## Part A. Integrating Programming Principles to Strengthen Social and Environmental Sustainability

### QUESTION 1: How Does the Project Integrate the Programming Principles in Order to Strengthen Social and Environmental Sustainability?

#### Briefly describe in the space below how the project mainstreams the human rights-based approach

The project focuses on strengthening the capacity of government personnel from the ACSH participating countries in achieving their human development goals. The project contributes to the establishment of modern, effective, and sustainable governance systems that meet society's expectations to responsive, accountable, and transparent public institutions in the countries of the region and beyond, thus promoting human rights-based approach to development.

### Briefly describe in the space below how the project is likely to improve gender equality and women's empowerment

The project will ensure gender balance among the participants of its learning and training activities. It will also ensure that demand- and need-oriented, as well as gender-based learning approaches will be employed throughout the implementation timeline of the project. Furthermore, all on-demand capacity building, research-related and partnership events, gender aspects will be taken into consideration.

#### Briefly describe in the space below how the project mainstreams sustainability and resilience

Sustainability is achieved by improving the quality of life of the population and modernizing the governance system through innovation and introduction of digital public service provision through differentiated channels of delivery.

#### Briefly describe in the space below how the project strengthens accountability to stakeholders

Accountability to stakeholders is achieved by continuous monitoring and progress reporting during the lifecycle of the Project.
