Yes

Closure Stage Quality Assurance Report

Overall Project Rating:	Needs Improvement
Project Number :	00067001
Project Title :	Sustainable livelihoods security enhanced for the disadvantaged groups through the promotion of income diversification opportunities and better management of environmental resources
Project Date :	01-Jan-2012
Strategic	Quality Rating: Satisfactory
	ctively take advantage of new opportunities and adapt its theory of change to respond to changes in the ncluding changing national priorities? (select the option from 1-3 which best reflects this project)
opportunities and chan the project board consi	m regularly completed and documented a comprehensive horizon scanning exercise to identify new ges in the development context that required adjustments in the theory of change. There is clear evidence that dered the scanning and its implications, and documented changes to the project's RRF, partnerships, etc. made triate. (both must be true to select this option)
in the development cor minutes. There is some	In has undertaken some horizon scanning over the life of the project to identify new opportunities and changes intext. The project board discussed the scanning and its implications for the project, as reflected in the board are evidence that the project took action as a result, but changes may not have been fully integrated in the inge, RRF, partnerships, etc. (all must be true to select this option)
began, but this has not	m may have considered new opportunities and changes in the development context since implementation been discussed in the project board. There is limited to no evidence that the project team has considered as a result. This option should also be selected if no horizon scanning took place during project implementation.
Evidence	
see attached report Te	erminal Evaluation report
2. Was the project align project)	ed with the thematic focus of the Strategic Plan? (select the option from 1-3 that best reflects the
one of the proposed ne	ponded to one of the three areas of development <u>work</u> as specified in the Strategic Plan. It addressed at least ew and emerging <u>areas</u> and implementation was consistent with the issues-based analysis incorporated into the RRF included all the relevant SP output indicators. (all must be true to select this option)
	ponded to one of the three areas of development <u>work</u> as specified in the Strategic Plan. The project's RRF output indicator, if relevant. (both must be true to select this option)
based on a sectoral ap	ct may have responded to one of the three areas of development <u>work</u> as specified in the Strategic Plan, it was proach without addressing the complexity of the development issue. None of the relevant SP indicators were s RRF. This option is also selected if the project did not respond to any of the three SP areas of development
Evidence	
see attached TE repor	rt.
3. Evidence generated t during implementation.	through the project was explicitly used to confirm or adjust the programme/CPD's theory of change

) No

Evidence

This outcome has three outputs as projects: 1. Small producers particularly women, youth and vulnerable groups access & utilize productive resources through value addition facilities & services, 2. Capacities for skills, access to technologies, information & knowledge for women, youth and vulnerable groups enhanced, 3. Support & promote community-based natural resources management livelihoods on beekeeping, handicraft, agroforestry & seedling production. All of these are aligned to the CPD.

R۵	۵۱	12	nt

- **Quality Rating: Satisfactory**
- 4. Were the project's targeted groups systematically identified and engaged, with a priority focus on the excluded and marginalized, to ensure the project remained relevant for them? (select the option from 1-3 that best reflects the project)
 - 3: Systematic and structured feedback was collected regularly from a representative sample of beneficiaries, with a priority focus on the excluded and marginalized, as part of the project's monitoring system. Representatives from the targeted group were active members of the project's governance mechanism (i.e., project board or equivalent) and there is credible evidence that their feedback informed decision making. (all must be true to select this option)
 - 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the excluded and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
 - 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected.
 - Not Applicable

Evidence

See page 19 of the TE report

- 5. Did the project generate knowledge, particularly lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions and changes/course corrections to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk? (select the option from 1-3 that best reflects the project)
 - 3: Knowledge and lessons learned (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, analysis and monitoring were regularly discussed in project board meetings and reflected in the minutes. There is clear evidence that the project's theory of change was adjusted, as needed, and changes were made to the project to ensure its continued relevance. (both must be true to select this option)
 - 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true to select this option)
 - 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team. There is little or no evidence that this informed project decision making.

