Closure Stage Quality Assurance Report

Form Status: Approved		
Overall Rating: Satisfactory		
Decision:		
Portfolio/Project Number:	00098956	
Portfolio/Project Title:	Institutional Strengthening of the Min.Environment,Ph.II	
Portfolio/Project Date:	2017-01-02 / 2021-12-31	

Strategic

Quality Rating: Exemplary

1. Did the project pro-actively identified changes to the external environment and incorporated them into the project strategy?

- 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

Although this project was approved by virtue of CoM decisions #7 of 14 July 2016 and #1 of 26 October 2 017, transfer of funds allocated to the project did not happen. However, by utilizing the resource from a pr evious project, the project continued its support to th e Ministry of Environment (MOE) and taken actions proactively to seize the emerging opportunities. Parti cularly, extensive efforts on resource mobilization ha ve been done to enable the MOE to implement their plans.

2. Was the project aligned with the thematic focus of the Strategic Plan?

- 3: The project responded to at least one of the development settings as specified in the Strategic Plan (SP) and adopted at least one Signature Solution .The project's RRF included all the relevant SP output indicators. (all must be true)
- 2: The project responded to at least one of the developments settings1 as specified in the Strategic Plan. The project's RRF included at least one SP output indicator, if relevant. (both must be true)
- 1: While the project may have responded to a partner's identified need, this need falls outside of the UNDP Strategic Plan. Also select this option if none of the relevant SP indicators are included in the RRF.

Evidence:

Yes. The project responded to the following area of development work and addresses the emerging are as:

- Sustainable development pathways

- Sustainable production technologies, natural resou rces management, extractive industries, urbanizatio n

	/ere the project's targeted groups systematically ident riminated and marginalized, to ensure the project rem	
۲	beneficiaries, with a priority focus on the discriminate system. Representatives from the targeted groups w	d over the project duration from a representative sample of ed and marginalized, as part of the project's monitoring rere active members of the project's governance d there is credible evidence that their feedback informs
\bigcirc	and marginalized. Beneficiary feedback, which may	and monitoring, with a priority focus on the discriminated be anecdotal, was collected regularly to ensure the project I to inform project decision making. (all must be true to
0	1: Some beneficiary feedback may have been collect making. This option should also be selected if no be Not Applicable	ted, but this information did not inform project decision neficiary feedback was collected
Ev	idence:	
Y	es. The project aimed to strengthen the capacity of	
	linistry of Environment (MoE) and the MoE is the n	
	tional implementing partner on behalf of the Gover	
	ment of Lebanon. Thus, the project will be manage in accordance with standard UNDP procedures as	
	Support to National Implementation (Support to NI	

M) modality. Their engagement was ensured accordingly as described in the ProDoc and L-PAC.

Moreover, the project also ensures the involvement of civil society (notably the displaced, poor, women a nd vulnerable) through the orientation plans whose f ormulation will seek the participation of civil society and NGOs.

4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?

- 3: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
- 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team.
 There is little or no evidence that this informed project decision making.

Evidence:

Yes. The project was carefully designed by taking int o the consideration the knowledge and lessoned lea rned from the corresponding previous project ISMO E I and its evaluation.

5. Was the project sufficiently at scale, or is there potential to scale up in the future, to meaningfully contribute to development change?

- 3: There was credible evidence that the project reached sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change.
- 2: While the project was not considered at scale, there are explicit plans in place to scale up the project in the future (e.g. by extending its coverage or using project results to advocate for policy change).
- 1: The project was not at scale, and there are no plans to scale up the project in the future.

Evi	dence:		
	v creating enabling environment, such as strengt		
	ed enforcement of laws and regulations, the proje Il ultimately contribute to sustainable development		
	the national policy-level. This policy-level change		
in	turn, benefits all people in Lebanon.

6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.

- 3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)
- 2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)
- 1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

The key output of the project was to mainstream the SDGs in local development planning and programmi ng with a focus on pressures affecting the poor, wo men and/or vulnerable people while adopting the tw o threads of the National Sustainable Development Strategy, i.e., Climate Change scenarios, and Sustai nable Consumption and Production good practice. T herefore, the ratification of the NSDS which is in syn c with SDGs will improve gender equality and wome n's empowerment (NSDS Chapters 2.2 and SDGoal 5) in the orientation plans which are meant to pilot th e implementation of the NSDS and SDGs in 4 to 8 g overnorates, clrearly addressing gener inequities an d empowerment of women.

