

PROJECT PROGRESS REPORT

Sustainable Energy and Environment
Secretariat to support the Parliament of
Ukraine in SEE area

Reporting Period August 2018 - June 2020

Date 23 July 2020

Prepared by

Acronyms	3
1. Context of the project	3
2. Outcome results	3
3. Green Agenda in Ukraine	6
3.1. Green Agenda of the Verkhovna Rada of the 8th convocation	6
3.2. Green Agenda during presidential and parliamentary elections	6
Presidential elections.....	6
Parliamentary elections	7
3.3. Green Agenda of the Verkhovna Rada of the 9th convocation	8
Role of the Parliamentary Committee on Environmental Policy	8
Fulfilment of election promises on the Green Agenda	9
The legislative activity of the Verkhovna Rada of the 9th convocation on the Green Agenda	11
Time for consideration of draft laws in SEE area.....	12
4. Key Output results for the reporting period (as per RRF)	13
5. Project activities during the reporting period	15
Output 1: The parliament of Ukraine has strengthened capacity on SEE issues through the establishment and functioning of the Sustainable Energy and Environment Secretariat.....	15
Activity 1: Provide analytical support to the parliament of Ukraine on SEE issues.....	15
Activity 2: Provide organizational support to the Parliament of Ukraine on SEE issues	21
Output 2: Duty-bearers and right-holders have increased awareness and understanding of green politics and business in Ukraine	29
Annexes:	34
Annex I. List of analytical products prepared by Project	35
Annex II. Analysis of draft legislation registered in the parliament vis-à-vis SDG targets, international commitments and national strategic documents	43
Annex III. Project legislative support and advocacy mapping	48
Annex IV. Communications and advocacy strategy and work plan (2019-2020)	57
Annex V. Communications and advocacy work plan (update as of June 2020)	69
Annex VI. Project monitoring indicators	91

ACRONYMS

AA	Association Agreement
CSOs	civil society organizations
GHG	greenhouse gas
IFU	inter-faction union (in parliament)
MENR	Ministry of Ecology and Natural Resources
MEEP	Ministry of Energy and Environmental Protection (from September 2019)
MEPNR	Ministry of Environmental Protection and Natural Resources (from May 2020)
MP(s)	Member(s) of Parliament
MRV	monitoring, reporting and verification (of GHG emissions)
No.	number
SDGs	Sustainable Development Goals
SEE	sustainable energy and environment
SEES	Sustainable Energy and Environment Secretariat
UNDP	United Nations Development Programme
VRU	Verkhovna Rada of Ukraine

1. CONTEXT OF THE PROJECT

Ukraine has a long list of environmental reform priorities. However, the speed of the reforms in the area of sustainable energy and environment (SEE) is slowed down by the difficulties in adopting the needed legislation related to the capacity of the parliament and a large number of low-quality legal initiatives. To speed up the SEE-related reforms and ensure representation of the Green Agenda issues, UNDP seeks to improve the capacity of the parliament of Ukraine and enhance environmental advocacy among politicians, mass media and the public. The Project aims to support the parliament of Ukraine as a whole, Members of Parliament, Committees (specifically, on Environmental Policy and Nature Management) with quality analytical support on the legislation making, organizing stakeholders' consultations and other events, development of communication products, and engagement of various stakeholders into the policy debate on sustainable energy and environment issues.

2. OUTCOME RESULTS

1. UNDP strengthened MPs' capacities to initiate, draft and advocate comprehensive environmental legislation framework to accelerate the implementation of the EU-Ukraine Association Agreement and alignment with the Climate Neutral European Continent (and other elements of EU Green Deal) through policy dialogues and support (341 analytical materials developed), capacity development of the MPs, VRU Secretariat and Committees. The 9th parliamentary convocation from September 2019 to June 2020 has developed and adopted 50 per cent more legislative acts on Green Agenda issues comparing to the work of the previous convocation from September 2018 to July 2019.

