▪ Other (in-kind)	US\$ 100,000

**Parties:** National Institute for Environment and Development (NIMOS), Statistics Bureau Suriname (ABS),

**Revision Type:**

### Project Description:

As the National Capacity Self-Assessment (NCSA) of the Republic of the Suriname revealed, there are numerous capacity constraints and gaps which pose challenges for Suriname in fulfilling its commitments under the Rio Conventions and meeting its national sustainable development objectives. This project is targeted towards addressing cross-cutting capacity gaps and needs, by supporting interventions that will strengthen key government structures, as well as mechanisms for the civil society sector, to improve the institutional framework set up to implement the Rio Conventions and to deliver global environmental benefits. Under this project, capacity development support will lead to two outcomes: (1) Increased capacity of decision makers and stakeholders to manage environmental planning and processes that lead to decisions aimed at increasing global environmental benefits through better use of information and knowledge; and (2) Improved national capacities for the effective coordinated management and implementation of the Rio Conventions, and to continued leverage of financial resources to support the Conventions' objectives.

National project start up context is one whereby the Ministry of Labour, Technological Development and Environment (ATM) as a result of the State Resolution of 27 March 2015, SB 2015 no 41 has been dissolved with all Environment related task and project responsibilities having been transferred technically to the Office of the President and the National Institute for Environment and Development (NIMOS). For efficiency the editing of ATM throughout the text to reflect the updated Environmental and project management situation has been kept to a minimum, however in moving ahead where ATM is mentioned should be read as Office of the President and NIMOS, with overall project implementation role being entrusted to NIMOS.
