Project Risk Log

Name of the project: AAJAT
Year: 2021

Type of risks (organisational, political, environmental, financial, etc.)	What are the risk events (e.g. political instability, lack of government budget, natural disasters, epidemic, economic shocks, change in the government structure, etc.)	How will the risk impact the project implementation? (e.g. government budget contribution, price hikes due to inflation, landslides, floods, etc)	Mitigation measures	Risk updated on (mention the month and year)—to be updated twice a year.
Political	Political instability	Changes of the leadership in the justice institutions	Engage with all key institutions from the beginning of the process so there is full buy-in; Continue to monitor for political changes and stay updated through various information channels.	
Social	Possibility of backlash against the female-focused legal training	Risks of receiving criticism	Engage with all key stakeholders from the beginning of the process so there is full buy-in; Activities kept low key	
Environmental	Covid-19 Pandemic and followed State of Emergency (banning the gathering of more than 10 people)	Restrictions of organizing training and community outreach campaigns with more than 10 people; increase of the costs if the project delivers breakdown sessions with the limited number of participants; A likelihood of not meeting the targets if project postpones the activities	Utilizing a digital platform, if available; increasing the frequency of outreach campaigns	
Environmental	Floods and landslides, resulting in roadblocks	Reduced or non-availability of travelling to districts for Access to Justice Clinics' outreach campaigns	Taking the road situation and remoteness into account during the rainy season; Organize outreach campaigns with higher frequency during the dry season (May-December)