2. UNDP contributed to a more coherent approach and a deeper understanding of sustainable environmental and energy legislation issues, including its cross-cutting/inter-sectoral nature, far-reaching impacts on human health, sustainable economic growth and natural ecosystems through targeted high-level policy dialogues, discussions and knowledge-sharing platforms.

3. UNDP enhanced institutional capacities of VRU Committee on Environmental Policy and Nature Management, the Committee's Secretariat, IFU "Energy and Environment" and MPs assistants on sustainable energy and environmental legislation issues through:

- institutional capacity and sectoral training programmes (4 training events conducted and 67 people trained)
- sectoral Road Maps developed and being implemented (draft Roadmap for VRU Committee on Environmental Policy and Nature Management for 2020-2021 and Climate Change Road Map for the parliament of Ukraine)
- support provided in the workplan development for VRU Committee on Environmental Policy and Nature Management and IFU “Energy and Environment”

On 28 February 2019, VRU adopted a roadmap for environmental policy for the next decade - **the State Environmental Policy Strategy of Ukraine for the period till 2030**. The new strategy is focused on preventing environmental challenges and contains 30 environmental indicators and targets for Ukraine to achieve by 2030. UNDP supported an advocacy campaign and event “EcoDay in Rada”, where this strategy was adopted.

The key changes in the renewable energy sector were brought by the *law to ensure competitive conditions for the production of electricity from alternative energy sources (8449-d)* adopted in 2019. The law is crucial for renewable energy sphere in Ukraine as it gradually substitutes the current “green” tariff scheme and sets the framework for renewable energy auctions. The latter will be mandatory for investors in solar power plants with a capacity of more than 1 MW and wind power plants with a capacity of more than 5 MW (i.e. one turbine). UNDP provided analytical advice to ensure that amendments to the second hearing of the draft law related to using household waste as an alternative source of energy were not considered, as those were incompliant with Ukraine’s obligations in the field of EU-integration.

UNDP has also supported Ukraine in its transition to sustainable and green energy and has been contributing to emergence and implementation of such “green” co-sharing projects in Ukraine like “Solar City” initiative, focusing on the installation of solar panels on the roofs of municipal buildings in Slavutych, Kyiv region. It was made possible with the relevant analytical background products, developed by UNDP’s experts, such as White Paper “Distributed energy resources and technologies - creating preconditions for their optimal use in Ukraine” and other guidelines.

In 2019, **four framework draft laws on waste management** were registered in the Verkhovna Rada - one in the previous convocation and three in the new one. UNDP continues to advocate for the creation of proper legislation on waste management compliant with the *National Waste Management Strategy of Ukraine by 2030*, as well as European regulations.

Public attention to the high circulation of the single-use plastic bags has led to relevant policy consideration by the parliament. Four thematic draft laws were registered (but not considered) by the 8th convocation, and two by the 9th convocation. On 11 November 2019, one of those was supported by 365 deputies in the first reading.

At the end of 2019, MPs established the **basis for the system of monitoring, reporting and verification of greenhouse gas emissions**. The law is critical to improve existing climate policy instruments (carbon taxes) or introduce new ones (emissions trading), as well as necessary to obtain reliable data on greenhouse gas emissions from specific energy or industrial enterprises. UNDP supported an advocacy campaign for the draft law adoption, entitled above as “EcoDay in Rada”, as well developed a series of analytical and communication materials for its successful consideration by the MPs.

Another important step is the **adoption of the draft law on ozone-depleting substances and fluorinated greenhouse gases**, developed with the support of UNDP. This law will facilitate the fulfilment of international commitments of Ukraine towards ozone layer protection and preventing climate change. The document regulates production, import, export, storage, use, placement in the market and the treatment of the ozone-depleting substances, fluorinated by greenhouse gases, goods and the equipment which contain or use them.

Since the beginning of 2020, electric cars use was boosted by special benefits, i.e. green license plates, access to charging stations and distinctive road signs for electric cars. All is a result of a law developed with the support of UNDP. According to the experts, the fleet of vehicles and light trucks with electric motors in 2024 will increase up to 246,000, which is almost ten times more compared to 2019. The law will allow keeping the development of charging infrastructure aligned with the significant increase in the number of electric cars on the Ukrainian roads.

