## **Executive summary**

This Consolidated Annual Narrative Report on activities implemented under the “Disability Rights Initiative Cambodia (DRIC)” Joint Programme covers the period from 1 January to 31 December 2015. This report is in fulfillment of the reporting requirements set out in the Standard Administrative Arrangement (SAA) concluded between the Administrative Agent (UNDP MPTF Office) and the Donor. In line with the Memorandum of Understanding (MOU), the Report is consolidated based on information and data submitted by Participating Organizations. The report provides a comprehensive overview of achievements and challenges associated with the Joint Programme, enabling to make strategic decisions and correction measures where required.

While 2014 was a formative period for the DRIC, the programme went through a period of consolidation and active implementation of all the four components during the year 2015. The synergetic work of the three implementing agencies succeeded in bringing the rights of the persons with disabilities on the agenda of the disability stakeholders in Cambodia. The constitution of the 14 Disability Action Working Groups (DAWGs) by the Disability Action Council (DAC) for the effective implementation of the National Disability Strategic Plan (NDSP) is one of the major achievements of the programme. A coordination mechanism is in place to ensure that the strategic objectives of the NDSP are implemented realistically taking into consideration the human and financial resources available. The DAC was instrumental in formulating critical decrees such as Inter-ministerial Prakas for discount in school fees and stationery for students with disabilities, financial reward for persons with disabilities who excel in sports and designated parking space for persons with disabilities. These sub-decrees have contributed towards promotion of the rights of persons with disabilities. The Disabled People’s Organization (DPOs) is the backbone of any disability movement and in Cambodia, the support extended by the DRIC programme has led to increase in the capacities of the Cambodian Disabled People’s Organization (CDPO) to effectively act as the channel to raise the voices of persons with disabilities. The government has begun to consult the umbrella organization of the DPOs by providing representation in the technical working groups and committees constituted for the purpose of drafting legislations and policies. Perhaps the most significant change can be seen in the increase in representation of women with disabilities and other minority groups within the hierarchy of the umbrella organization. Around 50% of the CDPO staff are women with disabilities and 40% of the members of the governing board of the DPOs are women with disabilities.

The post conflict period in Cambodia has witnessed the need for rehabilitation services and the DRIC programmes intend to strengthen government capacity to lead, regulate, plan and coordinate the existing rehabilitation systems. In 2015, the programme was able to improve the quality of information on the existing rehabilitation mechanisms. Key steering groups were constituted within the Persons with Disability Foundation (PWDF) in collaboration with the International NGOs (INGOs) providing rehab services in the country. The Provincial Rehabilitation Demonstration Project (PRDP) which is one of the flagship projects within the programme resulted in establishment of two provincial committees on health and rehabilitation. There has been an increase in the participation of the officials of the Ministry of Health (MoH) in the rehabilitation sector leadership development. Prior to the programme, the Physical Rehabilitation Centers (PRCs) witnessed decline in number of clients approaching the centers due to fall in standards on account of handover of the centers by the INGOs to the government. The programme was able reverse this trend and the 9 PRCs supported under the programme recorded increase in clients accessing various services apart from increase in the production of orthoses and prostheses products. The national Community based Rehabilitation (CBR) Forum organized under the auspices of the DRIC programme brought the key CBR operators on a common platform to develop an action plan to develop CBR in Cambodia.

The majority of persons with disabilities live in rural parts of Cambodia and the programme has been striving to promote inclusive community development for these citizens with disabilities. The programme witnessed increase in the participation of persons with disabilities in the decision-making process during the year especially through the work of the partners supported under the Cambodia Disability Inclusive Development Fund (CDIDF), a grant scheme under the programme. The programme was able to further sensitize sub-national decision makers to promote inclusion of persons with disabilities in the decision making process. In order to percolate to the grassroots level, a training package was developed and field tested in 2015 which will be implemented in the year 2016.

One of the key outputs achieved during the year pertains to implementation of the recommendations of the Functional Analysis report. The Disability Action Council (DAC) was instrumental in initiating action on the 8 of the key recommendations. The CDPO was able to work with the Ministry of Planning (MoP) in making the issuance of ID poor card disability –inclusive. During the year, MoH was able to lead the discussion on the PRDP and participated in the review of the NDSP. The ministry also commenced its implementation of the PRDP in the Battambang province under which 36 government staff from the health centers and hospitals apart from NGO representatives were trained on disability and basic rehabilitation services. Increased opportunities to contribute to the community is one of the key outputs of component 04. During the year of reporting the CDIDF partners were able to ensure that 264 persons with disabilities which included 86 women with disabilities participated in CC/WCCC/CCWC meetings or trainings.

