

#	File Name	Modified By	Modified On
No	documents available.		

16. Were there regular reviews of the work plan to ensure that the project was on track to achieve the desired results, and to inform course corrections if needed?

- 3: Quarterly progress data informed regular reviews of the project work plan to ensure that the activities implemented were most likely to achieve the desired results. There is evidence that data and lessons learned (including from evaluations /or After-Action Reviews) were used to inform course corrections, as needed. Any necessary budget revisions were made. (both must be true)
- 2: There was at least one review of the work plan per year with a view to assessing if project activities were on track to achieving the desired development results (i.e., outputs.) There may or may not be evidence that data or lessons learned were used to inform the review(s). Any necessary budget revisions have been made.
- 1: While the project team may have reviewed the work plan at least once over the past year to ensure outputs were delivered on time, no link was made to the delivery of desired development results. Select this option also if no review of the work plan by management took place.

Evidence:

Le projet a fait la revue du PTA de manière continue pour veiller à ce que les activités mises en œuvre co ntribuent effectivement aux produits attendus(réunio n de l'unité).

	Vere the targeted groups systematically ider re results were achieved as expected?	ntified and engaged, prioritizing	the marginalized and excluded, to		
 3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. There is clear evidence that the targeted groups were reached as intended. The project engaged regularly with targeted groups over the past year to assess whether they benefited as expected and adjustments were made if necessary, to refine targeting. (all must be true) 2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true) 1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year. 					
	some engagement with beneficiaries in the must be true) 1: The project did not report on specific targ beneficiaries are populations have capacity opportunities relevant to the project area of whether they benefited as expected, but it v	past year to assess whether the geted groups. Sustainability & National Ownership

Closure Print

18. Were stakeholders and national partners fully engaged in the decision-making, implementation and monitoring of the project?

- 3: Only national systems (i.e., procurement, monitoring, evaluation, etc.) were used to fully implement and monitor the project. All relevant stakeholders and partners were fully and actively engaged in the process, playing a lead role in project decision-making, implementation and monitoring. (both must be true)
- 2: National systems (i.e., procurement, monitoring, evaluation, etc.) were used to implement and monitor the project (such as country office support or project systems) were also used, if necessary. All relevant stakeholders and partners were actively engaged in the process, playing an active role in project decision-making, implementation and monitoring. (both must be true)
- 1: There was relatively limited or no engagement with national stakeholders and partners in the decisionmaking, implementation and/or monitoring of the project.
- Not Applicable

Evidence:

Bien que le projet a été mis en œuvre sous le modal ité DIM, les partenaires nationaux ont été largement impliqués dans la conception et la mise en œuvre. Il s ont joué un rôle clé dans le pilotage du projet.

No documents available.

19. Were there regular monitoring of changes in capacities and performance of institutions and systems relevant to the project, as needed, and were the implementation arrangements⁸ adjusted according to changes in partner capacities?

- 3: Changes in capacities and performance of national institutions and systems were assessed/monitored using clear indicators, rigorous methods of data collection and credible data sources including relevant HACT assurance activities. Implementation arrangements were formally reviewed and adjusted, if needed, in agreement with partners according to changes in partner capacities. (all must be true)
- 2: Aspects of changes in capacities and performance of relevant national institutions and systems were monitored by the project using indicators and reasonably credible data sources including relevant HACT assurance activities. Some adjustment was made to implementation arrangements if needed to reflect changes in partner capacities. (all must be true)
- 1: Some aspects of changes in capacities and performance of relevant national institutions and systems may have been monitored by the project, however changes to implementation arrangements have not been considered. Also select this option if changes in capacities and performance of relevant national institutions and systems have not been monitored by the project.
- Not Applicable

Evidence:

Les changements dans les capacités et la performa nce des parties prenantes ont fait l'objet de suivi dan s le cadre du HACT. Les arrangements de gestions ont tenu compte dans une certaine mesure de l'évol ution des capacité des partenaires.

20. Were the transition and phase-out arrangements were reviewed and adjusted according to progress (including financial commitment and capacity).

- 3: The project's governance mechanism regularly reviewed the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented as planned by the end of the project, taking into account any adjustments made during implementation. (both must be true)
- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

Evidence:

Le plan de durabilité reposait sur la collaboration av ec les services techniques gouvernementaux et le re nforcement des capacités des autorités dans la bon ne gouvernance. Ce plan a été revu et des ajusteme nt ont été opérés chaque fois que nécessaire, lors re ncontre du comité de pilotage.
