Closure Stage Quality Assurance Report

Form Status: Approved			
Overall Rating:	Highly Satisfactory		
Decision:			
Portfolio/Project Number:	00099043		
Portfolio/Project Title:	Fiscal Policy Advisory & Reform		
Portfolio/Project Date:	2017-02-01 / 2021-12-31		

Strategic

Quality Rating: Satisfactory

1. Did the project pro-actively identified changes to the external environment and incorporated them into the project strategy?

- 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

Evidence:

The project throughout the course of implementation updated its workplan to be aligned with arising natio nal priorities.

 No documents available. Was the project aligned with the thematic focus of the Strategic Plan? 3: The project responded to at least one of the development settings as specified in the Strategic Pla adopted at least one Signature Solution .The project's RRF included all the relevant SP output indica must be true) 2: The project responded to at least one of the developments settings1 as specified in the Strategic I project's RRF included at least one SP output indicator, if relevant. (both must be true) 1: While the project may have responded to a partner's identified need, this need falls outside of the Strategic Plan. Also select this option if none of the relevant SP indicators are included in the RRF. Evidence: The project delivered on the strategic plan systemati cally, focusing on: Development Setting 2: Accelerating structural trans formations for sustainable development Signature solution 2: Strengthen effective, inclusive and accountable governance SP Outcome 2: Citizen expectations for voice, devel opment, the rule of law and accountability are met b y stronger systems of democratic governance. 3. Were the project's targeted groups systematically identified and engaged, with a priority focus on the
discriminated and marginalized, to ensure the project remained relevant for them?

Quality Rating: Exemplary

Relevant

3: Systematic and structured feedback was collected over the project duration from a representative sample of
beneficiaries, with a priority focus on the discriminated and marginalized, as part of the project's monitoring
system. Representatives from the targeted groups were active members of the project's governance
mechanism (i.e., the project board or equivalent) and there is credible evidence that their feedback informs
project decision making. (all must be true)

- 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the discriminated and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
- 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected
- Not Applicable

Evidence:

All stakeholders inside and outside the MOF were pr operly engaged

4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?

- S: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
- 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team.
 There is little or no evidence that this informed project decision making.

	roject has collected lots of learnings along the y and gradually transferred to the administration a counterparts were available.

#	File Name	Modified By	Modified On		
No	documents available.				
 3: There was credible evidence that the project reached sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change. 2: While the project was not considered at scale, there are explicit plans in place to scale up the project in the future (e.g. by extending its coverage or using project results to advocate for policy change). 1: The project was not at scale, and there are no plans to scale up the project in the future.

Quality Rating: Satisfactory

6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.

- 3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)
- 2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)
- 1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

Evidence:

The project appointed a Gender Focal Point to follo w-up on all files and make sure a gender perspectiv e is included. Specific studies were conducted such as on income inequalities.

A Gender Screening/Analysis was conducted (uploa ded)

7. Were social and environmental impacts and risks successfully managed and monitored?

- 3: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- 2: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

The project did not entail any social or environmenta I risk

Management & Monitoring

Quality Rating: Highly Satisfactory

9. Was the project's M&E Plan adequately implemented?

Closure Print

2: The project costed M&E Plan, and most baselines and targets were populated. Progress data against indicators in the project's RRF was collected on a regular basis, although there was may be some slippage in following the frequency stated in the Plan and data sources was not always reliable. Any evaluations conducted, if relevant, met most decentralized evaluation standards. Lessons learned were captured but were used to take corrective actions. (all must be true)

1: The project had M&E Plan, but costs were not clearly planned and budgeted for, or were unrealistic. Progress data was not regularly collected against the indicators in the project's RRF. Evaluations did not meet decentralized evaluation standards. Lessons learned were rarely captured and used. Select this option also if the project did not have an M&E plan.

Evidence:

The project reported as per the set framework annu ally and quarterly, updating M&E framework if neede d

10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?

3: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)

2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)

1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

12. Adequate resources were mobilized to achieve intended results. If not, management decisions were taken to adjust expected results in the project's results framework.

Yes
No

Evidence:

The project benefited from adequate resources. However, the project was closed earlier than planne d, with no perspective of renewal in its current modal ity, due to the government's notice not to fulfill its fin ancial commitment, due to the currency crisis.

13. Were project inputs procured and delivered on time to efficiently contribute to results?

- 3: The project had a procurement plan and kept it updated. The project quarterly reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 2: The project had updated procurement plan. The project annually reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)

1: The project did not have an updated procurement plan. The project team may or may not have reviewed operational bottlenecks to procuring inputs regularly, however management actions were not taken to address them.

Evidence:

The procurement plan was developed annually and updated quarterly if needed. However, procurement was not a main element of the project's scope.

\bigcirc	3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on
	their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area
	of work. There is clear evidence that the targeted groups were reached as intended. The project engaged
	regularly with targeted groups over the past year to assess whether they benefited as expected and
	adjustments were made if necessary, to refine targeting. (all must be true)

2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work.
 Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true)

1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project area of work. There is some engagement with beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year.

\bigcirc	3: The project's governance mechanism regularly reviewed the project's sustainability plan, including
	arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements
	set out by the plan. The plan was implemented as planned by the end of the project, taking into account any
	adjustments made during implementation. (both must be true)

- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

Evidence:

Throughout the years, regular handing over and tran sfer of skills and knowledge to the administration wa s applied.

However, given the governmental decision not to fulf ill financial commitments, the project was terminated earlier and handover was provided to the governme nt and the CO.