One of the delays was the submission of the report on the implementation of the convention to the committee on the Convention on the Rights of Persons with Disabilities (CRPD). There has been delay in conducting the meetings of the Disability Action Working Groups (DAWGs) constituted in the key ministries for the purpose of coordinating the implementation of the NDSP. The direct support rendered by the programme to the Non-Governmental Organizations (NGOs) for service delivery has been challenging in terms of identification and selection of the grant partners in a reasonable short span of time without compromising on the quality of selection apart from linking the grass root level activities of some of the grantees to the upstream policy and programme development.

It is pertinent to notice that after 18 months of active implementation, the programme has succeeded in addressing disability within the policies and programmes of the key ministries of the government with the constitution of DAWGs in the key ministries. The DRIC has resulted in a conducive environment for the stakeholders to review their programmes and policies to ensure inclusion of persons with disabilities and consult DPOs on key programmatic issues. The sensitization of the provincial government officials has brought in perceptible changes in their knowledge about issues confronting persons with disabilities. This is evident from the fact that 85% of the surveyed communes in 2015 indicated inclusion of persons with disabilities in the planning processes. The programme through the PRSS has reversed the downward trend of the PRCs in terms of service delivery and the reporting period witnessed increase in the number of persons with physical disabilities accessing services. Through the PRDP, the MoH has demonstrated a successful model of service delivery by creating a network of partners converging to disseminate information, provide pathways for much needed services and to put in place a referral system at the sub-national level.

## **I. Purpose**

The main objective of the programme is to create more opportunities for the participation of people with disabilities in the politico-economic as well as socio-cultural life by building the capacity of the government to implement the NDSP in alignment with the CRPD. The programme aims to strengthen the CDPO, the

representative body of the DPOs in Cambodia to advocate for the rights of people with disabilities. As physical rehabilitation is critical to empower people with disabilities and to enable them to regain their optimal level of functioning, the programme aims to support and strengthen the nodal ministries to acquire leadership of the sector and simultaneously provide support to the Physical Rehabilitation Centers (PRC) that are in a state of transition. The programme also intends to include people with disabilities within the process of decentralization and to make provincial governance accessible, participatory and inclusive. Last but not the least, to mainstream disability in the development agenda for Cambodia.

## **II. Assessment of Programme Results**

### **i) Narrative report on results**

#### **Outcomes**

The end of the programme outcome of the DRIC is to ensure that there is an increase of opportunities for persons with disabilities to participate in the politico-economic and socio-cultural life on the basis of the NDSP which is in alignment with the regional strategy and CRPD to realize the rights of persons with disabilities.

The programme during the year has been consistent in supporting the DAC to constitute 14 DAWGs at the national level. Around 20 provincial level DAC offices underwent training on coordination role of the provincial units. The DAC has demonstrated a rights-based and an inclusive approach in implementation of the NDSP by successfully orienting the key ministries on the rights of persons with disabilities through the DAWGs and in formulating critical executive orders to guarantee rights to persons with disabilities in areas such as education, sports and accessibility in public places. The key ministries have indicated their interest in including disability within their mandate. One of the outcomes of the review workshop is the action plan to further integrate the needs and concerns of persons with disabilities within their respective mandates.

The programme witnessed increase in the capacity of the DAC during the reporting year in terms of engaging the civil society and other stakeholders in the preparation of the first national report on implementation of the CRPD to be submitted to the committee and in advocating for inclusion of disability in key policies and programme of the RGC such as making ID poor card inclusive and in representing the interests of persons with intellectual disabilities. The Asia-Pacific conference on CBR highlighted access to inclusive markets in Kandal province of Cambodia as one of the ten regional good practices to promote inclusive societies for persons with disabilities.

The Disabled People's Organization is the backbone of any disability movement and in Cambodia, the support extended by the DRIC programme has led to increase in the capacities of the CDPO to effectively act as the channel to raise the voices of persons with disabilities. The government has begun to consult the umbrella organization of the DPOs by providing representation in the technical working group committees. The CDPO has actively advocated to make the law on information inclusive by engaging the National Election Committee to enable persons with disabilities to exercise their fundamental right to political participation. Thanks to the support rendered under the DRIC programme, there is visible change in the attitude of the key national ministries who are consulting the CDPO on major policy changes impacting persons with disabilities. Perhaps the most conspicuous change noticed by the programme is increase in representation of women with disabilities along with other minority groups amongst the disability population. During the reporting year, CDPO has been able to constitute radio stations in 2 provinces and broadcasted 24 radio programs involving 5716 listeners participating in the live discussions on issues related to the rights of persons with disabilities.

