PIMS 2979 Sustainable Land Management Pilot Project **Project Title: Project Date:** 01-Sep-2009 **Strategic Quality Rating: Needs Improvement** 1. Did the project pro-actively take advantage of new opportunities and adapt its theory of change to respond to changes in the development context, including changing national priorities? (select the option from 1-3 which best reflects this project) 3: The project team regularly completed and documented a comprehensive horizon scanning exercise to identify new opportunities and changes in the development context that required adjustments in the theory of change. There is clear evidence that the project board considered the scanning and its implications, and documented changes to the project's RRF, partnerships, etc. made in response, as appropriate. (both must be true to select this option) 2: The project team has undertaken some horizon scanning over the life of the project to identify new opportunities and changes in the development context. The project board discussed the scanning and its implications for the project, as reflected in the board minutes. There is some evidence that the project took action as a result, but changes may not have been fully integrated in the project's theory of change, RRF, partnerships, etc. (all must be true to select this option) 1: The project team may have considered new opportunities and changes in the development context since implementation began, but this has not been discussed in the project board. There is limited to no evidence that the project team has considered changes to the project as a result. This option should also be selected if no horizon scanning took place during project implementation.

Evidence

The traditional rotational land tenure system was replaced with a new land tenure system in the project area. The new land tenure system has allowed the beneficiaries to own farmlands and forest lands for life and have invested their resources to boost their lands' productivity.

- 2. Was the project aligned with the thematic focus of the Strategic Plan? (select the option from 1-3 that best reflects the project)
 - 3: The project responded to one of the three areas of development work as specified in the Strategic Plan. It addressed at least one of the proposed new and emerging areas and implementation was consistent with the issues-based analysis incorporated into the project. The project's RRF included all the relevant SP output indicators. (all must be true to select this option)
 - 2: The project responded to one of the three areas of development work as specified in the Strategic Plan. The project's RRF included at least one SP output indicator, if relevant. (both must be true to select this option)
 - 1: While the project may have responded to one of the three areas of development work as specified in the Strategic Plan, it was based on a sectoral approach without addressing the complexity of the development issue. None of the relevant SP indicators were included in the project's RRF. This option is also selected if the project did not respond to any of the three SP areas of development work.

Evidence

Yes, the project was aligned to SP 2014-2017. For further information please refer to the attached document.

UNDP Eritrea CO Programmes alignment exercise of projects to UNDP Strategic Plan 2014-17.docx	kibreab.gebremichael@undp.org	9/26/2016 12:38:54 PM

3. Evidence	e generated through the pro	ect was explicitly used	to confirm or adjust the	programme/CPD's theor	y of change
during imp	lementation.				

Yes

No

Evidence

The project was designed in alignment with national priorities such as National Action Plan to reduce poverty. Theory of Change was introduced to the CO in 2015 and thus it was not part of this project.

Relevant **Quality Rating: Needs Improvement**

- 4. Were the project's targeted groups systematically identified and engaged, with a priority focus on the excluded and marginalized, to ensure the project remained relevant for them? (select the option from 1-3 that best reflects the project)
 - 3: Systematic and structured feedback was collected regularly from a representative sample of beneficiaries, with a priority focus on the excluded and marginalized, as part of the project's monitoring system. Representatives from the targeted group were active members of the project's governance mechanism (i.e., project board or equivalent) and there is credible evidence that their feedback informed decision making. (all must be true to select this option)
 - 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the excluded and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
 - 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected.
 - Not Applicable

Evidence

This multifaceted project benefit all in the target area. For further information please refer to the attached AWP.

AWP SLM 2015 final.docx	kibreab.gebremichael@undp.org	9/26/2016 12:54:28 PM

5. Did the project generate knowledge, particularly lessons learned (i.e., what has worked and what has not) - and has this knowledge informed management decisions and changes/course corrections to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk? (select the option from 1-3 that best reflects the project)

3: Knowledge and lessons learned (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned
Workshops) backed by credible evidence from evaluation, analysis and monitoring were regularly discussed in project board meetings
and reflected in the minutes. There is clear evidence that the project's theory of change was adjusted, as needed, and changes were
made to the project to ensure its continued relevance. (both must be true to select this option)

- 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true to select this option)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team. There is little or no evidence that this informed project decision making.

Evidence

The project team prepared Project Implementation Review in 2014, 2015 and 2016. For information please refer to the attached cumulative PIR report.

Project limplementation Review (PIR) 2016.docx	kibreab.gebremichael@undp.org	9/26/2016 1:44:17 PM

- 6. Were the project's special measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produce the intended effect? If not, were evidence-based adjustments and changes made? (select the option from 1-3 that best reflects the project)
 - 3: The project team systematically gathered data and evidence on the relevance of the special measures in addressing gender inequalities and empowering women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true to select this option)
 - 2: The project team had some data and evidence on the relevance of the special measures in addressing gender inequalities and empowering women. There is evidence that at least some adjustments made, as appropriate. (both must be true to select this option)
 - 1: The project team had limited or no evidence on the relevance of the special measures in addressing gender inequalities and empowering women. No evidence that adjustments and/or changes were made, as appropriate. This option should also be selected if the project had no special measures in addressing gender inequalities and empowering women relevant to project results and activities.

Evidence

The project has contributes to reduce gender inequality by providing men and women access to natural resources including farmland, forest land and water for personal use, domestic, agriculture.

- 7. Was the project sufficiently at scale, or is there potential to scale up in the future, to meaningfully contribute to development change? (select the option from 1-3 that best reflects the project)
 - 3: There is credible evidence that the project reached a sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change.
 - 2: While the project was not considered at scale, there are explicit plans in place to scale up the initiative in the future (e.g. by extending its coverage in a second phase or using project results to advocate for policy change).
 - 1: The project was not at scale, and there are no plans currently to scale up the initiative in the future.

