Heads of States and Governments of the member countries of the United Nations adopted in September 2015, a new Agenda for Sustainable Development by 2030. This new agenda, which proclaims that “no-one should be left behind”, includes 17 goals, 169 targets and about 231 indicators. The latter help tracking progress made towards the elimination of poverty in all its forms and in all its dimensions, access to basic infrastructures such as water, education, health, earth, etc. In order to achieve those goals, the principle of indivisibility of these objectives calls for simultaneous environmental, economic and social implementation.

The process of contextualization and appropriation of the Sustainable Development Goals (SDG) was conducted in Cameroon by the Ministry of the Economy, Planning and Regional Development. National Institute of Statistics coordinated the drafting of the report on the baseline situation of the SDG monitoring indicators in Cameroon. This situation is presented as follows: **146** targets out of **169** were selected, ie **86%**. Out of the 146 targets, 60% have indicators with baseline values available in 2016.

SDG targets pursued by 2030

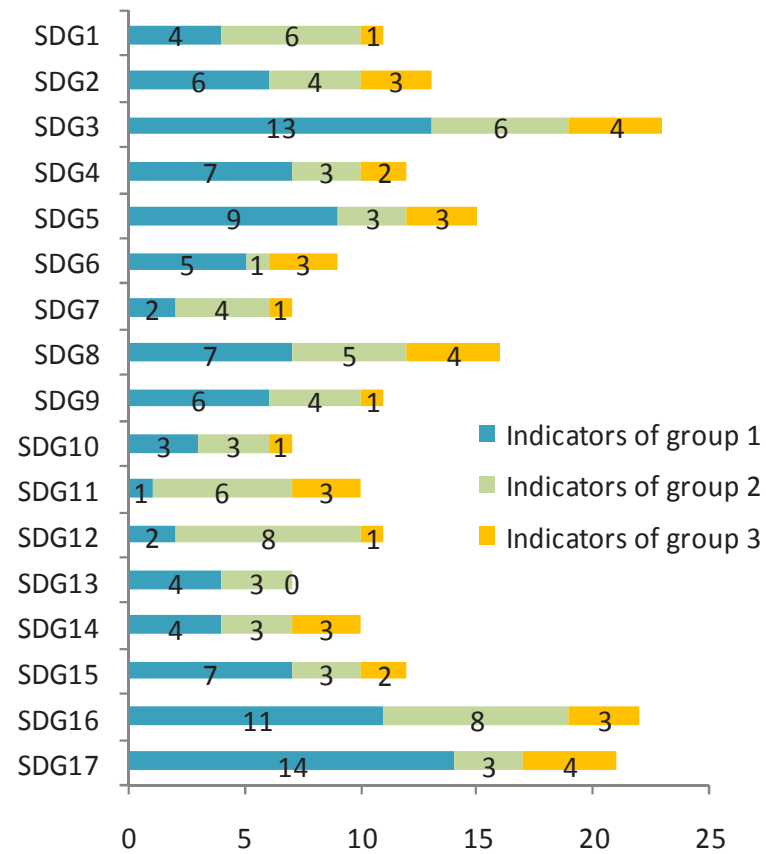

Source: Report on the baseline situation of the SDGs in Cameroon in 2016

In the National Statistics Development Strategy (NSDS) 2015-2020 aligned with the SDGs, 217 indicators out of approximately 231 were selected to monitor the 146 targets. Among the 217 indicators selected:

- **48%** are informed (baseline situation);
- **34%** are in progress or may be included in statistical operations of the NSDS;
- **18%** can be produced if means are available. Otherwise, statistical operations requiring new methodologies.

Indicators selected to monitor progress towards the SDGs achievement

Source: Report on the baseline situation of the SDGs in Cameroon in 2016

- **Group 1:** These are the indicators produced by the SNIS (National System of Statistical Information) and whose value exists for the reference period.
- **Group 2:** These are indicators that are in process or that can be included in the statistical operations of the 2015-2020 NSDS.
- **Group 3:** These are indicators which feasibility is possible if means are available.

“**48%** of indicators inform the baseline situation in 2016”. This baseline situation calls for taking into account statistics and indicators of the SDGs in data production methodologies. Therefore, areas where methodological work must be quickly undertaken are :

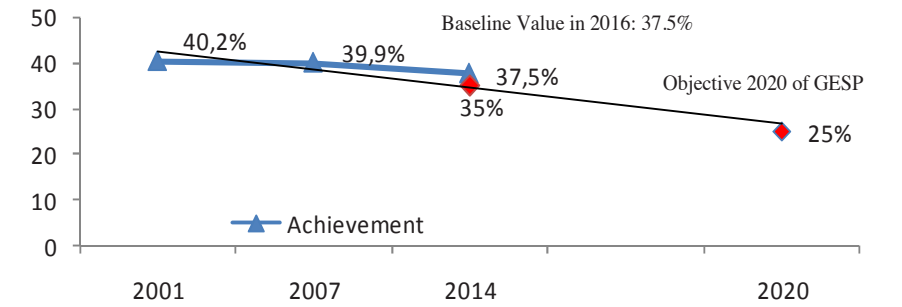

- Administrative sources statistics, especially vital statistics;
- Environment and climate change statistics
- Rural sector statistics .

Baseline level of some available indicators

GOAL: End poverty in all its forms everywhere
Target 1.2 : By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions

Indicator 1.2.2 Proportion of the population living below the national poverty line

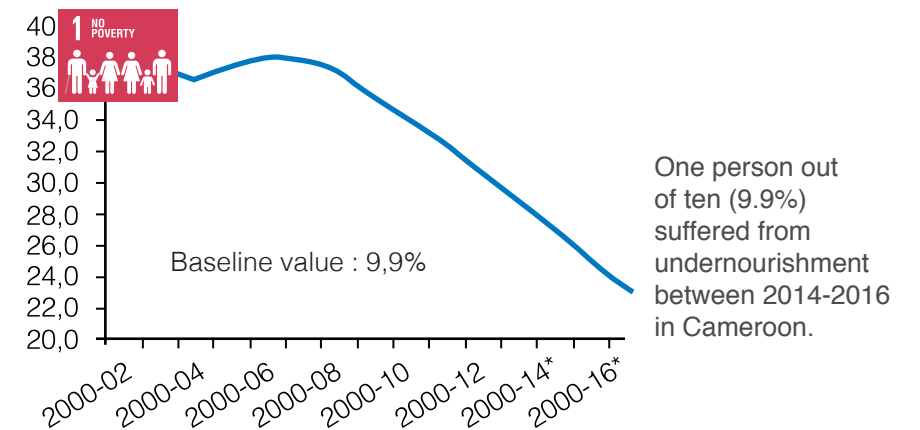

Source: NIS, ECAM 2, 3, 4 and GESP 2010-2020

GOAL: End hunger, achieve food security and improved nutrition and promote sustainable agriculture
Target 2.1. By 2030 end hunger and ensure access by all people to safe, nutritious and sufficient food all year round.

Indicator: 2.1.1 Prevalence of undernourishment

Prevalence of undernourishment in Cameroon

Source: FAO, december 2016

GOAL 3: Ensure healthy life and promote well-being for all
Target: By 2030 reduce the global maternal mortality ratio to less than 70 per 100,000 live births.

Indicator: 3.1.1 Maternal mortality rate for 100 000 live births

Source: NIS, DHS (1998, 2004), EDS MICS (2011)

Between 2004 and 2011, the maternal mortality ratio continued to deviate from the national target (350 per 100,000 births).