The post conflict period in Cambodia has witnessed the need for rehabilitation services and the DRIC programmes intends to strengthen the government's capacity to lead, regulate, plan and coordinate the existing rehabilitation systems. In 2015, the programme was able to provide qualitative information about disability and rehabilitation in the form of capacity need assessments, disability analysis within the Cambodia Demographic Health Survey (CDHS), rehabilitation financing and work force reports. Key steering groups were constituted within the PWDF in collaboration with the INGOs providing rehab services in the country. The PRDP which is one of the flagship projects within the programme resulted in establishment of two provincial committees on health and rehabilitation. There has been an increase in the participation of the officials of the MoH in the rehabilitation sector leadership mechanisms especially in developing the PRDP and stroke rehabilitation guidelines apart from increase in the capacity of the health personnel in disability and rehabilitation. Around 324 government staff comprising 97 health workers, 45 commune chiefs, 172 village chiefs and 513 village volunteers have benefited from the trainings held so far.

Prior to the programme, the PRCs witnessed decline in number of clients approaching the centers due to fall in standards on account of handover of the centers by the INGOs to the government. During the reporting year, the programme was able reverse this trend and the 9 PRCs supported under the programme recorded increase in clients accessing various services apart from increase in the production of orthoses and prostheses products.

One of the intended results of the DRIC is to increase the capacity of the Ministry of Social Affairs, Veterans and Youth (MoSVY) and PWDF to effectively manage PRCs and support their transition from INGOs. The programme has led to increase in number of civil servants managing the PRCs and efforts are underway to have a standard working procedures for the PRCs. Community based rehabilitation is considered globally as a strategy to promote inclusive development for persons with disabilities. Together with the MoSVY, the DRIC has taken steps to revise the national CBR guidelines and in strengthening the coordination mechanism. The national CBR Forum organized under the auspices of the DRIC programme brought the key CBR operators on a common platform to develop an action plan to further strengthen CBR movement in Cambodia.

The majority of persons with disabilities live in the rural Cambodia and the programme has been striving to promote inclusive community development for these citizens with disabilities. The programme witnessed increase in the participation of persons with disabilities in the decision- making process during the year especially through the work of the partners supported under the CDIDF grant scheme. Around 264 Persons with disabilities are now represented in the commune councils and Women and Children Consultative Committee (WCCC) out of which 86 are women with disabilities The partners of CDIDF have undertaken many interventions in the area of home based rehabilitation targeting most marginalized groups such as children and adolescents with Cerebral Palsy and Spinal Cord Injuries resulting in improved quality of life. Through the Self Help Groups (SHGs), persons with disabilities have enjoyed increased participation and inclusion in the community life. The programme through CDIDF grant scheme for 2015 has been able to further diversify scope of services and reach out to the neediest and hitherto excluded groups within the disability population. Critical areas such as access to sanitation, physical accessibility to schools and health centers were addressed during the year by the CDIDF partners. The programme was able to disseminate success stories and reports thereby attempting to influence policy dialogue in favor of persons with disabilities.

The sub-national officials are the first line of contact for persons with disabilities and during the year of reporting, the programme was able to further sensitize sub-national decision makers to promote inclusion of persons with disabilities in the decision- making process. In order to percolate to the grassroots level, a training package was developed and field tested in 2015 which will be implemented in the year 2016. All of

these activities conducted during the reporting year point to the fact that the sub-national administration for the first time in the history of Cambodia are going through a systemic reform in promoting the rights of persons with disabilities in Cambodia. Around 85% of the surveyed communes in 2015 have included persons with disabilities in the decision-making processes especially in the preparations of commune development plan.

## Outputs

### Outputs related to component 01

- One of the key outputs achieved during the year pertains to implementation of the recommendations of the Functional Analysis report. The DAC was instrumental in initiating action on the 8 of the key recommendations. The DAC members have also been active in the regional network and in exchanging of good practices in promoting right-based and inclusive approach to implement NDSP. There has been an increase in the number of civil servants participating in capacity development workshops. For instance the NDSP review workshop witnessed participation from the line ministries from both national and sub-national level.
- The reporting year also witnessed constitution of 6 new DAWGs apart from action to formulate 4 important Sub-Decrees in relation to functioning of DAC at the national and sub-national level, Sub-decree on financial reward for special Olympic and skill competition for persons with disabilities, Inter-ministerial Prakas on exclusive parking spaces and finally on discount of school fee and stationery for students with disabilities.
- Output related to in-depth analysis of the existing data sources has been achieved during the reporting period. The programme organized training on comparable tools on data collection to the project partners such as DAC, PWDF, MoH, MoP, MoSVY, and CDPO. The Cambodia Demographics Health Survey for the first time included Washington Group Questions<sup>1</sup> into the survey process.

