

**United Nations Development Programme – INDIA
CPAP 2013-17
Annual Work Plan 2016**

Project Title: Strategic Programmatic Engagement at State Level
 Implementing Partner: UNDP
 UNDP SP Outcome(s): Outcome 7: Development debates and actions at all levels prioritise poverty, inequality and exclusion consistent with our engagement principles
 UNDP SP Output (s): Innovations enabled for development solutions, partnerships and other collaborative arrangements
 UNDP SP Indicators: Number of pilot and demonstration projects initiated are scaled up by national partners (e.g. expanded, replicated, adapted or sustained)
 UNDAF Outcome(s): Inclusive and equitable growth policies and poverty reduction strategies of the Government are strengthened to ensure that most vulnerable and marginalized people in rural and urban areas have greater access to productive assets, decent employment, skills development, social protection and sustainable livelihoods

Brief Description

The project is aimed at addressing technical, institutional and operational capacities to strategize and implement key budget priorities of the government including through the Development Support Services provision agreed in the CPAP 2013-17. The project will specifically make available (a) technical assistance to the SDG visioning and implementation at the state level; (b) analysis of budgets and implementation bottlenecks as a critical input to the proposal development and strategic implementation action plan; (c) demand-supply assessment and response generation; (d) technical assistance to design and develop large and scalable projects; (e) technical capacities to advice government on utilization of budget allocations; (f) innovative and cost effective solutions and scaling up; (g) strengthening concurrent monitoring mechanisms across key flagship programmes and schemes; and (h) experience sharing, knowledge and information management systems. These issues will be addressed through a set of activities outlined in the work plan at *section-1 below*. Pertinent to mention here that the proposed work plan should be considered flexible in nature to also enable the CO to respond to the immediate and specific government requests as these come up. The project has co-contribution under the Fund for Country-Level Emerging Priority Initiatives (FCEPI) grant.

II. Management Arrangement and project oversight:

The project will be directly implemented by the UNDP. The project is a special purpose vehicle to fast track response to emerging priorities and innovations of the governments at state and central level, SDG visioning and implementation and leveraging government financing. Given the cross sectoral, multi-state and integrated nature of the project outputs and activities, there is no single implementing partner for this project.

In consultation with the senior management, the project oversight will be provided by the internal Project Steering Committee (PSC) chaired by the Country Director or Deputy Country Director. The PSC will comprise heads of the programme namely Poverty, Governance, Energy & Environment and Disaster Risk Reduction; and Head of Finance in the Country Office. The PSC will meet at least once a year although efforts will be made to convene two meetings, midyear and end year.

The project outputs and activities will benefit from the substantive guidance from the State Governments. The progress of the project will be documented once in six months and an annual project progress report will be prepared at the end of the year.

Funds Flow Arrangements:

The project will be implemented under DIM and project closure and audit will be as per UNDP rules and regulations
