

COUNTRY PROGRAMME ACTION PLAN 2016-2020 Empowered lives Resilient nations.

MID-YEAR PROGRESS REPORT 2018

PROJECT PROFILE

PROJECT TITLE: HCFC Phase-out
Management Plan (HPMP) Stage 2
AWARD ID: 00098730
PROJECT ID: 00101950
PROJECT PERIOD:
July 2017 – Dec 2021
REVISED PERIOD (if any):
PROJECT BUDGET:
USD 6,138,063
USD 300,000 (in-kind)
REVISED BUDGET (if any):

2018 BUDGET (AWP): USD 1,366,250

IMPLEMENTING PARTNER:
Department of Environment (DOE)

NATIONAL PROJECT DIRECTOR:
Mashitah Darus, Director, Air Division,

NATIONAL STEERING COMITTEE CHAIR: Dato Sri Azizan b Ahmad Secretary-General, Ministry of Natural Resources and the Environment NSC MEETING(S) HELD:

[22 Mei 2018]

UNDP MALAYSIA CPAP OUTCOME:

- ☐ Inclusive Growth & Development

11TH MALAYSIA PLAN STRATEGIC THRUSTS:

- ☐ Enhancing inclusiveness towards an equitable society
- ☐ Improving wellbeing for all
- ☐ Accelerating human capital development for an advanced nation
- □ Pursuing green growth for sustainability and resilience
- ☐ Strengthening infrastructure to support economic expansion
- ☐ Re-engineering economic growth for greater prosperity

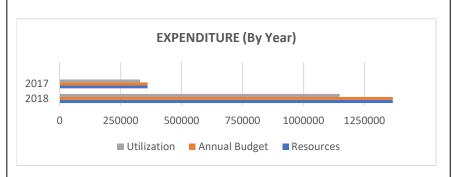

PROJECT DESCRIPTION (500 words max):

Through a combination of interventions towards reducing Malaysia's dependence and usage on Hydrochlorofluorocarbon gases, this project is to assist Malaysia to meet the compliance of the 2013 and 2015 control targets in the Montreal Protocol.

PROJECT IMPLEMENTATION OVERVIEW

EXPENDITURE:

YEAR	BUDGET	UTILIZATION	RATIO (%)
2017	\$360,500	\$329,584	91
2018	\$1,366,250	\$1,148,194	84
CUMULATIVE	\$6,438,063	\$1,477,778	23

ANNEX

Please list additional documentation included in this report (including NSC meeting minutes; PIR report summary; additional project reporting)

1. 47th National Steering Committee Meeting

MID-YEAR REPORT NARRATIVE

Describe the project's achievements of outputs in 2018, with brief descriptions of progress of planned activity results for the year. Please highlight any contributions to gender made if any.

Describe the issues and challenges faced, and the project management response.

Component/Outcome 1: Net sustainable reductions of minimum 146.24 ODP tonnes in the		
national HCFC consumption by 1 st January 2022, contributing to Malaysia's compliance with	Status	
the post 2015 control targets for HCFCs.		
Output 1: Conversion of PU Foam Sector	\square Achieved	
	⊠ On track	
a. 9 Foam enterprises above 20 MT have completed First and 2 nd milestone	☐ Off track	
 b. 1 enterprise has completed the conversion using cyclopentane as blowing agent. Tonnage phased-out: 35.12 ODP 		
	Output Target:	
Issues & Challenges:	2018 AWP	
All enterprises expected to complete 3 rd milestone by September but 4 enterprises requested		
extension until October/November due to challenges in planning for location and space for new technology installation. Most of the enterprises are also small and medium industries		
which have limitation in the capital cost of conversion and knowledge on new alternatives and		
safety handling.		
Action Taken by implementing Partner:		
1. Regular consultations and encourage system providers to assist the enterprises on the		
technology conversion. Allow the enterprises to choose the machines affordable by them		
and give ample time and some flexibility on the milestones to complete the project.		
2. To conduct Seminar on sharing of experience by the enterprises whom has participated in		
the Study Tour in Foam Sector in China. 3. To conduct Safety Training and Seminar on Flammability of Hydrocarbon (HC) for foam		
sector with the cooperation of international experts.		
Additional Support Requested from UNDP/ EPU: Engage International experts to		
provide technical assistance to the enterprises		
UNDP Management Response:		
International expert appointed and will do consultation workshop to all foam enterprises in		
September 2018		

COUNTRY PROGRAMME ACTION PLAN 2016-2020 Empowered lives. Resillent nations.

Output 2: Technical Assistance 1. e-CSTP (Certification of Service Technician Program) produced 1169 certified technicians. 74 training sessions were conducted by 51 ATC 2. Procurement of tools and equipment for two Centres of Excellence (COE) - UnikL Bangi and ILP Kepala Batas 3. Capacity Building for the Master Trainers from appointed COEs - Training on Flammable Refrigerant in GiZ, Germany Issues & Challenges: Flammability of new refrigerant and capability of technicians to handle it are the most concerned issues in RAC servicing sector. Besides reclamation and recycling of refrigerants needs to be encouraged to reduce imports of HCFC Action Taken by implementing Partner: Organize seminar and training to enhance skill and awareness of technicians and master trainers. Provide equipment and tools to the training centers (ATC) and develop 2 Centre of Excellence (COE) in UnikL for refrigerants needs to be encouraged to reduce imports of HCFC Additional Support Requested from UNDP/ EPU: Technical support and assistance in procurement of tools and equipment UNDP Management Response: UNDP procured tools and equipment for selected ATCs and COEs Output 3: Project Management and Co-ordination 1. PMU was set up with 2 project assistants appointed and a consultant already on-board based at NOU 2. 12 monitoring visits conducted at project sites Issues & Challenges: No significant issue Action Taken by implementing Partner: Regular monitoring and site visits Additional Support Requested from UNDP/ EPU: N/A UNDP Management Response No further action required			
1. e-CSTP (Certification of Service Technician Program) produced 1169 certified technicians. 74 training sessions were conducted by 51 ATC 2.