### Outputs related component 02

- During the reporting period there has been considerable capacity building of the CDPO to represent the interests of persons with disabilities. CDPO was able to work with the MoP in making the issuance of ID poor card disability –inclusive. The organization was part of the education committee and was invited to be the member of the working group of the Ministry of Information in the development of the Information Law. The CDPO also participated as the member of the working group in voter’s registration process of the National Election Committee (NEC).
- The specific needs of the minority groups amongst the disability population such as persons with intellectual disabilities was adequately represented by CDPO during the reporting period. It was ensured that at least 50% of the CDPO programmes impacted women with disabilities. Women with disabilities were specially targeted for leadership and capacity-building programmes held within the CDPO. Support to constitution of women DPOs was further continued during the year 2015. Priorities of women with disabilities, persons with intellectual, visual and hearing disabilities were addressed during the year.
- Representatives of the CDPO and DPOs actively participated in the regional meetings on the rights of persons with disabilities. Participation in the S.E. Asia Addendum on access to political

---

<sup>1</sup> Washington Group of Questions are a short set of questions on disability for use on national censuses for gathering information about limitations in basic activities in national populations. The questions are designed to provide comparable data cross nationally for populations living in great variety of cultures with varying economic resources.  
( Source; [http://www.cdc.gov/nchs/washington\\_group/wg\\_rationale.htm](http://www.cdc.gov/nchs/washington_group/wg_rationale.htm))

participation and in the 3<sup>rd</sup> Asia –Pacific Congress on CBR are pointers to one of the key outputs achieved. In order to build the capacities of the existing DPOs, 12 refresher trainings were conducted by CDPO and development of the DPO guidelines has been one of the strategic outputs achieved in 2015.

#### Outputs related to component 03

- During the year, MoH was able to lead the discussion on the PRDP and participated in the review of the NDSP. The ministry also commenced its implementation of the PRDP in the Battambang province under which 36 government staff from the health centers and hospitals apart from NGO representatives were trained on disability and basic rehabilitation services. In 2015, five internal steering groups were established within the PwDF contributing to strengthening of the sector leadership, coordination and planning. The national CBR forum organized during the year has resulted in synergizing the existing national coordination mechanism under the leadership of the MoSVY.

#### Outputs related to component 04

- Increased opportunities to contribute to the community is one of the key outputs of component 04. During the year of reporting the CDIDF partners were able to ensure that 264 persons with disabilities which included 86 women with disabilities participated in CC/WCCC/CCWC meetings or trainings. There were 219 commune interventions carried out by the partners to remove barriers to participate for persons with disabilities. There is enough evidence to prove that persons with disabilities are enjoying increased participation and inclusion in community life. For the reporting period, 75 SHGs have included 1518 members with disabilities out of which 622 are women with disabilities. The CSO survey conducted has shown 88% of the respondents were very positive about the CDIDF. A total of 99,735 beneficiaries (with and without disabilities) directly and indirectly benefited from disability-inclusive and specific support services in the 12 targeted provinces apart from Phnom Penh. The CDIDF initiatives have benefitted 4391 persons with disabilities directly of which 1901 (771 girls) were children with disabilities, representing 43% of total direct beneficiaries.
- The CDIDF led to improvement of accessibility in public spaces. 59 ramps, 23 accessible toilets were built/renovated in schools and health centers.
- One of the outputs of component 4 is to ensure documentation and dissemination of the experiences of the CDIDF partners. During the period of reporting, one human interest story was produced apart from the progress reports of 9 CDIDF partners. The programme also produced 2 blogs on the work done by the CDIDF partners apart from 2 beneficiary stories produced by a partner on inclusive education.

#### **Delays in implementation, challenges, and lessons learned & best practices**

One of the delays was the submission of the report on the implementation of the UN convention to the committee on CRPD. This was mainly due to the delay in holding consultative meetings with the stakeholders. The Programme Coordination Team invited one of the world's renowned advocate on disability rights and former member of the CRPD committee to advise the government and the civil society on the content of the report.

There has been delay in convening the DAWGs constituted in the key ministries for the purpose of coordinating the implementation of the NDSP. The matter has been discussed with the DAC and the Programme Coordination Team is providing the technical support to ensure the meetings are held at the

earliest. The process for revision of the national disability law is yet to be initiated due to a gap in the design of the programme. This has been discussed in the programme board and at the behest of the board members, the programme coordination team has provided a technical note to the national government in which strategies have been spelt out to overcome the deficiency in the programme design and ensure revision of the law.

The direct support to NGOs for service delivery has been challenging at times in terms of identification and selection of the grant partners in a reasonable short span of time without compromising on the quality of selection apart from linking the grass root level activities of some of the grantees to the upstream policy and programme development. The procurement capacities of some of the NGOs didn't match with the stringent procurement requirements of one of the implementing agencies. As a lesson learnt, the implementing agency conducted an assessment of the procurement capacity of the CDIDF applicants.

Translation of the terms and concepts related to disability from English to Khmer has been challenging for the programme as there is no standardized disability terminology in Khmer. Establishing consensus on Khmer text is a lengthy process and this factor should be taken into consideration while planning activities that involve translation work.

The pre-testing of the disability –inclusion training package which was developed for the government officials at the sub-national level to increase awareness about disability and to enhance their skills to improve the lives of persons with disabilities has indicated a very low level of understanding and awareness of disability amongst the local authorities. It was realized that the training content needs to be pitched at the appropriate level.

