Closure Stage Quality Assurance Report

Form Status: Approved		
Overall Rating:	Satisfactory	
Decision:		
Portfolio/Project Number:	00112789	
Portfolio/Project Title:	Enhancement of National Prevention Mechanism in Kazakhst	
Portfolio/Project Date:	2019-01-01 / 2021-12-31	

Strategic

Quality Rating: Exemplary

1. Did the project pro-actively identified changes to the external environment and incorporated them into the project strategy?

- 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

During the 3-year project period the team watched o ver the changing external environment, also includin g the challenges riased by COVID-19 pandemic, an d adjusted annual work plans to respond the change s and use new opportunities to strengthen the Natio nal Preventive Mechanism and ensure rights of peo ple in the closed institutions.

1	2021AWP_NPM_ENGFINAL_10563_301 (ht tps://intranet.undp.org/apps/ProjectQA/QAFo rmDocuments/2021AWP_NPM_ENGFINAL_ 10563_301.pdf)	gulmira.tulesbayeva@undp.org	12/29/2021 2:41:00 PM	
2	Minutes_12.02.21_NPM_PBM_engPRI_105 63_301 (https://intranet.undp.org/apps/Projec tQA/QAFormDocuments/Minutes_12.02.21_ NPM_PBM_engPRI_10563_301.pdf)	gulmira.tulesbayeva@undp.org	12/29/2021 2:50:00 PM	

2. Was the project aligned with the thematic focus of the Strategic Plan?

- 3: The project responded to at least one of the development settings as specified in the Strategic Plan (SP) and adopted at least one Signature Solution .The project's RRF included all the relevant SP output indicators. (all must be true)
- 2: The project responded to at least one of the developments settings1 as specified in the Strategic Plan. The project's RRF included at least one SP output indicator, if relevant. (both must be true)
- 1: While the project may have responded to a partner's identified need, this need falls outside of the UNDP Strategic Plan. Also select this option if none of the relevant SP indicators are included in the RRF.

Evidence:

The project responded to SP development setting "A ccelerate structural transformations for sustainable d evelopment" and SP Output 2.2.3 "Capacities, funct ions and financing of rule of law and national human rights institutions and systems strengthened to expa nd access to justice and combat discrimination, with a focus on women and other marginalized groups"

Relevant

Quality Rating: Satisfactory

3. Were the project's targeted groups systematically identified and engaged, with a priority focus on the discriminated and marginalized, to ensure the project remained relevant for them?

- 3: Systematic and structured feedback was collected over the project duration from a representative sample of beneficiaries, with a priority focus on the discriminated and marginalized, as part of the project's monitoring system. Representatives from the targeted groups were active members of the project's governance mechanism (i.e., the project board or equivalent) and there is credible evidence that their feedback informs project decision making. (all must be true)
- 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the discriminated and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
- 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected
- Not Applicable

Evidence:

The project targeted groups are NPM particpants th at visit places of detention and monitor situation with human rights in regard to detainees. The recommen dations of NPM particpants in regard to project imple mentation process were regularly used and incorrpo rated in project activities. As an example, NPM parti cipants advice on incraesed awarenes raising and p ublications on NPM work has been considered and i ncluded in the project workplan with engagement of media organization for implementaton purposes

1	ИТОГОВЫЙ_ОТЧЕТ_НПМ_ANT_2020_105 63_303 (https://intranet.undp.org/apps/Projec tQA/QAFormDocuments/ИТОГОВЫЙ_ОТЧЕ T_НПМ_ANT_2020_10563_303.pdf)	gulmira.tulesbayeva@undp.org	12/29/2021 7:45:00 PM

4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?

- 3: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
- 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)

1: There is limited or no evidence that knowledge and lessons learned were collected by the project team.
 There is little or no evidence that this informed project decision making.