7. Were social and environmental impacts and risks successfully managed and monitored?

- Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- 2: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

Evi	dence:		
na air	ne management of environmental risks at the national level was the raisond'etre of this project and a nin area of intervention in terms of policy advice to the Office of the Minister of Environment.	n

Management & Monitoring

Quality Rating: Exemplary

9. Was the project's M&E Plan adequately implemented?

3: The project had a comprehensive and costed M&E plan. Baselines, targets and milestones were fully populated. Progress data against indicators in the project's RRF was reported regularly using credible data sources and collected according to the frequency stated in the Plan, including sex disaggregated data as relevant. Any evaluations conducted, if relevant, fully meet decentralized evaluation standards, including gender UNEG standards. Lessons learned, included during evaluations and/or After-Action Reviews, were used to take corrective actions when necessary. (all must be true)

2: The project costed M&E Plan, and most baselines and targets were populated. Progress data against indicators in the project's RRF was collected on a regular basis, although there was may be some slippage in following the frequency stated in the Plan and data sources was not always reliable. Any evaluations conducted, if relevant, met most decentralized evaluation standards. Lessons learned were captured but were used to take corrective actions. (all must be true)

1: The project had M&E Plan, but costs were not clearly planned and budgeted for, or were unrealistic. Progress data was not regularly collected against the indicators in the project's RRF. Evaluations did not meet decentralized evaluation standards. Lessons learned were rarely captured and used. Select this option also if the project did not have an M&E plan.

Evidence:

Yes M&E was implemented according to the plan.

10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?

- 3: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- 2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)
- 1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

The project governance mechanism was operating well in that several ad-hoc board meetings were hel d during the year to ensure progress was on track a nd risks and opportunities are discussed and manag ed well. The project board also met officially once thi s year and the project results were presented as evi dence and included the results of the evaluation that was undertaken.

11. Were risks to the project adequately monitored and managed?

- 3: The project monitored risks every quarter and consulted with the key stakeholders, security advisors, to identify continuing and emerging risks to assess if the main assumptions remained valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk and were updated to reflect the latest risk assessment. (all must be true)
- 2: The project monitored risks every year, as evidenced by an updated risk log. Some updates were made to management plans and mitigation measures.
- 1: The risk log was not updated as required. There was may be some evidence that the project monitored risks that may affected the project's achievement of results, but there is no explicit evidence that management actions were taken to mitigate risks.

Evidence:

The project were are continuously monitored by the project team and discussed with the minister and U NDP management in order to adequately resolve. T he risks are uploaded on ATLAS on a quarterly basi s and include management responses.

	Adequate resources were mobilized st expected results in the project's re	to achieve intended results. If not, man esults framework.	agement decisions were taken to
	Yes		

To the extent possible, resources were mobilized to achieve the intended results as mentioned in the pro ject document however more results could be achiev ed if additional funding was mobilized from the natio nal government. Unfortunately, given the current poli tical and security situation facing the country, the bu dgetary allocation for environmental governance and policy remains limited and this is reflected in the project results framework. Refer to project document RRF attached in previous section.

. V	/ere proiect inputs procured and de	livered on time to efficiently contribute to	o results?
3. Were project inputs procured and delivered on time to efficiently contribute to results?			

3: The project had a procurement plan and kept it updated. The project quarterly reviewed operational
bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management
actions. (all must be true)

- 2: The project had updated procurement plan. The project annually reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 1: The project did not have an updated procurement plan. The project team may or may not have reviewed operational bottlenecks to procuring inputs regularly, however management actions were not taken to address them.

The project prepared all the needed plans in a timely manner, including the procurement and recruitment plan which includes detailed financial resources req uired. This was then reflected in the project budget which is modified according to needs during the cour se of the financial year.

No	No documents available.		

14. Was there regular monitoring and recording of cost efficiencies, taking into account the expected quality of results?

- 3: There is evidence that the project regularly reviewed costs against relevant comparators (e.g., other projects or country offices) or industry benchmarks to ensure the project maximized results delivered with given resources. The project actively coordinated with other relevant ongoing projects and initiatives (UNDP or other) to ensure complementarity and sought efficiencies wherever possible (e.g. joint activities.) (both must be true)
- 2: The project monitored its own costs and gave anecdotal examples of cost efficiencies (e.g., spending less to get the same result,) but there was no systematic analysis of costs and no link to the expected quality of results delivered. The project coordinated activities with other projects to achieve cost efficiency gains.
- 1: There is little or no evidence that the project monitored its own costs and considered ways to save money beyond following standard procurement rules.