Constitution of the DAWGs in key ministries to implement strategic objectives of the NDSP and also to ensure mainstreaming of disability in the agenda of the government is a good practice that is being promoted by the DAC within the Asia-pacific region. The programme through the PRDP implemented during the year has provided evidence to the fact that bringing a group of stakeholders at the provincial level to provide a coordinated and streamlined services is effective to reach out to maximum number of persons with disabilities who need health and rehab services.

The programme coordination team has been monitoring the risks on a regular basis. One of the risks identified was related to decrease in funding due to currency fluctuations. The donor has budgeted in Australian dollars while the programme budget is in USD. Depreciation of the AUS dollar has led to considerable reduction in the available budget for the programme. In consultation with the donor, the implementing agencies strategically scaled down the activities ensuring minimal adverse impact on the programmatic results.

## **Qualitative Assessment**

After 18 months of active implementation, the programme has succeeded in addressing disability within the policies and programmes of the key ministries of the government with the constitution of DAWGs in the nodal ministries. Disability terminologies have found a place in the vocabulary of the government. For instance, the draft information law and some of the decrees drafted by the government are disability-inclusive. The PCT has been conducting media analysis on a routine basis and there is a phenomenal increase in the reporting of the social media and print media on issues related to disability. The DRIC has contributed in a creating a conducive environment for the stakeholders to review their programmes and policies to ensure inclusion of persons with disabilities apart from engaging DPOs on key programmatic issues. A pertinent example is the ongoing attempts to include persons with disabilities as recipients of the Health Equity Fund and the issue of Urban ID poor card in consultation and participation of the CDPO. The

voices of persons with disabilities through DPOs has been reaching the nodal ministries through their representative body which is the CDPO. The government has started consulting CDPO and has included them in the working groups constituted to develop policy and legislative frame works.

The sensitization of the provincial government officials has brought in perceptible changes in their knowledge and understanding of disability issues. This is evident from the fact that 85% of the surveyed communes in 2015 indicated inclusion of persons with disabilities in the planning processes. Barriers faced by adults and children with disabilities in the communities have been identified and efforts are made to ensure barrier-free environment for persons with disabilities. Creation of physical access in some of the government offices and schools located in the geographic area where the DRIC programme is currently being implemented is a pointer in this direction.

The programme through the PRSS has reversed the downward trend of the PRCs in terms of service delivery and the reporting period witnessed increase in the number of persons with physical disabilities accessing services. One of the objectives of the programme is to strengthen the rehabilitation system and to build the capacities of the MoSVY and MoH to lead the sector. Through the PRDP, the MoH has demonstrated a successful model of service delivery by creating a network of partners converging to disseminate information, provide pathways for much needed services and to put in place a referral system at the sub-national level. The PRDP implemented under the programme has been able to encourage partnership between MoSVY, MoH, DPOs, NGOs and other service providers at the sub-national level in enabling persons with disabilities to access services in the communities.

The national workshop for the review of the NDSP is a testimony of the programme to engage wide range of actors and in building partnerships to identify the key strategic objectives that could be implemented by 2018. The CDIDF grant scheme implemented in collaboration with the NGOs in the select provinces, districts and communes has brought several key players of development such as provincial government entities, DPOs, families and care-givers of persons with disabilities in breaking barriers that prevent persons with disabilities from participating in political, economic, social and cultural activities on an equal footing with those without disabilities.

The 10 strategic objectives of the NDSP impact all the four components of the programme and successful implementation of the strategic plan remains as a cross-cutting issue for the programme stakeholders. This was aptly demonstrated when the three implementing agencies along with other actors came together to identify those critical objectives that could be implemented during the programme cycle of DRIC.

Community based rehabilitation is a cross-cutting strategy for the programme as a whole and the implementing agencies along with their respective partners are collectively working with MoSVY in strengthening the national CBR coordination mechanism on the basis of the CBR guidelines. The preparations of the CRPD national report is yet another cross-cutting issue and during the reporting period the stakeholders have come together under the leadership of DAC to prepare the 2<sup>nd</sup> draft of the national report. Addressing the rights of the minority groups within the disability population has been of common interest to the programme implementers and the reporting year witnessed DAC commemorating the international day of persons with intellectual disabilities thereby providing much needed visibility to the needs of the minority groups. The needs of women with disabilities has been the guiding factor for all the four components of the programme and their respective partners. For instance CDPO has been able to ensure that women with disabilities constitute 50% of their staff and 40% of the DPOs governing board members are women with disabilities.

