Brief Description

Brief Description: One of the missions of the Ministry of Culture is to place the area of culture in the context of sustainable development whilst promoting its resources as areas suitable for investment.

The aim of the project is to strengthen the system of managing cultural heritage in Montenegro. This will be achieved through the establishment of an Information Management System for documents and will be implemented as a new information system in the Directorate for the Protection of Cultural Heritage (UZKD) as well as improving legislation in various normative activities carried out by the Ministry of Culture. It will also result in the reconstruction of cultural heritage buildings through renovation and conservation work, supported by UNDP.

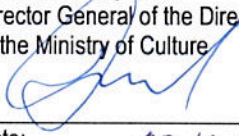

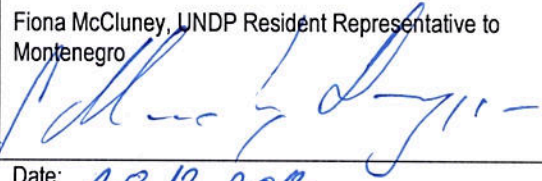

In conclusion, the system should facilitate the transparency of necessary data as well as achieving a better and more efficient system for managing cultural heritage in Montenegro.

Expected Outcome(s)/Indicator (s):

- (1) To support the establishment of an information system that is capable of recording and supporting the document management of the entire system within the competence of the Directorate for the Protection of Cultural Property.
- (2) To enhance the legislative framework in the management of cultural heritage
- (3) To reconstruct and revitalise cultural heritage by preparing technical documentation and by carrying out construction work
- (4) To support cultural tourism and the economic valorisation of cultural heritage through promotional activities