Evidence

see attached report

6. Were the project's special measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produce the intended effect? If not, were evidence-based adjustments and changes made? (select the option from 1-3 that best reflects the project)

7/22/2019	Closure Stage Quality Assurance Report	
	atically gathered data and evidence on the relevance of the special measures in action. Analysis of data and evidence were used to inform adjustments and changes ption)	
	ne data and evidence on the relevance of the special measures in addressing gendence that at least some adjustments made, as appropriate. (both must be true to	
empowering women. No evidence	ted or no evidence on the relevance of the special measures in addressing gender to that adjustments and/or changes were made, as appropriate. This option should tres in addressing gender inequalities and empowering women relevant to project in	also be selected if
Evidence

	e that the project reached a sufficient number of beneficiaries (either directly through rectly, through policy change) to meaningfully contribute to development change.	gh significant
	considered at scale, there are explicit plans in place to scale up the initiative in the d phase or using project results to advocate for policy change).	e future (e.g. by
1: The project was not at sca	ale, and there are no plans currently to scale up the initiative in the future.	
Evidence		
All three project had best practice	es that could be up scaled in other areas.	
ocial & Environmental Standards	Quality Rating: Needs Improvement	
. Did the project seek to further tl -3 that best reflects the project)	the realization of human rights using a human rights-based approach? (sele	ct the option from
rights based approach. Any potent	e that the project aimed to further the realization of human rights, on the basis of a stial adverse impacts on enjoyment of human rights were actively identified, manage t of risks. (all must be true to select this option)	
	hat the project aimed to further the realization of human rights. Potential adverse in dentified and adequately mitigated through the project's management of risks. (bo	

1: There is no evidence that the project aimed to further the realization of human rights. There is limited to no evidence that potential adverse impacts on the enjoyment of human rights were managed.

Evidence

There is very little or no evidence that all the three projects had undertaken SEs procedures to determine the potential social and environmental risks. No SES templates attached to any of the project documents. It is not sufficient to say social and environmental grievances will be addressed.

9. Were social and environmental impacts and risks (including those related to human rights, gender and environment) successfully managed and monitored in accordance with the project document and relevant action plans? (for projects that have no social and environmental risks the answer is "Yes")

7/22/2019	Closure Stage Quality Assurance Report
Yes	
No	
Evidence	
No evidence of SE impacts and righ	ts been managed as far as the projects are concerned.
	d environmental issues or grievances that arose during implementation assessed and nanagement plans updated? (for projects that did not experience unanticipated social and
environmental risks of grievances th	e answer is Tes)
Yes	
No	
Evidence	
	for this and eight other projects in the CO. It is expected that the final SESP report will be 2018 (see attached TOR for invitation of applicants/experts)
Management & Monitoring	Quality Rating: Satisfactory
11. Was the project's M&E Plan adeq	uately implemented? (select the option from 1-3 that best reflects the project)
according to the frequency stated in the fully met decentralized evaluation states	ors in the project's RRF was reported regularly using highly credible data sources and collected the project's M&E plan, including sex disaggregated data as relevant. Evaluations, if conducted, ndards, including gender UNEG standards, and management responses were fully implemented. aluations, were used to take corrective actions when necessary. (all must be true to select this
slippage in following the frequency st conducted meet most decentralized (ors in the project's RRF was collected on a regular basis, although there may have been some ated in the project's M&E plan and data sources were not always reliable. Any evaluations evaluation standards; management responses were fully implemented to the extent possible. I but not used to take collective actions. (all must be true to select this option)
	collected against the indicators in the project's RRF, or limited data was collected but not ecentralized evaluation standards; and/or lessons learned were rarely captured and used.
Evidence

exclusion from development opportunities relevant to the	sing credible data sources on their capacity needs, deprivation and/or project's area of work. There is clear evidence to confirm that targeted regularly with targeted groups to assess whether they benefitted as expected ing. (all must be true to select this option)
20. Were the intended targeted groups systematically idensure results were achieved as expected? (select the	dentified and engaged, prioritizing the marginalized and excluded, to option from 1-3 that best reflects the project)
Yes, the AWP of Songhai and Empretec projects have h realities on the ground.	ad to be reviewed on more than one occasion to adjust activities to the
Evidence	
1: While the project team may have reviewed the will link was made to the delivery of desired development resmanagement took place.	ork plan at least once per year to ensure outputs were delivered on time, no sults. Select this option also if no regular review of the work plan by
	ach year with a view to assessing if project activities were on track to There is no evidence that data or lessons learned were used to inform the