Evidence:

The project continuously studied external and intern al sources to assess the relevance of undertaken pr oject activities, and assess if revision of plans was r equired. Specifically, pandemic environment pushed towards acceleration of online format of the meeting s of NPM Coordination Council and allowed for reall ocation of resources from travel expenses to the incr eased budget of Ombudsman's annual report and N PM consolidated report preparation

#	File Name	Modified By	Modified On
1	NPMConsolidatedreport2020eng_10563_30 4 (https://intranet.undp.org/apps/ProjectQA/Q AFormDocuments/NPMConsolidatedreport2 020eng_10563_304.docx)	gulmira.tulesbayeva@undp.org	12/29/2021 7:59:00 PM

5. Was the project sufficiently at scale, or is there potential to scale up in the future, to meaningfully contribute to development change?

- 3: There was credible evidence that the project reached sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change.
- 2: While the project was not considered at scale, there are explicit plans in place to scale up the project in the future (e.g. by extending its coverage or using project results to advocate for policy change).
- 1: The project was not at scale, and there are no plans to scale up the project in the future.

Evidence:

The project was initially planned to ensure sustainab ility and institutional strengthening of NPM. Elaborati on of training materials and training of NPM participa nts scaled up to annual upgrade of skills of NPM par ticipants representing all regions of the country and ensured effectiveness of monitoring visits to the plac es of detention across the country.

Principled

Quality Rating: Satisfactory

6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.

- 3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)
- 2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)
- 1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

Evidence:

The project has monitored activities with gender disa ggregation, to ensure equal participation of women a nd men among NPM participants in project activities. It also stressed upon improved conditions for convict ed women with children in prisons based on best int ernational practices as reflected in the report of Pen al Reform International.

7. Were social and environmental impacts and risks successfully managed and monitored?

- 3: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- 2: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

Evidence:

Social and environmental risks were assessed as Lo w at the project design stage. Identified risks were in cluded in the Project Risk Log and have been regula rly monitored.

8. Were grievance mechanisms available to project-affected people and were grievances (if any) addressed to ensure any perceived harm was effectively mitigated?

- 3: Project-affected people actively informed of UNDP's Corporate Accountability Mechanism (SRM/SECU) and how to access it. If the project was categorized as High or Moderate Risk through the SESP, a project -level grievance mechanism was in place and project affected people informed. If grievances were received, they were effectively addressed in accordance with SRM Guidance. (all must be true)
- 2: Project-affected people informed of UNDP's Corporate Accountability Mechanism and how to access it. If the project was categorized as High Risk through the SESP, a project -level grievance mechanism was in place and project affected people informed. If grievances were received, they were responded to but faced challenges in arriving at a resolution.
- 1: Project-affected people was not informed of UNDP's Corporate Accountability Mechanism. If grievances were received, they were not responded to. (any may be true)

Estatement

Quality Rating: Satisfactory

Project counterparts were informed of UNDP's Corp prate Accountability Mechanism and ways to access t. There was no necessity to apply it as there were n o grievances.

9. Was the project's M&E Plan adequately implemented?

Management & Monitoring

3: The project had a comprehensive and costed M&E plan. Baselines, targets and milestones were fully populated. Progress data against indicators in the project's RRF was reported regularly using credible data sources and collected according to the frequency stated in the Plan, including sex disaggregated data as relevant. Any evaluations conducted, if relevant, fully meet decentralized evaluation standards, including gender UNEG standards. Lessons learned, included during evaluations and/or After-Action Reviews, were used to take corrective actions when necessary. (all must be true)

2: The project costed M&E Plan, and most baselines and targets were populated. Progress data against indicators in the project's RRF was collected on a regular basis, although there was may be some slippage in following the frequency stated in the Plan and data sources was not always reliable. Any evaluations conducted, if relevant, met most decentralized evaluation standards. Lessons learned were captured but were used to take corrective actions. (all must be true)

1: The project had M&E Plan, but costs were not clearly planned and budgeted for, or were unrealistic. Progress data was not regularly collected against the indicators in the project's RRF. Evaluations did not meet decentralized evaluation standards. Lessons learned were rarely captured and used. Select this option also if the project did not have an M&E plan.

