PROYECTO 89178/95549 PPG Pequeñas Donaciones

MANUD/UNDAF

Área 4: Sostenibilidad ambiental y gestión del riesgo

4.2. Los sectores público, privado y la sociedad civil habrán avanzado en la incorporación e implementación de políticas y estrategias nacionales que consideren la gestión de la calidad ambiental y la gestión integrada de los recursos naturales, así como en la valoración de los bienes y servicios ambientales, la protección, conservación y uso sostenible de la biodiversidad.

Resultado pertinente del Plan Estratégico del PNUD

Outcome 1: Growth and development are inclusive and sustainable, incorporating productive capacities that create employment and livelihoods for the poor and excluded

Output 1.1. National and sub-national systems and institutions enabled to achieve structural transformation of productive capacities that are sustainable and employment - and livelihoods- intensive
CPAP

Outcome 24: Mejoradas las capacidades nacionales con respecto a la gestión ambiental responsable y sostenible de cuencas, biodiversidad y áreas protegidas terrestres y marinas.

Breve Descripción

The **main objective** of the project is to enable community organizations in Costa Rica to enhance livelihoods by restoring degraded forest and production landscapes for socio-ecological resilience. This will be achieved through six **project outcomes**: 1.1. Multistakeholder landscape governance platforms in place (including CSO representation, local governments, subnational and national institutions' representatives) to support resiliency of the Jesus Maria and Barranca river basins, 1.2. Restored ecosystem services and enhanced biodiversity conservation through community-based interventions in the Jesus Maria and Barranca river basins, 1.3. Improved sustainability and productivity of agroecosystems in the Jesus Maria and Barranca river basins through community-based interventions, 1.4 Alternative livelihoods developed or enhanced in the Jesus Maria and Barranca river basins through the development of innovative products and market access, 1.5. Renewable energy and fuel efficient technologies adopted by communities in the Jesus Maria and Barranca river basin, 2.1. Community and local civil society organizations increase their organizational and financial skills through training and access to microcredit. During a three year period, the Project will support around **36 community initiatives**, including at least **three strategic projects** involving communities from the Barranca and Jesus Maria River Basins, in the Central Pacific Region of Costa Rica. These initiatives will improve conservation measures in the buffer zones of protected areas and in the Biological Corridor Montes del Aguacate. The target communities were selected in collaboration with the Advisory Commission on Land Degradation (CADETI), the UNDP CO, the academia, donor organizations and the SGP National Steering Committee. The project will be implemented by UNDP and executed by UNOPS with the GEF existing mechanism of the Small Grants Program in Costa Rica, including the approval of each grant by the National Steering Committee and the Country Team and day-to-day management by the Country Programme Team under the leadership of the National Coordinator (Country Programme Manager).