3: Only national systems (i.e., procurement, monitoring, evaluation, etc.) were to fully implement and monitor the project. All relevant stakeholders and partners were fully and actively engaged in the process, playing a lead role in project decision-making, implementation and monitoring. (all must be true to select this option)
2: National systems (i.e., procurement, monitoring, evaluation, etc.) were used in combination with other support (such as count office support or project systems) to implement and monitor the project, as needed. All relevant stakeholders and partners were actively engaged in the process, playing an active role in project decision-making, implementation and monitoring. (both must be true to select this option)
1: There was relatively limited or no engagement with national stakeholders and partners in the decision-making, implementation and/or monitoring of the project.
Not Applicable
Evidence
See Final/Terminal evaluation reports of Songhai and Empretec projects.
23. Were there regular monitoring of changes in capacities and performance of institutions and systems, and were the mplementation arrangements adjusted according to changes in partner capacities? (select the option from 1-3 that best effects the project)
3: Changes in capacities and performance of national institutions and systems were regularly and comprehensively assessed/monitored using clear indicators, rigorous methods of data collection and credible data sources. There is clear evidence the capacities and performance of national institutions and systems improved by the end of the project, if applicable. Implementation arrangements were formally reviewed and adjusted, if needed, in agreement with partners according to changes in partner capacities (all must be true to select this option)
 2: Aspects of changes in capacities and performance of relevant national institutions and systems were monitored by the project using indicators and reasonably credible data sources. There is limited evidence that capacities and performance of national institutions and systems improved by the end of the project, if applicable. Some adjustment was made to implementation arrangements if needed to reflect changes in partner capacities. (all must be true to select this option) 1: Some aspects of changes in capacities and performance of relevant national institutions and systems may have been
monitored by the project, however changes to implementation arrangements were not considered. Also select this option if changes capacities and performance of relevant national institutions and systems were not monitored by the project.
O Not Applicable
Evidence
Monitoring of capacities of relevant national institutions though happened from time to time, it was not systematic and regular
4. Were the transition and phase-out arrangements implemented as planned by the end of the project, taking into account ar djustments made to the plan during implementation? (select the option from 1-3 that best reflects the project)
3: The project's governance mechanism regularly reviewed the project's sustainability plan, including arrangements for transitio and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented a planned by the end of the project, taking into account any adjustments made during implementation. (both must be true to select this option)
There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented by the end of the project, taking into account any adjustments made during implementation. (both must be true to select this option)
1: The project may have had a sustainability plan that specified arrangements for transition and phase-out, but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.
Evidence

Yes, for instance for the Songhai project a new project document was prepared to support the initiative for the next five years (2017-2021) with a clear exit strategy for national takeover and ownership.

25. Please upload the final lessons learned report that was produced for this project.

Summary/Final Project Board Comments:

Due to the relevance of the projects to the socio-economic needs of the country, the project board is of the view that Government should provide sufficient resources to support MSME growth and development, streamline domestic tax system and lower interest rates for farmers and MSMEs. Government should further support livelihood initiatives such as beekeeping, value addition using forest produce, tree nursery multiplication for revenue generation and environmental protection and non-consumptive utilization of natural resources such as eco-tourism among many others to ensure that communities become self reliant. Given that all the three projects were pilot in nature, the board urges UNDP to engage other UN Agencies to mobilize resources to address future funding requirements. In future, the projects need to pay particular attention to the UNDP SES procedure in the development of prodocs.