Evidence:

The project had developed a costed M&E Plan, with populated baselines and targets. The project regular ly provided progress data on RRF indicators and us ed lessons learned for corrective actions.

10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?

- 3: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- 2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)
- 1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

Evidence:

There was a developed project governance mechani sm that operated well and relevant. Project board m etings were called and conducted depending on proj ect planning and prioritiy issues, changing environm ent and need for revision of the project work plan. Pr oject reporting was supported with regular progess r eports that reflected project activities and outcomes achieved

11. Were risks to the project adequately monitored and managed?

- 3: The project monitored risks every quarter and consulted with the key stakeholders, security advisors, to identify continuing and emerging risks to assess if the main assumptions remained valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk and were updated to reflect the latest risk assessment. (all must be true)
- 2: The project monitored risks every year, as evidenced by an updated risk log. Some updates were made to management plans and mitigation measures.
- 1: The risk log was not updated as required. There was may be some evidence that the project monitored risks that may affected the project's achievement of results, but there is no explicit evidence that management actions were taken to mitigate risks.

Evidence:

The project team ensured adequate risk monitoring, and discussed the emerging risks with the key proje ct partners and UNDP management if situations req uired, also considering COVD-19 restrictions that co uld affect project activities. Specifically, the issues of delivery have been discussed, including on-line form at of training events, round tables and think tank dis cussion to support effectiveness of the new modality along with the funds disbursements.

#	# File Name Modified By Modified On

Efficient	Quality Rating: Satisfactory
12. Adequate resources were mobilized to achieve intend adjust expected results in the project's results framework	-
 Yes No 	

The project team watched to mobilize adequate reso urces within the existing funds to respond to project priorities in changing environment. As an example, t he project assisted government partner in reviewing the draft law on Ombudsman by Asian Pacific Foru m of national human rights institutions. The law has been successfully passed through the Parliament an d signed by the President on 30 December 2021.

13. Were project inputs procured and delivered on time to efficiently contribute to results?

- 3: The project had a procurement plan and kept it updated. The project quarterly reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 2: The project had updated procurement plan. The project annually reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)

1: The project did not have an updated procurement plan. The project team may or may not have reviewed operational bottlenecks to procuring inputs regularly, however management actions were not taken to address them.

Evidence:

The project had regularly updated procurement plan and advised the procurement team if there have bee n any changes or delays with procurement dependin g on discussion and approval of TORs by the govern ment partner.

14. Was there regular monitoring and recording of cost efficiencies, taking into account the expected quality of results?

- 3: There is evidence that the project regularly reviewed costs against relevant comparators (e.g., other projects or country offices) or industry benchmarks to ensure the project maximized results delivered with given resources. The project actively coordinated with other relevant ongoing projects and initiatives (UNDP or other) to ensure complementarity and sought efficiencies wherever possible (e.g. joint activities.) (both must be true)
- 2: The project monitored its own costs and gave anecdotal examples of cost efficiencies (e.g., spending less to get the same result,) but there was no systematic analysis of costs and no link to the expected quality of results delivered. The project coordinated activities with other projects to achieve cost efficiency gains.
- 1: There is little or no evidence that the project monitored its own costs and considered ways to save money beyond following standard procurement rules.

Evidence:

The project regularly compared the costs to maximiz e project cost effectiveness, also through market an alysis before annual work planning and procurement actions, consulting with similar UNDP and other UN agencies' projects. As an example, on-line lectures on human rights for students and NGOs were delive red without the costs upon agreement with human ri ght experts and OHCHR staff on a volutary basis.

17. Were the targeted groups systematically identified and engaged, prioritizing the marginalized and excluded, to ensure results were achieved as expected?

- 3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. There is clear evidence that the targeted groups were reached as intended. The project engaged regularly with targeted groups over the past year to assess whether they benefited as expected and adjustments were made if necessary, to refine targeting. (all must be true)
- 2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true)
- 1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project area of work. There is some engagement with beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year.
- Not Applicable

The project regularly engaged with the targeted grou ps including the regional representatives of NPM to discuss training needs and areas of improving their monitoring skills, including their capacity in using the digital Information Platform that UNDP developed for NPM participants' data storage, reporting and analys is.

