TRAC 2 SUBMISSION FORM

PLEASE REFER TO THE GUIDE FOR SUBMISSION INSTRUCTIONS.

COUNTRY OFFICE: Ghana

Purpose and Objectives

蔖 Downloads Ghana Youth Innovation ...

Purpose: Specify how the CO intends to use the TRAC2 funds	UNDP Ghana will use the TRAC II funds to strengthen UNDP's integrator role by enabling it to support activities across to SDG implementation spectrum in a coordinated way. The initiative will support real time engagement and collaborat joined up approaches and technical support for promoting coherence in planning and implementation. It will enable UN to (i) actively foster and fund selected joined up catalytic and strategic activities across the ecosystem rather than provide support at the individual institutional level; (ii) provide funding to 'seed' the development of a joint platform the addresses planning, implementation, reporting and partnerships.
	The Integrated Platform will be co-designed with the various stakeholders and ministries and will provide a one-stop sh which builds on and links up various existing efforts, including UNDP's on-going collaborative support to NDPC, G Ministry of Planning, MESTI and Energy Commission etc. The approach will be progressive. The CO will begin w contributing to joining-up efforts underway (e.g., on data in collaboration with GIZ but with an expanded scope throu use of APIs, focus on interoperability and synergies); and then, resources permitting, extend to a more structured op source platform, such as the one in India which deploys Al and data intelligence to drive diagnostics and course-correcti in strategies and programmes to meet the SDGs. ^[1]
	More specifically funds will be used to support the development of an SDG dashboard and related real-time engagement processes to strengthen:
	1. Strengthen collaboration and support mainstreaming and cross sectoral planning for policy coherence the SDGs
	The National Development Planning Commission's (NDPC) leads on SDG Mainstreaming and it hosts the SDG Implementation Coordination Committee (which has representation from the CSO platform, the Private Sector Federation and philanthropy). However, the ICC is not effectively resourced and appears to be mostly activity driven. While mainstreaming of SDGs is led by NDPC, there are parallel efforts taking place across different sector mistries and department agencies (MDAs) through support of different partners which are not synergized by the prevailing SDG coordination and implementation mechanisms. There are few knowledge hub where materials can be found (e.g., there a climate hub), nor is there a formal mechanism for the development partners to engage and coordinate their support. There has been limited focus on ensuring policy coherence for the SDGs but going forward this appears to be a priority at the TRAC 2 funding would be most timely in this regard
	2. Promote the integration of various data platforms and interoperability to more effectively ensure data for the SDGs
	Various platforms in play/under development – e.g., a National SDG indicator tracking platform is being developed by Ghana Statistical Service (GSS); a database of Core District Indicators has been spearheaded by the Ministry of Local Government and Rural Development (MoLGRD); and a national M&E platform is expected to be developed by NDPC; and Ghana's open data platform is being revamped in an initiative led the Ministry of Communications. There are emerging efforts, in which UNDP has been centrally involved, to promote interconnection/integration and to ensure greater interoperability going forward so that Ghana will be able to tap into and combine different data sets to meet the ambitio data requirements of the SDGs.
	3. Facilitate information and ecosystem platform support to better promote SDG-related financing, projects, partnerships and investment
	The Ministry of Finance is in the process of finalizing a SDG Budget Baseline Report which seeks to track allocations by SD and plans to host an investment fair later this year; the Ministry of Planning under the Office of the President, is interest in having a structured way of engaging with private sector and philanthropy; at the district level, the MoLGRD has set up <i>Project/Programme Register</i> ; and some ministries and department agencies (MDAs) have requested support to keep trace of their projects and initiatives (e.g. Ministry of Science Technology and Innovation [MESTI] on sustainable development) Currently, many of the partnerships are developed on an ad hoc basis and conversations with investors and philanthropic partners point to the on-going difficulties in securing information on possibilities, government priorities and what is already underway which would enable them to better align their investments. Amongst others, UNDP will build on the government's flagship initiative 1 District 1 Factory (1D1F) and work and strategies to encourage investment on SDG priorities as well as its own engagements – e.g. the Ghana SDG Philanthropy Platform (global programme housed by UMI Ghana) which is active in the Impact Investing Network in Ghana (PIING) and recent successful efforts by the Sustainable Development Cluster to match-make and de-risk private sector partnerships on renewable energy.
	Rationale for support
	Ghana has mainstreamed the SDGs into its national development framework, it recently launched its SDG Baseline Report and it will do a VNR at the HLPF in 2019; and there is an emerging focus on partnerships and innovation. Ghana has a set a 3-tier coordinating structure for implementation and reporting which encompasses: (i) a High Level Ministerial Committee; (ii) a SDGs Implementation Coordination Committee (ICC) to strengthen cross-sectoral coordination and mult stakeholder partnerships in the implementation, monitoring and evaluation of the SDGs and Agenda 2063 wherein the National Development Planning Commission (NDPC) serves as the secretariat to the committee; (iii) a Technical Committiv which works with the ICC and is made of representatives of all ministries, departments and agencies (MDAs), selected civ society and private sector organisations. Following the organization of SDG Data Roadmap Forum in April 2017 led by Ghana Statistical Service and NDPC, there are concerted efforts to bring data users and producers together and to coordinate efforts going forward.
	However, to date, as in other countries, such cross-ministerial structures and efforts have not necessarily resulted in strategic coordination or involved whole-of-government and multi-stakeholder approaches in planning and implementation. There is a proliferation of parallel initiatives for mainstreaming, reporting, implementation, and partnerships, driven to no small extent by the competition to attract resources to specific agencies and programmes in th context of significant fiscal constraints and declining aid in the context of Ghana's LMIC status. A strategic and prioritized SDG roadmap which could focus attention on ensuring resources to critical actors across the ecosystem is yet to be defined. Further, development partners do not have effective fora through which to coordinate their support to nationall defined priority activities for SDGs as a whole.
	At the same time, there is some momentum in promoting joined up efforts. Under the new UN Development Partnership (UNSDP, 2018-22) delivering as one (DaO) and support to the SDGs is a priority. Related to this, UNDP's CPD (2018-22) advocates for whole of government and multi-stakeholder approaches (CPD para 13, 14, Output 3.6) and it has been engaged in several collaborative initiatives to support more joined-up approaches. The UN Data Group (chaired by UNDP secured funding for FAO-UNDP-WFP initiative from DOCO's <i>Delivering Together for Sustainable Development Facility</i> (DTF to promote joined-up use of ICTs by Ministry of Food and Agriculture (MoFA) and the National Disaster Management

