Purpose/Objective of Mission

Attendance to Konya Model Factory Coordination Meeting

Brief Summary of Mission Findings

The meeting started with the Ministry informing about the background of the Project, the current developments in the Project and the principles of using the German Development Bank (KfW) fund for Konya Model Factory.

After visiting the alternatives (ground floor and second floor) offered by the Chamber of Commerce for the Model Factory within the existing vocational training complex, it was decided that these premises are not suitable for sustainability. In this context, it was agreed that a new building should be constructed for Model Factory.

Konya Model Factory was decided to open officially in the second half of December 2019. It was aslo decided to determine the product subject to trainings for Konya Model Factory and to start the orientation training at Ankara Model Factory by hiring the core management and operating staff in July 2019. It was decided to purchase and install the machinery and equipment of Konya Model Factory by October 2019. The training of trainers was decided to start by November 2019.

It was also emphasized that the inclusion of OIZs in Konya in the job creation protocol is of great importance for reaching companies operating in the manufacturing industry in Konya.

Recommendations/Actions to be Taken and by Whom	Distribution
	Pelin Rodoplu, Portfolio Manager