Sustainability & National Ownership

Quality Rating: Satisfactory

18. Were stakeholders and national partners fully engaged in the decision-making, implementation and monitoring of the project?

- 3: Only national systems (i.e., procurement, monitoring, evaluation, etc.) were used to fully implement and monitor the project. All relevant stakeholders and partners were fully and actively engaged in the process, playing a lead role in project decision-making, implementation and monitoring. (both must be true)
- 2: National systems (i.e., procurement, monitoring, evaluation, etc.) were used to implement and monitor the project (such as country office support or project systems) were also used, if necessary. All relevant stakeholders and partners were actively engaged in the process, playing an active role in project decision-making, implementation and monitoring. (both must be true)
- 1: There was relatively limited or no engagement with national stakeholders and partners in the decisionmaking, implementation and/or monitoring of the project.
- Not Applicable

Evidence:

National stakeholders were engaged in project imple mentation process, and played an active role in form ulation of annual work plans, project concept docum ents, training agenda, and terms of reference.

19. Were there regular monitoring of changes in capacities and performance of institutions and systems relevant to the project, as needed, and were the implementation arrangements⁸ adjusted according to changes in partner capacities?

- 3: Changes in capacities and performance of national institutions and systems were assessed/monitored using clear indicators, rigorous methods of data collection and credible data sources including relevant HACT assurance activities. Implementation arrangements were formally reviewed and adjusted, if needed, in agreement with partners according to changes in partner capacities. (all must be true)
- 2: Aspects of changes in capacities and performance of relevant national institutions and systems were monitored by the project using indicators and reasonably credible data sources including relevant HACT assurance activities. Some adjustment was made to implementation arrangements if needed to reflect changes in partner capacities. (all must be true)
- 1: Some aspects of changes in capacities and performance of relevant national institutions and systems may have been monitored by the project, however changes to implementation arrangements have not been considered. Also select this option if changes in capacities and performance of relevant national institutions and systems have not been monitored by the project.
- Not Applicable

Evidence:

The project ensured monitoring over the government and SCO institutions' capacity and provided required adjustments depending on specific needs. In particul ar, with the start of COVID19 and quarantine restricti ons the project advised the partners on importance of continuation of NPM monitoring of detention place s and assisted with arranging online meetings of NP M Coordination Council and and interviewing of deta inees.

1	SPTAdviceStatePartiesCoronavirusPandemi c2020_10563_319 (https://intranet.undp.org/ apps/ProjectQA/QAFormDocuments/SPTAdv iceStatePartiesCoronavirusPandemic2020_1 0563_319.pdf)	gulmira.tulesbayeva@undp.org	2/8/2022 4:59:00 AM

20. Were the transition and phase-out arrangements were reviewed and adjusted according to progress (including financial commitment and capacity).

- 3: The project's governance mechanism regularly reviewed the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented as planned by the end of the project, taking into account any adjustments made during implementation. (both must be true)
- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

Evidence:

The project's governance mechanism allowed for re viewing the project's sustainability plan and arrange ments for transition and phase-out. The phase-out w as implemented as planned by the end of the projec t, including the transfer of project developed training materials, handing over digital Information System fo r NPM participants, passing all links to awareness ra ising publications.

QA Summary/Final Project Board Comments

All project deliverables have been produced satisfactorily. Project meets UNDP quality standards. The final Project B oard was conducted with overview of project results including legislative changes in human rights area, enhanced ca pacity of NPM participants, increased awareness of citizens of importance of NPM work and prevention of torture in t he closed institutions, development of NPM digital platform/Information System, UNDP and National Human Rights Center agreed on continuing partnership focused at ensuring human rights standards in Kazakhstan, also through ini tiation of a new tied grant proposal to support Ombudsman's institution at national and regional levels.
