I.	<i>GENERAL Information:</i> <i>Общая информация:</i>	Supporting an Inclusive and Multi-Sectoral Response to COVID-19 and Addressing its Socio-Economic Impact in the Kyrgyz Republic: Output 1 “Health Systems Strengthening to Respond to COVID-19”
	<i>a) Mission date(s)/Дата поездки</i>	April 01, 2021
	<i>b) Mission member(s)/Участники</i>	Eldiyar Seitkaziev, Project Coordinator; Chyntemir Kalbaev, Communications Assistant; Oleg Mirzaakbarovich, Driver.
	<i>c) Mission to/Место проведения</i>	Cholpon Ata, Issyk Kul, Kyrgyzstan
	<i>d) Purpose of the Mission/Цель поездки</i>	Monitoring of training on healthcare waste management (HCWM)
II. Main conclusions/Основные выводы		
<p>The Project conducted the Rapid Assessment Survey to collect data on the current state of healthcare waste management (HCWM) and the monitoring and impact assessment of healthcare waste in public-health facilities and solid waste landfills. Based on these assessments, the training for 600 medics is currently taking place in all the country's regions. On April 01, 2021, the contractor, Health Promotion Association, conducted a training for 15 medical workers of Cholpon Ata District Hospital on HCWM within Output 1 “Health Systems Strengthening to Respond to COVID-19”.</p> <p>Trainers:</p> <ul style="list-style-type: none"> • Dr. Aleksey Kravtsov, and • Dr. Nadira Sorombaeva <p>The training covered the following agenda topics:</p> <ul style="list-style-type: none"> • Identification, classification, labeling and packaging of healthcare waste • HCWM cycle: identification, sorting, labeling, packaging, internal transportation, decontamination, disposal and/or utilization. • Emergency response activities when handling medical waste • Organization of a decontamination/autoclaving facility for healthcare waste of class B (Б) and class V (В) • Class B (Б) and class V (В) healthcare waste decontamination in microwave waste-disinfection equipment 		

Upon completion of the training all 15 participants took a quiz to test their attained knowledge. The contractor used visibility logos in all training materials.

UNDP team who conducted the monitoring visit together with the IC Expert on health waste management and infections control, Dr. Aleksei Kravtsov, visited the Cholpon Ata municipal landfill. Technically this is not a landfill, rather it is merely a regular dumping ground. This demonstrated an unacceptable way and conditions of utilization of medical waste, which is commonplace in the country. The city authorities forced medics to burn medical waste, the remnants of which the team had detected.

The Comms Assistant took and archived photographs of both training and visit to the landfill.

Signature/Подпись:

A handwritten signature in black ink, appearing to be a stylized cursive script, possibly representing the name 'Aleksei Kravtsov'.