Evidence

The project lifespan ended in 2015 and final evaluation is ongoing. Replication of the project in some other areas of the country will be decided depending on its impact on the social and environmental issues.

Social & Environmental Standards	Quality Rating. Needs improvement
8. Did the project seek to further the realization of human right 1-3 that best reflects the project)	s using a human rights-based approach? (select the option from
3: There is credible evidence that the project aimed to further rights based approach. Any potential adverse impacts on enjoyment through the project's management of risks. Management & Monitoring

Quality Rating: Needs Improvement

11. Was the project's M&E Plan adequately implemented? (select the option from 1-3 that best reflects the project)

3: Progress data against indicators in the project's RRF was reported regularly using highly credible data sources and collected
according to the frequency stated in the project's M&E plan, including sex disaggregated data as relevant. Evaluations, if conducted,
fully met decentralized evaluation standards, including gender UNEG standards, and management responses were fully implemented.
Lessons learned, including during evaluations, were used to take corrective actions when necessary. (all must be true to select this
option)

- 2: Progress data against indicators in the project's RRF was collected on a regular basis, although there may have been some slippage in following the frequency stated in the project's M&E plan and data sources were not always reliable. Any evaluations conducted meet most decentralized evaluation standards; management responses were fully implemented to the extent possible. Lessons learned have been captured but not used to take collective actions. (all must be true to select this option)
- 1: Progress data either was not collected against the indicators in the project's RRF, or limited data was collected but not regularly; evaluations did not meet decentralized evaluation standards; and/or lessons learned were rarely captured and used.

Evidence

Yes, the project was monitored adequately by the project steering committee comprising of UNDP, the Ministry of Lad, Water and Environment (IP), and Ministry of Agriculture. The project was part of the CPAP annual review, MTR SPCF that was conducted in

12. Did the project's governance mechanism (i.e., the project board or equivalent) function as intended? (select the option from 1-3 that best reflects the project)

- The project's governance mechanism operated very well, and is a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings are all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)
- The project's governance mechanism did not met in the frequency stated in the project document, and/or the project board or equivalent did not function as a decision making body for the project as intended.

Evidence

The project steering committee held meetings frequently and discussed overall progress of the project and minutes of meetings are on file. For more information please refer to the attached minutes of Steering Committee meeting.

13. Were risks to the project adequately monitored and managed? (select the option from 1-3 that best reflects the project)

- 3: The project actively monitored risks every quarter including consulting with key stakeholders at least annually to identify continuing and emerging risks to project implementation and to assess if the main assumptions remain valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk, and some evidence that risk mitigation has benefitted performance. (all must be true to select this option)
- 2: The project monitored risks every quarter, as evidenced by a regularly updated risk log. Some updates were made to management plans and mitigation measures. (both must be true to select this option)

1: The risk log was not updated every quarter as required. There may be some evidence that the project monitored risks that
could have affected the project's achievement of results, but there is no explicit evidence that management actions were taken to
mitigate risks. The project's performance was disrupted by factors that could have been anticipated or managed.

Evidence

Risk log of the project was updated in the system every quarter by the project officer and risks that contributed to delays of the project implementation were identified and actions were taken by the senior management to mitigate them. For example, delays in approval of AWP and cash transfer to the IP occurred, but the senior management solved them in consultation with the government.

19. Were there regular reviews of the work plan to ensure that the project was on track to achieve the desired results, and to inform course corrections if needed? (select the option from 1-3 that best reflects the project)

3: Quarterly progress data informed regular reviews of the project work plan to ensure that the activities implemented were most likely to achieve the desired results. There is evidence that data and lessons learned (including from evaluations) were used to inform course corrections, as needed. (both must be true to select this option)

2: There was at least one review of the work plan each year with a view to assessing if project activities were on track to achieving the desired development results (i.e., outputs.) There is no evidence that data or lessons learned were used to inform the review(s).

3: Targeted groups were systematically identified using credible data sources on their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. There is clear evidence to confirm that targete groups were reached as intended. The project engaged regularly with targeted groups to assess whether they benefitted as ex and adjustments were made if necessary to refine targeting. (all must be true to select this option) 2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprive and/or exclusion from development opportunities relevant to the project's area of work. Some evidence is provided to confirm to project beneficiaries were members of the targeted groups. There was some engagement with beneficiaries to assess whether benefitted as expected. Evidence	
	Evidence

There is no evidence that the project has specified arrangement for transition and phase out. However, since the project has been a highly participatory process involving all key stakeholders, most importantly the farmers, herders, resource users and authorities from the local communities in the project area which guarantees sustainability of the project.

25. Please upload the final lessons learned report that was produced for this project.

Summary/Final Project Board Comments:

The project was designed in line with the national policies and priorities and Outcome 7 of the Strategic Partnership Cooperation Framework (SPCF) 2013 - 2016 and Out come 1 of the SP 2014-2017 to reduce poverty. The project is unique of its kind which allowed 37,000 men and women to possess farmland and forest land for life in 28 villages of the central highland zone of the country. Success story of the project will be replicated in some areas of the country. To date, activities implementation approach of the project shared with the Mainstreaming Climate Risk Consideration in Food Security -Tsilima project which will be implemented in 2017.

The project activities were implemented with full participation of both men and women voluntarily in the decision making and management of the natural resources. There was one woman on every three committee members of the land recording, land verification and land distribution committees.

The project lifespan ended in 2015 and final evaluation is ongoing. The consultants are expected to submit the report by end of September 2016.
