**Brief Description**

The UNDP/GEF Project “CLME<sup>+</sup>: Catalysing Implementation of the Strategic Action Programme for the Sustainable Management of shared Living Marine Resources in the Caribbean and North Brazil Shelf Large Marine Ecosystems” (GEF ID 5542; 2015-2019) is a 5-year project that specifically aims at facilitating the implementation of the 10-year politically endorsed *Strategic Action Programme for the Sustainable Management of the Shared Living Marine Resources of the Caribbean and North Brazil Shelf Large Marine Ecosystems* (CLME<sup>+</sup> SAP). The project seeks to achieve this by facilitating ecosystem based management/an ecosystem approach to fisheries (EBM/EAF) within the CLME<sup>+</sup> region, in such a way that a sustainable and climate resilient provision of goods and services from the region’s living marine resources can be secured. Given its regional and comprehensive nature, the UNDP/GEF CLME<sup>+</sup> Project is uniquely positioned to address the root causes of environmental degradation, in particular the gaps and weaknesses in transboundary and cross-sectoral governance arrangements. In this same context, the project will assist stakeholders in achieving improved coordination, collaboration and integration among the wide array of ongoing and newly planned projects and initiatives that are of relevance to the wider objectives of the CLME<sup>+</sup> SAP.