Alignment with facility objectives: Specify how the purpose aligns with the objectives of TRAC2	The proposed areas for support are well ali	igned to:	
	SP Output: 2.2.1 Use of digital technologie functions;	s and big data enabled for improved public services and other government	
	CPD Output 3.6 : National planning instituti informed policies, plans and reports.	ions, development authorities and statistical agencies effectively produce SDG-

Result	3

Integrated platform facilitates increased partnerships and investment for the SDGs

Other Benefits:

- SDG planning, implementation and reporting is made more coordinated and effective
- Culture and practice of collaboration strengthened across multiple stakeholders across SDG ecosystem in a context where there are challenges with regard to information sharing and collaboration.
- The open integrated dashboard approach to support SDGs across mainstreaming-planning-implementation-reporting-financing and partnerships once tested can be adapted and replicated in other countries
- UNDP's collaborative advantage strengthened with regard to being able to promote joined up support to SDG integration and implementation and action-oriented engagement of partners.

Indicators of Success

The submitting CO should identify specific indicators for each result area, being as specific as possible. Each indicator should include a baseline (if available), target, source of data, and timeline.

Indicator:	Resources mobilized for SDG activities from traditional and no	n-traditional partners	
Baseline:	0		
Target:	600000		
Source of data:	UNDP, SDG Platform		
Timeline for target:	End 2019		
Indicator:	Number of key databases integrated into the platform/dashbo	ard	
Baseline:	0		
Target:	3		
Source of data:	UNDP, SDG Platform		
Timeline for target:	End 2019		
Indicator:	Co-designed advocacy and technical analysis developed to pro	mote policy coherence	
Baseline:	unknown		
Target:	3		
Source of data:	SDG Platform		
Timeline for target:	end 2019		
Kou Activities Costs and Time!	Implementation		
Key Activities, Costs, and Timel The submitting CO should identi	ne: fy the implementation plan during 2018-19. The plan should include au Activity Description	tivities, costings, timeline – activities, estimat Activity Cost	ed costs , and timeline. Time Line

