(1) Summary of the Project

The Project aims at supporting early recovery efforts in Gaza through livelihoods stabilization. The Project will be engaging **430** youths in the productive sectors in order to strengthen their coping ability and productive capacities in the current adverse environment. In addition, it will offer employment to the most vulnerable youths by using different schemes and job placements that are geared towards sustaining stability and contributing to strengthening social cohesion. The following activities will be carried out through the Japan Supplementary Fund:

- Developing the Geographical Information System (GIS) for the Municipality of Rafah through engaging **70** graduate youths in coding and numbering Rafah buildings.
- Supporting the Safe Summer Sea initiative, by providing decent employment opportunities for **60** lifesavers on the Gaza seashore.
- Improving the humanitarian, health, social and cultural services for the Gaza population through organizing apprenticeships for **300** youth in the most needed sectors mainly in health, education, Sport and reconstruction initiative.

Support the Sport Sector

Sport sector in the Gaza Strip suffers from lack of material and financial resources, which affects sport and athletes in the Strip remarkably. Therefore, the "Gaza Youth Employability and Protection" Project aims to support sport and athletes by promoting the quality and the quantity of the services, through employing 35 sport graduates at sport clubs and youth centers, to develop the trainers' experience and enhance their abilities in training the children, and encourage the people with disability to join the sport clubs.

Izz Aldin Altalaqh, one of the trainers in Aljazeera sport club, who trains

basketball and tennis for with people disability, says" as a trainer I work with many brave and determined people who simply overcome their disabilities, and they challenge all the difficulties around them. In this Project, we do our best to train, support and help people with disabilities to

achieve their dreams and goals by competing in the local and international sport games. Their dream is to make it to the highest level just like Hussam Azam, who competes in the Paralympic games in Rio de Janeiro this year. Another determined athletic is Suha Maqat, who won the gold medal in the 200 meters' race in the Gaza Strip."

Mohamed Alselk, one of the fresh trainees in Aljazeera sport club talks about his experience t saying "after losing my three kids and my leg in the last war on Gaza I felt frustrated, depressed and lonely. I didn't know what to do but sitting inside my house, I felt that life is over for me and I have to sit and wait for death. Using wheelchair for the first time was difficult for me, for I had to deal with the stares and to accept people's pity. But then one of my friends advised me to go with him to Aljazeera sport club and there, surprisingly I saw many people with different disabilities playing sports, it seemed fun, so I decided to stay and watch. Then the coach told me to try playing basketball with the team, the idea was different but encouraging for me. At first it was hard to use the wheelchair in playing basketball, but then with their care and training, I defeated my disability and my grief, now I am able to play basketball easily, now I have a dream to become one of the best athletic, and compete in the local and international games."