The project undertook regular monitoring of its activit ies and compares the cost effectiveness of its outso urced works in comparison to other projects under i mplementation in the sector. This was done systema				
tically and for all studies and/or works contracts that are tendered out.

т				

Closure Print

- 3: Quarterly progress data informed regular reviews of the project work plan to ensure that the activities implemented were most likely to achieve the desired results. There is evidence that data and lessons learned (including from evaluations /or After-Action Reviews) were used to inform course corrections, as needed. Any necessary budget revisions were made. (both must be true)
- 2: There was at least one review of the work plan per year with a view to assessing if project activities were on track to achieving the desired development results (i.e., outputs.) There may or may not be evidence that data or lessons learned were used to inform the review(s). Any necessary budget revisions have been made.
- 1: While the project team may have reviewed the work plan at least once over the past year to ensure outputs were delivered on time, no link was made to the delivery of desired development results. Select this option also if no review of the work plan by management took place.

Evidence:

The project was regularly monitored through the qua rterly work plan in addition to bimonthly meetings un dertaken with the programme management team. T his was done to ensure that all activities remain on tr ack and any modifications to the work plan or the bu dget were undertaken immediately and throughout t he year as a response to the changing situation.

17. Were the targeted groups systematically identified and engaged, prioritizing the marginalized and excluded, to ensure results were achieved as expected?

- 3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. There is clear evidence that the targeted groups were reached as intended. The project engaged regularly with targeted groups over the past year to assess whether they benefited as expected and adjustments were made if necessary, to refine targeting. (all must be true)
- 2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work.
 Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true)
- 1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project area of work. There is some engagement with beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year.
- Not Applicable

The project worked closely with several other ministr ies and national committees. Accordingly, the work p lan and areas of intervention were designed and so metimes redesigned during the course of the year in a manner to meet their respective capacity needs. T he project also determined development opportunitie s depending on the decisions taken by the Council o f Ministers or Parliament that sometimes effect natur al resource management or have direct impacts on t he state of the environment in the country. For exam ple, with the ongoing Syrian refugee crisis, the proje ct assessed the needs of the local municipalities and regional institutions in terms of environmental mana gement and accordingly identified that guidance not es and policy recommendations would serve the pur pose of raising awareness on the environment that was found lacking in the various areas.

19. Were there regular monitoring of changes in capacities and performance of institutions and systems relevant to the project, as needed, and were the implementation arrangements⁸ adjusted according to changes in partner capacities?

- 3: Changes in capacities and performance of national institutions and systems were assessed/monitored using clear indicators, rigorous methods of data collection and credible data sources including relevant HACT assurance activities. Implementation arrangements were formally reviewed and adjusted, if needed, in agreement with partners according to changes in partner capacities. (all must be true)
- 2: Aspects of changes in capacities and performance of relevant national institutions and systems were monitored by the project using indicators and reasonably credible data sources including relevant HACT assurance activities. Some adjustment was made to implementation arrangements if needed to reflect changes in partner capacities. (all must be true)
- 1: Some aspects of changes in capacities and performance of relevant national institutions and systems may have been monitored by the project, however changes to implementation arrangements have not been considered. Also select this option if changes in capacities and performance of relevant national institutions and systems have not been monitored by the project.

Not Applicable

The country office in Lebanon did not use the HACT modality based on an evaluation undertaken earlier. The support to NIM modality is being used in line wit h the approval received from headquarters and attac hed herewith. Aspects of changes in the capacities a nd performance of relevant institutions and systems have

been monitored during the past year for this project and implementation arrangements remain valid and still the same.

20. Were the transition and phase-out arrangements were reviewed and adjusted according to progress (including financial commitment and capacity).

- 3: The project's governance mechanism regularly reviewed the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented as planned by the end of the project, taking into account any adjustments made during implementation. (both must be true)
- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

ISMOE Phase II called for scaling-up orientation pla ns to 8 and depollution plans to all Lebanon watersh eds that will be operationalised according to the NS DS breadth which will in turn maintain sustainable e nvironmental services. In fact, there are 3 key issues that will be addressed for scaling up these program mes: (i) fine-scale variation in social, economic and ecological context across governorates and watersh eds will be determined; (ii) appropriate service delive ry mechanisms, markets, and institutional contexts, as well as technologies will be tailor made to fit each governorate; and (iii) academia and research centre s will be invited to appropriate research design, withi n the scaling process, that enables co-learning amo ngst research, development, and public and private sector actors. This will require a new paradigm that will learn from the NPMPLT downscaling successes and failures at the local level and builds on previous integrated systems approaches that proved success ful in Lebanon.