The Programme Coordination Team has been able to liaise with various UN agencies within the UN system to bring disability on the agenda of the United Nations Country Team (UNCT). For the first time, the UNCT came together to address the issues of persons living on the streets and majority of them are persons with disabilities. The programme was able to highlight the grim situation of the human rights of persons with disabilities in the country and convinced the human rights Special Rapporteur the need for a ‘status report’ on the human rights of persons with disabilities in Cambodia. The PCT on behalf of the DRIC has been part of the UNCT committee on human rights and has been closely working with the Office of the High Commissioner of Human Rights (OHCHR) in safeguarding the interests of the most marginalized persons with disabilities in Cambodia. Thanks to the DRIC programme, the three UN implementing agencies have initiated a process of mainstreaming disability in their respective country programmes. The programme components are mutually inter-dependent and UN agencies have been supplementing the efforts of each other in realizing the intermediate outcomes of the respective components. The office of the UN Resident Coordinator continues to play a proactive role in forging partnerships amongst the implementing agencies and also in ensuring that the issues of persons with disabilities are appropriately dealt under the United Nations Development Assistance Framework (UNDAF).

### ii) Indicator Based Performance Assessment:

	<u>Achieved Indicator Targets</u>	<u>Reasons for Variance with Planned Target (if any)</u>	<u>Source of Verification</u>

	<p>young persons with disabilities to attend 15th GITC which was held in Jakarta, Indonesia.</p> <ul style="list-style-type: none"> <li>• DAC-SG accompanied persons with intellectual disability to attend the Second Special Music Festival in Pyeongchang, South Korea.</li> <li>• Attended GIZ Regional Workshop “Bridging the gap between policy and practice-cross-sectoral innovations for economic inclusion of persons with disabilities” covering the four key topics 1) Health 2) Social Protection 3) Technical and Vocational Education and Training (TVET) and 4) Employment in Cambodia.</li> <li>• Attended Regional Workshop on Convention on The Rights of Person with Disabilities towards Sustainable Social Protection with was held in Pattaya, Thailand.</li> <li>• DAC–SG played a very important role to provide advice and support on disability development in Cambodia to international institutions for instance the exchange meetings with UNESCAP, University of Korea and USA, Bhutan delegates.</li> </ul>		
<p><b><u>Indicator 1.1.3:</u></b> Civil servants, including women &amp; persons with disabilities, participate in workshops or other capacity development activities</p>	<ul style="list-style-type: none"> <li>• The NDSP review workshop had involved with different civil servants from line ministries at both national and sub national level, DPOs, CSOs, DPs and private sector. The workshop allowed line ministries, DPOs and private sector to share the progress of their programmes which</li> </ul>	<ul style="list-style-type: none"> <li>• Achieved/ on track</li> </ul>	<ul style="list-style-type: none"> <li>• DAC annual report</li> <li>• NDSP review workshop report</li> </ul>

	<b><u>Achieved Indicator Targets</u></b>	<b><u>Reasons for Variance with Planned Target (if any)</u></b>	<b><u>Source of Verification</u></b>
	<p>contributed to NDSP's achievements.</p> <ul style="list-style-type: none"> <li>• The national workshop for the 'Establishment of the Cambodian Intellectual Disability and Autism Network' around 10 NGOs and parents association joined the network.</li> <li>• The involvement with different groups of disability - the world Purple's (Epilepsy) Day presented the strong commitment of government to improve the services for people with epilepsy, and reduce discrimination against people with epilepsy at their community.</li> <li>• Women with disabilities were invited to participate at the consultative meeting process – clarifications of DAC role and responsibility, and disability policies comparing between Cambodia and United of America.</li> <li>• DAC-SG explored an opportunity for persons with autism and their parents to attend the Knowledge Creation Forum on Community-Based Inclusive Development (CBID) in Bangkok.</li> <li>• DAC-SG organized different meetings and events related to disability with involved from different line ministries, DPOs, CSOs and persons with disabilities – international children day, deaf day, persons with disabilities, run marathon day, sensitization meetings on DAC role and responsibility</li> </ul>		