Financial repercussions for air pollutions, destruction or damage to flora and unsanctioned agricultural burning have been increased, in some instances tenfold, following UNDP's legislative advocacy in 2020 (fines increased by tenfold).

4. Communities in Ukraine have a better understanding of the environmental issues and reforms needed to slow down the climate change and achieve sustainable economic growth through efficient informational campaigns, informed by data and community insights.

- awareness-raising events on SEE issues (31 events held, and 1,148 people reached)
- awareness-raising and informational campaigns in social media (546,000 people reached)

According to the nationwide survey conducted by UNDP in 2020, four most significant problems mentioned Ukrainian citizens are **raising social standards and improving social security system (57 per cent), healthcare problem (53 per cent), combating corruption (52 per cent) and unemployment problem (49 per cent)**. From 2018 to early 2020, the opinions concerning importance of **tackling environmental issues and protecting the environment, increasing the effectiveness of energy consumption in Ukraine and enhancing the nation's energy security** (when asked in comparison with other acute needs) did not change: Ukrainian citizens still consider them to be a low priority.

At the same time, compared to the first wave of the survey at the beginning of the project, **significant changes have occurred in public perceptions regarding the significance and interconnection of environmental protection and economic growth**. The percentage of those attaching equal attention to both has increased by 10 per cent (from 60 to 70 per cent).

Also, the rate of Ukrainians prepared to act based on environmental considerations and the number of these actions have visibly increased since 2018. The frequency of mentioning the following practices has increased especially significantly: sorting waste and delivering it for processing by specialized organizations (from 38 to 52 per cent), reducing the use of disposable plastic (from 24 to 37 per cent), reducing electricity and gas consumption (from 27 to 33 per cent) and improving the energy performance of housing (from 19 to 31 per cent). One of the most notable change since 2018 is a nearly **threefold decline of the percentage of Ukrainians who never act based on environmental considerations**, from 17 to 6 per cent.

Public perceptions on the most influential actor in tackling environmental challenges did not change since 2018: most respondents consider citizens themselves the biggest influencer (31 per cent versus 30 per cent in 2018), followed by the Verkhovna Rada (26 per cent versus 25 per cent in 2018).

Among all respondents, **younger Ukrainians with a higher level of education pay more attention to the importance of environmental protection**: they tend to agree more often on the importance of explicit provisions concerning sustainable energy and the environment in the programmes of political parties, act more frequently and in more ways based on environmental considerations and place the fundamental responsibility for tackling environmental issues upon the citizens themselves. Compared to the 2018 survey, **this trend has intensified**.

3. GREEN AGENDA IN UKRAINE

3.1. Green Agenda of the Verkhovna Rada of the 8th convocation

- ✓ Green Agenda, developed by the Project in collaboration with IFU “Green Power Shift”, consolidated all parliamentary factions, groups and no-faction members of the parliament of the 8th convocation.
- ✓ Parliament’s agenda included all Green Agenda priorities, but not all treated equally important.

Legislative work of the parliament on systemic laws was not effective enough. The following recommendations were developed in 2019 by the Project to enhance future parliament’s work on Green Agenda priorities:

- ✓ increase institutional role and capacity of legislative initiators
- ✓ improve mechanisms for the adoption of systemic laws and avoiding legislative spam
- ✓ strengthen cooperation in law drafting between parliament and the government, introduce tools for assessing efficiency, effectiveness and relevance of the legislation vis-à-vis its initial goals
- ✓ increase transparency and openness of the parliament’s work

Results of the project’s analysis were supported for consideration as key work priorities by both VRU Environmental Policy Committee Chair Oleg Bondarenko and IFU “Energy and Environment” co-chair Lesia Vasylenko. Ostap Yednak, MP of 8th convocation and co-chair of the IFU “Green Power Shift” (predecessor of IFU “Energy and Environment”) also agreed on the analysis results and claimed on further support to his colleagues from the 9th convocation to ensure sustainable reform of the environmental policy of Ukraine.

