Annual Progress Report – Part I

I. A Introduction to Programme Components

The objective of PPPUE is to increase the access of the urban citizens to basic services, and therewith, to contribute to the creation of a healthy environment and the improvement of living conditions in the urban and peri-urban areas, by promotion of partnerships between public and private sectors for the sustainable provision of urban services. The project's focuses are waste management (solid/liquid), water supply, urban sanitation (including public toilets), renewable energy and urban transportation management.

The project strives to increase the immediate coverage and quality of basic urban services accessible to the urban poor while further stimulating and strengthening participatory approaches to services delivery and hence achieve municipal good governance. The project strategy is to create an enabling environment and systems for increased community and private sector participation in basic urban services delivery; build the capacity of municipalities, civil society, private sector and communities to actively participate in basic services delivery through the PPP modality; and directly support the implementation of basic services projects.

As the project is implemented by the Ministry of Local Development (MLD), that Ministry is PPPUE's primary partner. Central stakeholders, the Federation of Nepalese Chambers of Commerce and Industry (FNCCI) and the Municipal Association of Nepal (MuAN), have been very active in spearheading many PPPUE interventions primarily in non-project areas to increase project coverage. PPPUE also accords high priority to human resources development (HRD) in PPP and has partnered with academic institutions in furthering this goal. This year the project has worked together with UN-Habitat Water for Asian Cities for more socially inclusive water services.

I. B - Project Contribution to the UNDP Outcomes - Summary

Practice Area: Practice 2: Fostering democratic governance
Service Line: SL 2.6 Decentralization, Local Governance and Urban/Rural Development
Intended Outcome: NPL Outcome 2: Effective basic service delivery enhanced through collaborative governance at district, village, municipality and community level

Outcome Baseline: Ineffective basic service delivery mechanism in the absence of elected local government and on-going insurgency

Outcome Indicator: System of public hearing and social audit adopted and institutionalized by the local government, participation of civil society and media ensuring transparency and accountability of local government. Framework for collaborative governance developed.

2007 Annual Target: System of public hearing and social audit institutionalized in 25 DDCs (20% women participation), 8 municipalities and 200 VDCs (40% women participation)

Key Project Achievements contributing to the Annual Target and/or Intended Country Programme Outcome

1. Increasing drinking water outreach to poor un-served areas
 - Supply of water in 20 litre jars to poor households in Dhalko, Kathmandu (jointly with NWSC, UN-Habitat and UEMS)
 - Support to two water supply schemes in Hetauda with community management component
2. Urban sanitation
 - Provision of communal mobile toilets for disadvantaged (butcher) community in Dhulikhel run by Khadgi Samaj and in the bazaar area run by CCI.
 - Provision of communal mobile toilets at two locations in the bazaar area of Bharatpur.
 - Hygienic slaughtering and organized meat selling at co-operative operated slaughter shed in Mechinagar
3. Waste management at community/ local area level (as opposed to city-wide management)
 - Composting of vegetable/ fruit waste of KFVM by private operator Kalpabriksha (2 tons/day approx.)
 - Composting of household waste in Ward No. 1 of Biratnagar Sub-municipal Corporation
 - Bio-gas production from waste in collaboration with UN-Habitat and Institute of Engineering at KFVM

KFVM - Kalimati Fruit and Vegetable Market

NWSC - Nepal Water Supply Corporation

UEMS - Urban Environment Management Society

I. C. Drivers of development effectiveness

- Developing national capacities

Conduct analysis and assessments

The National Judicial Academy conducted an analysis of all court cases (decided) relating to commercial contract issues in five urban areas of Nepal (eight district courts and five appellate courts) from 1996/97 till July 2007. Their analysis found that most of the conflicts in the examined cases related to non-compliance of conditions of contract - non-compliance could be due to changed conditions rendering compliance difficult or a third party's complaint over the contract.