	<b><u>Achieved Indicator Targets</u></b>	<b><u>Reasons for Variance with Planned Target (if any)</u></b>	<b><u>Source of Verification</u></b>
	and NDSP at both national and sub national level.		
<p><b><u>Indicator 1.1.4:</u></b> New Sub-Decrees / Prakas initiated to revise mandates of DAC, PwDF, DWPwD and/or DRA in accordance with functional/ capacity analysis to clarify roles &amp; functions</p>	<ul style="list-style-type: none"> <li>• Role and responsibilities of DAC and Department of Welfare have been reviewed following to the guidance from Minister of MoSVY. It was clearly said that DAC is a coordination body and advisory role for disability sector, while Department is responsible for CBR programme, and initiate some policies and guideline related to disability within their own authority - eg. SHGs guideline, amend the disability law etc.</li> <li>• PRAKAS for establishing the legislative committee which involved from different line ministries and CDPO. The committee aimed to develop/review policies related to disability. Under this committee, few policies few policies/sub decree have been drafted/initiated: <ul style="list-style-type: none"> <li>○ Guiding document for Disability Action Council at both national and sub national, and for the Disability Action Working Group at line ministries.</li> <li>○ Sub decree on financial reward of special Olympic and skill competition for persons with disabilities.</li> <li>○ Inter-ministerial Prakas on public parking space for persons with disabilities.</li> <li>○ Inter-ministerial Prakas on the discount of school fees and stationeries for</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• As the Department of Welfare does not have enough resources – human and financial resources, MoSVY guided DAC to coordinate the legislative committee.</li> <li>• The capacity of DRA office has limited human and financial resources. This means that DAC would use their disability rights unit to monitor the progress of disability rights in line ministries as well as institutions.</li> <li>• It is quite hard for DRA office to monitor the other line ministries or institutions due to limited power/authority – established by their own Ministry’s Prakas. The capacity building of DRA is being planned by UNDP through a project on Access to Justice.</li> </ul>	DAC annual report

	<b><u>Achieved Indicator Targets</u></b>	<b><u>Reasons for Variance with Planned Target (if any)</u></b>	<b><u>Source of Verification</u></b>
	persons with disabilities.		
<b><u>Indicator 1.1.5:</u></b> Extent to which funded activities in DAC-SG work plan achieved	<p>Major activities were done as planned and some activities extended to 2016 work plan for instance the UNCRPD report submission to committee and the key legislative policies will be developed and reviewed.</p> <p>The key achievements were recorded as followed:</p> <ul style="list-style-type: none"> <li>• Produced TV talk show through national television – TVK. Scripts for 5 TV talk show have been developed and footage with specific topics below. <ul style="list-style-type: none"> <li>○ Success of youth with disabilities in GITC 2014</li> <li>○ Speech Therapy development in Cambodia</li> <li>○ Disability prevention</li> <li>○ Participation in Arts of Person with Disability</li> <li>○ Self-employment of PwDs</li> <li>○ Access to public transportation</li> <li>○ Good Practice on NHE</li> </ul> </li> <li>• The Integration of Persons with Disabilities unit developed a clear project plan covering the outcomes to be achieved by the project, the target group, a strategy to achieve the plan and timelines.</li> <li>• Finalised draft UNCRPD report.</li> <li>• Capacity development provided to DAWGs and DAC sub national offices through sensitisation meeting, training and workshop.</li> </ul>	<ul style="list-style-type: none"> <li>• DAC paid more attention to support DAWGs at line ministry levels and DAC sub national offices to sensitize on role and responsibility and NDSP.</li> <li>• DAC expanded their activity to disseminate disability legislative policies through mass media – created video spot.</li> </ul>	<ul style="list-style-type: none"> <li>• DAC annual report</li> <li>• Video spot</li> </ul>

	<b><u>Achieved Indicator Targets</u></b>	<b><u>Reasons for Variance with Planned Target (if any)</u></b>	<b><u>Source of Verification</u></b>
	<ul style="list-style-type: none"> <li>• Conducted consultative meetings with relevant stakeholders to initiate the legislative policies and guideline related to disability.</li> <li>• Organised key events to raise disability awareness throughout the public.</li> <li>• Additional training was organized for DAC-SG staff on methodology of consultations, interventions and access to justice for PwDs, provided by Dr. Stephen Rosenbaum, Professor of Law, and American University of Phnom Penh.</li> </ul>		
<p><b><u>Outcome 2:</u></b> Increased capacity of DAC to coordinate implementation of NDSP</p> <p><b><u>Indicator:</u></b> Annual progress report on implementation of NDSP presented to RGC</p> <p><b><u>Baseline:</u></b> inception report</p> <p><b><u>Planned Target:</u></b> Annual progress report presented to RGC by end of 1<sup>st</sup> quarter of each year starting 2016</p>	<ul style="list-style-type: none"> <li>• National NDSP review workshop was organized by DAC in order to review the progress of NDSP implementation at all level – the workshop ended up with key actions plan with relevant ministries, DPs, DPOs and CSOs to prioritize the strategic objectives to be achieved by 2018.</li> </ul>		<ul style="list-style-type: none"> <li>• NDSP review workshop report</li> </ul>
<b>Output 2.1:</b> Implementation of NDSP is monitored transparently across the whole-of-government			
<p><b><u>Indicator 2.1.1:</u></b> DAC-SG staff trained to efficiently implement M&amp;E framework to monitor NDSP</p>	<ul style="list-style-type: none"> <li>• Will be done in 2016</li> </ul>	<ul style="list-style-type: none"> <li>• Once the NSDP framework has been approved, the M&amp;E training will be delivered to staff and DAC at sub national offices.</li> </ul>	
<p><b><u>Indicator 2.1.2:</u></b> DAWGs monitor &amp; report on NDSP implementation in ministry/ institution</p>	<ul style="list-style-type: none"> <li>• DAWGs had shared the achievements and challenges of implementation NDSP at the NDSP review workshop. The DAWGs also provided an update to DAC-SG through the</li> </ul>	<ul style="list-style-type: none"> <li>• Due to poor reporting format system – the data collected was not accurate and most of line ministries</li> </ul>	