3.2. Green Agenda during presidential and parliamentary elections

Green Agenda priorities along with the results of the nationwide study of citizens’ perceptions regarding sustainable energy and environment run by UNDP in 2018, were considered and incorporated into the NGO/CSOs-led campaigns during the presidential and parliamentary elections. Leaders of the presidential election campaigns and political parties reacted to or supported the demands of civic activists.

Presidential elections

- ✓ 64 per cent of pre-election programmes included green issues, which means a 25 per cent increase from the presidential elections in 2014.
- ✓ Climate change was missing in all official pre-election programmes of candidates.
- ✓ All four female candidates for the post of the president of Ukraine had substantial provisions on green issues in their pre-election programmes.
- ✓ Renewable energy and energy efficiency were most frequently mentioned issues in the programmes, nature protection, green tourism and green transport - the rarest.

Green agenda in the presidential elections campaign was reflecting the increase of green issues’ importance in the global political agenda in the country. However, the pre-election programmes did not cover the whole spectrum of the green issues; they instead reflected on overcoming existing threats than proposed a vision for future green development of Ukraine. Just a few programmes included separate chapters on environmental issues.

In 2019 presidential campaign, Green Agenda was primarily filled by sustainable and renewable energy and energy efficiency issues. Clean water and saving forests were first issues for environmental protection, green economy, sustainable agriculture, and green finance were at the top for the integration of environment into other sectors. Some programmes not only lacked green dimension but also were of concern for proposing bad environmental practices. Such practices included an increase

of natural gas, coal and oil extraction, further development of the nuclear sector, stimuli for the wood processing industry, simplified and cheap customs procedures for imported used cars.

We noted linkages between Green Agenda issues with problems and challenges in other areas and sectors. Acute attention to energy independence of the country was raising the renewable energy development issue. High prices for the population were bringing energy efficiency to the top of the list. Increasing waste generation encouraged discussions on recycling. Ban on wood exports from Ukraine draw attention to sustainable forestry, ban on agricultural lands sale - to sustainable land use.

Green Agenda in the elections discourse was often populist, like many other priority issues. Many green provisions were phrased as slogans and sounded too general, without offering a clear offering or ways to solve problems.

Green political discourse was detached from the modern world's discourse in this area. Pre-elections programmes of the candidates for President of Ukraine were practically silent on concepts or terms usually used today in the world to solve global and national environmental challenges. In particular, this was true about climate change, ozone layer protection, circular economy, green economy, waste management hierarchy.

Green Agenda issues were also neglected by other participants of the elections discourse: journalists and TV/radio show presenters, political experts and reviewers.

Parliamentary elections

- ✓ Majoritarian candidates made a total of 2,586 green promises in their programmes.
- ✓ 44 per cent of the majoritarian candidates featured at least one green issue in their programmes in 2019. During the previous elections, this number was as low as 28 per cent in 2014 and 36 per cent in 2012.
- ✓ All political players ignored the issues of nature protection, biodiversity and protected areas development.
- ✓ Eight political parties supported the Environmental Safety Agenda for the VRU proposed by a coalition of environmental CSOs.

Green issues were better integrated into the electoral discourse during the parliamentary 2019 elections. It is valid from several viewpoints: level of incorporation of the sustainability issues into the elective programmes of the parties and majoritarian candidates, level of attention that was paid to environmental issues by the experts, journalists and civil society and, lastly, the level of public debate on Green Agenda issues during the elections. Some 55 per cent of the political parties participating in proportional elections and 44 per cent of the majoritarian (plurality system) candidates cover some Green Agenda issues in their programmes. Yet, only three parties offer a comprehensive green agenda. Initiatives of the civil society organizations had an impact on 2019 elections by encouraging parties to communicate on environmental issues and take positions regarding environmental problems in Ukraine.

Green energy, waste and water were the top three issues addressed by both political parties and majoritarian candidates. "Climate change and energy" part of the Green Agenda was primarily represented by renewable energy. "Environment"- by municipal waste and water. "Integration of environmental issues into other sectors" was not well reflected in programmes. Increase of attention to forestry, especially in the context of woods export ban and strengthen liability for illegal logging was noted.