Activity 1		130,000	
	Strengthen cross sectoral planning for policy coherence the SDGs and make information available through the dashboard	150,000	All completed by end 201
	1.1 For the 1 st component of the dashboard, develop a collaborative space to share materials, facilitate exchange, coordinate trainings and support coherence building processes across NDCs and SDG related processes amongst others (\$25,000)		
	1.2 Organize key technical meetings as well as high level policy fora and support work of key government coordinating entities focused on policy coherence as needed (\$40,000)		
	1.3 Undertake selected technical studies or analyses to inform integrated actions that can accelerate SDG achievement and operationalize equity to ensure no one is left behind (\$40,000)		
	1.4 Co-design training and communication materials on selected themes to promote policy coherence across priority SDGs, etc. and to promote SDG informed integrated strategies (\$25,000)		
Activity 2		240,000	
··· · ,	Integrate data platforms and promote interoperability to more effectively ensure data for the SDGs in the dashboard	,	By end 2019
	2.1 Support to the work (i.e., meetings, analyses) of SDG Data Roadmap Teams focused on improving quality of administrative data collection, data disaggregation; geospatial data, open data, interoperability (\$30,000)		
	2.2 Organize technical and thematic meetings as relevant for MDAs as well as MMDAs to focus on/promote interoperability and to demonstrate the value of being able to join up existing datasets and leverage new types of data and technologies and engage new types of actors (\$30,000)		
	2.3 Support and collaborate with MoGCSP, GSS and others to operationalize the data strategy for priority gender statistics (this follows the 2017 Assessment done at MDA and District levels and the Five-Year Strategic Plan on Gender Statistics (2018-2022)) in an interoperable way to facilitate reporting, analysis, advocacy and accountability (\$50,000)		
	2.4 Support NDPC and GSS to lead on data collection and reporting activities with MDAs in relation to national SDG Reporting and Ghana's Voluntary National Review at the HLPF in 2019 (80,000);		
	2.5 1st phase of the SDG Dashboard development: support for co-design activities and technical work for the development or adaptation of existing dashboard/platforms: i.e., integration of various indicator tracking and reporting platforms for M&E (national and district level) through a focus on interoperability and use of APIs amongst others (\$30,000)		
	2.6 2nd phase of the SDG Dashboard: co-designing of activities to support for the incorporation of data intelligence and AI functionality to address policy questions and facilitate course correction; , South-South engagement with India CO and others on experience, lessons, and effective approaches (\$50,000)		

Activity 3	Integrate SDG rel	ated financing, projects, partnerships and investments taking	230,000	Completed by end 2019
	-	d MMDA level into the SDG Dashboard		
		d develop/adapt and pilot (with MESTI) an integrated project tem /dashboard to manage partnerships and projects for the		
		change (linked to government's SDG budget and expenditure		
		elopment cooperation systems); South-South exchange with Chad and other COs in Asia and Africa that have		
		interested in implementing similar initiatives (\$40,000)		
		l develop/adapt an Integrated district information system		
		cilitate the integration of MoLGRD's district project/programme tion on local resources, priorities, investment opportunities (link		
	to flagship progra	mmes such as 1D1F) and initiatives and SDG indicators amongst		
		e a composite picture of resource flows to government priorities pacts as reflected in the indicators (\$30,000)	i	
		ance: Linked to the above, but implemented together with		
		on the existing joint efforts and drawing on the comparative CDF technical capacities on municipal finance), pilot system to		
	help municipalitie	es tap into new and innovative financing instruments including	tap into new and innovative financing instruments including	
		guarantees to unlock domestic financial resources from private ercial banks for municipalities. [1] (\$50,000)		
	• •	therships and investment strategy in support of priority SDGs to		
		innovative financing instruments including impact investments, nts, socially responsible investments for the SDGs; support to		
	pitch initiatives ar ministries/partne	nd to investment fairs organized by the MoF and other		
	ministries/ partie	(\$60,000)		
	3.5 Participate in	SDG-related fora, respond to priority events and provide		
		upport on the SDGs (\$30,000)

Risks:

The submitting CO should identify the risks associated with the project. This could include the risks associated with key partners, factors that may contribute to achievement of results, availability of data, and any other relevant factors.

Risk Areas	Potential Risks	Rating	Mitigation Strategies
Financial	 Unforeseen expenses Inflation / foreign exchange fluctuations 	Low	 Timely monitoring and evaluation throughout project period Consistent focus on building partnerships, linking to on-going projects/initiatives and cost- sharing
Operational	 Lack of timely access to data from partners; Platform development delays/challenges Technical papers 	Medium	 Consistent outreach and engagement with partners Proactive outreach to COs which have worked on similar issues and Yammer to identify lessons, promising approaches and mitigation measures Leverage joint LTAs and agreements where appropriate
Technical	 Limited knowledge and experience with new approaches to use of APIs and other tools to facilitate integration Poor connectivity at district levels Limited access to ICT equipment and skills in various districts 	Medium	 Advocacy and user-friendly knowledge sharing of issues and experiences Engagement with Telcom agencies Engagement with MoC/NITA and development partners supporting digital modernization initiatives (e.g. World Bank)
Governance and sustainability	 Challenges with establishing collaborative governance/platform approaches Competing commitments /initiatives which impact engagement Sustainability of governance/management arrangements when there is no more funding 	Medium	 Strategic focus on demonstration of concrete value-added emanating from joined up approach early in the initiative Strong focus on identifying value proposition for each of the partners and developing a good theory of change Proactive focus on building partnerships and ensuring visibility for partners
