## 2012 Annual Project Review (APR)

## **Basic Project Data**

Please scroll down to the bottom of this page and complete all sections. Please complete the cells with white background colour only.

| Official Project Title:   | Strengthening Coordination for Effective Environmental Management (STREEM)  |      |
|---------------------------|---|------|
|                           |   |      |
|                           | The project aims to generate global environmental benefits through improved coordination with respect to the implementation of cross-cutting issues within Multilateral Environmental Agreements (MEAs) in the country. Specifically the project will look into the issues and concerns that restrain effective implementation of the three Rio Conventions namely United Nations Convention on Biological Diversity (UNCBD), United Nations Convention to Combat Desertification (UNCCD) and United Nations Framework Convention on Climate Change (UNFCCC)). This will be done through a series of consultation and coordination activities at the national and at the local level. At the national level, the project will utilize existing mechanism for effective coordination among three Focal Point Agencies (FPAs) and consequently develop a series of tools and incentive systems designed to pragmatically support coordination and implementation of MEA activities at the local level. The Project will pilot these tools in Puerto Princesa Subterranean River National Park (PPSRNP) and the surrounding areas to strengthen local capacity for coordination. The final step would be to finalize these tools generated from experience and lessons learned and to replicate them across the country. |      |