PPP working guidelines in partner municipalities

Development of PPP working guidelines for all partner municipalities. Partner Municipalities have discussed the draft working guideline amongst various departments and sections and forwarded it for the approval of the municipal board. The representatives of political parties were also invited in the discussion to get their commitment. This is a further step in institutionalizing the PPP process within municipalities which is one of the important goals of the project.

Preparation of PPP Action Plans

Partner municipality Executive Officers received training in preparing PPP Action Plans

Delivering services to the poor

Kalimati Fruit and Vegetable Market Committee (Ministry of Agriculture) has been capacitated to manage wastes in the market area thus creating a clean environment for vegetable and fruit vendors as well as consumers visiting the market.

Water services made available to two communities in Hetauda Municipality (52 residents of Bishwakarma community at Bhairab-danda (Ward No. 1) and 310 residents in a squatter settlement at Saraswati (Ward No. 11).

Dhulikhel Municipality provides toilet services to poor residents belonging to Khadgi caste.

Involvement of national stakeholders

The Municipal Association of Nepal is hosting an International Training and Workshop on Management/Financing of Urban Infrastructure and Service: ICT and Transport System through Public Private Partnership in Kathmandu, Nepal. The workshop is being jointly organized by CITYNET, Kathmandu Metropolitan City, Seoul National University, PPPUE and MuAN in the second week of February 2008.

12 municipalities were trained in PPP project identification, analysis, implementation and monitoring and evaluation at UDTCL, Pokhara.

- Enhancing national ownership

Ownership by central bodies

The latest revision of the Local Self-Governance Regulations 2064 (2007) has taken PPP as one of the procurement and internal fund collection modality of the local bodies of Nepal as per the regulation number 157.

The three year interim plan of Nepal has included PPP in various sectors: Health, Local Development, Agriculture and others.

National PPP Coordination Committee

The National PPP Coordination Committee is in operation now and is established within MLD with representatives from NPC, MPPW, MOF, MLD, MuAN, ADDCN, NABIN, and FNCCI. It has operational guidelines prepared with support from PPPUE for smooth running.

Ownership by national academic/ training institutions

The National Judicial Academy (NJA) – an autonomous statutory body established to address the training and research needs of judges, attorneys and private law practitioners – prepared a report on PPP cases filed in the courts of five urban areas of Nepal. PPP is also now part of the standard course content of courses provided by NJA to various sectors within the judiciary.

In 2007, the NJA also conducted a Training of Trainers (TOT) on the curriculum it developed in the previous year. The PPP training modules in the curriculum form the main structure of the TOT. Following the TOT, two training programmes were organized for judges and other legal practitioners from various courts of Nepal.

The Urban Development Training Centre (UDTC) in Pokhara is under the Local Development Training Academy and runs training packages for local government personnel. PPP related learning is also now part of standard courses targeted to various local government personnel. In 2007, the UDTA prepared a training manual based on the PPP Toolkit. The training manual is now used to run trainings in PPP. UDTA has conducted two 5-day training programmes for representatives of municipalities, CCIs, NGOs and civil society organisations.

The Institute of Engineering, Lalitpur, conducted a three-month long intensive course in PPP. The course included classroom training as well as field work. The trainees produced individual or group project reports. IOE also continues to offer the PPP optional course in M.Sc. Urban Planning as in previous years.

- Advocating for and fostering an enabling policy environment

Supporting capacity of non-government actors

As part of PPPUE's long-term policy of popularizing and enhancing PPP knowledge and subsequently developing human resources by partnering with national academic institutions – LDTA, Institute of Engineering (IoE) and NJA, the following were completed or conducted in 2007:

- Urban Development Training Centre (under LDTA) – workshop on PPP for urban poverty reduction, preparation of training manual for PPP courses, conduction of trainings for personnel in various local bodies.
- IoE – 3-month long intensive course on PPP.
- NJA – with PPPUE support, NJA has achieved the following:
 1. Prepared a report on PPP-related cases in Nepalese courts (in district and appellate courts of five major urban areas)
 2. Conducted TOT and training programmes for judges, government attorneys, court officers and private law practitioners.