	<b><u>Achieved Indicator Targets</u></b>	<b><u>Reasons for Variance with Planned Target (if any)</u></b>	<b><u>Source of Verification</u></b>
	<p>given reporting format.</p> <ul style="list-style-type: none"> <li>• DAC – SG received support from AVI by provided one international volunteer to support DAC –SG in building capacity of staff in M&amp;E field.</li> <li>• Disability rights unit of DAC – SG is responsible for monitoring the NDSP implementation with guided by from secretary general.</li> <li>• DAC-SG developed a standardized presentation on DAC, DAC-SG-, DAC-MP and DAWG roles and responsibilities to be used for future presented.</li> </ul>	<p>didn't collaborate very well.</p> <ul style="list-style-type: none"> <li>• Disability advisor was supposed to support the M&amp;E of NDSP implementation and reporting, apart from disability advisory role. However DAC-SG decided not recruit him/her due to shortage funding – lost exchange rate and the scope of NDSP is too ambitious.</li> </ul>	
<p><b><u>Indicator 2.1.3:</u></b> Regular NDSP review meetings held with participation of line Ministries, DPOs and civil society</p>	<ul style="list-style-type: none"> <li>• 14 DAWGs established at line ministries and DAC provided sessions to those ministries regarding the role and responsibilities of DAWGs as well as disability inclusion training – 10 lines ministries received sessions. In addition, an initial meeting took place with the Ministry of Public Works and Transport to discuss the development of PRAKAS on PwDs driver's license, types of vehicles and disabled parking lots.</li> <li>• About 20 DAC sub national offices received sensitization meetings on role and responsibility of DAC and NDSP.</li> <li>• A review workshop on NDSP was done at national level with involved from line ministries, DAC sub national, DPOs, DPs, CSOs, private sector and persons with disabilities.</li> </ul>	<ul style="list-style-type: none"> <li>• On track in terms of the first phase to implement the NDSP.</li> </ul>	<ul style="list-style-type: none"> <li>• NDSP review workshop</li> <li>• PRAKAS for establishing DAWGs</li> </ul>

	<b><u>Achieved Indicator Targets</u></b>	<b><u>Reasons for Variance with Planned Target (if any)</u></b>	<b><u>Source of Verification</u></b>
<b>Output 2.2:</b> In-depth analysis of existing disability-related data sources performed and recommendations for improvement of comprehensive disability-related data collection, analysis and utilisation provided			
<b><u>Indicator 2.2.1:</u></b> Extent to which recommendations for improvement of disability data adopted by relevant ministries/ institutions	<ul style="list-style-type: none"> <li>• Training on comparable tools on data collection provided by UNDP and WHO to project partners those including DAC, PWDF, MoH, MoP, MoSVY and CDPO. As a result, DAC committed to work together with NIS/MoP regarding the use of WG tool into the existing questionnaires.</li> <li>• The Cambodia Demographics Health Survey (CDHS) has included WG questionnaires into the survey process. As result, about 9.5% of total population have disability.</li> <li>• DAC and CDPO were invited to be part of ID poor working group which resulted from the training.</li> <li>• Through the legislation committee of DAC, they committed to review the inter-ministerial Prakas on Type and Level of Disability Classification.</li> </ul>	<ul style="list-style-type: none"> <li>• On track</li> </ul>	<ul style="list-style-type: none"> <li>• Training report</li> <li>• Joint advocacy meeting's minute</li> <li>• CDHS report</li> </ul>
<b>Output 2.3:</b> Reporting under CRPD is completed on time following an inclusive consultative process			
<b><u>Indicator 2.3.1:</u></b> Ministries /institutions and other stakeholders, including persons with disabilities and women, participate in consultative workshop to finalise CRPD report	<ul style="list-style-type: none"> <li>• Consultative workshop was organized by DAC with technical support from OHCHR office to share the second draft of UNCRPD report with involved from different line ministries at national and sub national level, DPOs and CSOs. As result, about 80% of the second draft report were satisfied by participants.</li> </ul>	<ul style="list-style-type: none"> <li>• Achieved as planned</li> </ul>	<ul style="list-style-type: none"> <li>• Consultative workshop report</li> </ul>
<b><u>Indicator 2.3.2:</u></b> Cambodian CRPD report submitted on time	<ul style="list-style-type: none"> <li>• Will be submitted by early 2016.</li> </ul>	<ul style="list-style-type: none"> <li>• Delayed due to limited resources to collect data and</li> </ul>