Independent Business News (producer of business world related current affairs programmes) aired information documentaries on PPPUE activities of public concern.

22 participants from commercial and development banks, finance and leasing companies were trained in infrastructure financing techniques and strategies by an international expert from the Institute of Public-Private Partnerships (IP3), Washington D.C.

- **Seeking South-South Solutions**

The NPM of PPPUE was a resource person at a regional inception workshop on "Joint UNDP-UNESCAP Initiative on Capacity Development of Local Governments in Asia : Delivering Basic Services to the Poor through PPP" organized by the UNDP Regional Office Bangkok and UNESCAP. Participants from India, Bhutan, Indonesia and the Philippines were present at the interaction meeting.

PPPUE invited a Sri Lankan expert to conduct a training seminar on community contracting and targeted procurement for municipality Executive Officers, planning department heads and other municipality procurement staff.

PPPUE also arranged two best practice visits - the first was to best practices in waste management, drinking water and energy in the Philippines and Malaysia for policy level personnel in various government ministries. The second visit was organized for private operators of PPP projects in various Nepalese municipalities. They visited best practices in waste management, drinking water and municipal markets in Thailand.

PPPUE also provided policy documents and other resource materials to Xavier Labour Relations Institute, Jamshedpur, India.

- **Forging partnerships for results**

- **Partnership with UN-Habitat**

PPPUE and UN-Habitat (Water for Asian Cities) have agreed to work together in some projects:

- The joint project of Nepal Water Supply Corporation (NWSC), Urban Environment Management Society (UEMS) and PPPUE for a bottled water project in Kathmandu to poor and scheduled caste people of Dhalko of Kathmandu under PPP arrangement as an effort to distribute water to un-served (or underserved) populations in water jars to poor households in Dhalko (central Kathmandu) is in operation now. WAC/UN-Habitat is also co-funding this project.
- GIS utility service map for Pokhara - PPPUE is supporting updating of utility data, UN-Habitat is funding updating of water lines and other related data.
- Japan International Co-operation Agency (JICA) is sending a senior volunteer (in Waste Management) to work in the PPPUE office from March 2008.
- PPPUE partnered with Practical Action (formerly ITDG) to revive composting of waste in an area around the Haat Bazaar area of Butwal.
- Dharan Jaycees jointly organized with PPPUE a PPP orientation programme in Dharan.
- FNCCI, Nepalese Young Entrepreneurs' Forum and PPPUE jointly organized a business talk on the topic of "Long term Project Based Financing"
- Nepal Banker's Association is organizing a business talk on 'Acquisition and Merger and PPP potentiality' in co-operation with PPPUE in the second week of January 2008.
- Global Compact activities in 2007: Number of interaction programmes has taken place with Global Compact members of Nepal. The membership of GC Nepal has increased from 13 to 19 in the year 2007.

I.D. - Lessons Learned

- PPPs require a lot of time and patience - enough time should be given to education, capacity building, and so on before Non State Actors like private sector, community groups can be effectively involved in service delivery.
- Policies, acts, regulatory frameworks, all need to be in place for PPP arrangements to work. Donors have an important role to play at this point.
- Instead of embarking upon grandiose PPP schemes with multiple beneficiaries and financing structures, it is much more useful to start with smaller projects. In fact, operational projects are easier to get a handle of than other projects which require investment. After gaining experience from several "operational" projects, more ambitious "investment" projects with longer periods can be tried.
- PPP projects must be structured carefully from the planning stage to ensure Pro-Poor aspects are met. Private operators and even municipal bodies may overlook this later on.
- PPPs are also not applicable to every situation - they are not a cure-all remedy. Careful selection of sector, projects and well-thought out structuring of projects are prerequisites to successful PPP arrangements which will serve the poor.