The 2019 parliamentary elections produced a rather new phenomenon - development of additional programmes by political parties, in particular to those addressing 'green' issues. Out of five leading parties, only the "Opposition Platform - for Life" had no additional environmental programmes or policy statement. This phenomenon is also true for some other non-top parties, which participated in the elections.

Majority of the majoritarian candidates offered low-quality programmes. The way they addressed the issue shows the lack of understanding of the political processes in general and the green issues themselves. Majoritarian candidates mostly did not have a comprehensive or systemic vision of the green agenda. Usually, they addressed in their programmes just single items, while tying their programmes to local problems. Candidates of two parties, “Opposition Platform - for Life” and “Svoboda” used template-based programmes, which did not include green issues. In turn, this resulted in a complete lack of green issues in their programmes. Candidates of “Voice” and “Servant of the People” parties also used templates provided by their parties, but they also added their provisions, including those relating to the environment. As a result, candidates of the “Servant of the People” party demonstrated high environmental agenda just because the party’s template programme addressed green energy issues.

Several parties in 2019 elections supported so-called environmental agenda and other initiatives by civil society. In general, this trend may prove to be useful for future work with members of the parliament on Green Agenda issues. Yet, this may pose a threat of greenwashing (environmental populism).

Most polluted regions continue to be the least ‘green’, as far as majoritarian candidates reflected environmental issues in these oblasts. For example, in 2019, green issues were least addressed in Donetsk Oblast - by only by 29 per cent of candidates, Dnipropetrovsk Oblast - 39 per cent and Zaporizhia Oblast - 40 per cent. At the same time, Rivne Oblast featured 67 per cent, Lviv Oblast - 61 per cent and Ivano-Frankivsk Oblast - 60 per cent.

3.3. Green Agenda of the Verkhovna Rada of the 9th convocation

- ✓ Throughout the absence of a separate Ministry of Environmental Protection and Natural Resources, the political role of the VRU Committee on Environmental Policy and Nature Management was observed to be increasing, as well as its degree of transparency and openness.
- ✓ At the beginning of its work, VRU of the 9th convocation demonstrated the intensification of legislative activity.
- ✓ In its legislative activity, VRU of the 9th convocation has demonstrated the institutional heredity, since five of the eight laws on SEE related matters were adopted in the first reading by the parliament of the previous convocation.
- ✓ VRU of the 9th convocation adopted two essential laws on climate change, thus filling a legal gap in this area. Issues of climate change, forest protection and access to the shorelines of water bodies have become a unifying cause in the legislative activity of VRU of the 9th convocation.
- ✓ The time required for the adoption of laws in the SEE area by VRU of the 9th convocation has become shorter.

Role of the VRU Committee on Environmental Policy and Nature Management

Throughout the absence of a separate Ministry of Environmental Protection and Natural Resources, the relevant Verkhovna Rada Committee played a unique role in shaping the environmental policy¹.

In fact, over the period, the VRU Committee on Environmental Policy and Nature Management was the most important agent of the country’s environmental policy. Members of the Committee had an exclusive responsibility for its formation: from setting priorities to developing extremely complex reforms, such as on waste management. Agendas of the Committee’s meetings and its work determined the programme of the environmental policy in its entirety.

¹ On 29 August 2019, the Verkhovna Rada of Ukraine passed a decision to merge the Ministry of Ecology and Natural Resources of Ukraine with the Ministry of Energy and Coal Industry of Ukraine. As a result, the Ministry of Energy and Environmental Protection of Ukraine was established. On 27 May 2020, the Cabinet of Ministers of Ukraine passed a decision to split the Ministry of Energy and Environmental Protection of Ukraine into two separate Ministries.

UNDP provided analytical support with the development of the draft Roadmap for Environmental Committee for the period from 2020 to 2021.

An important feature that distinguishes the work of the VRU Committee on Environmental Policy and Nature Management of the 9th convocation is transparency.

Most Committee's minute records were published on its official website on the day when the meeting was held, or on the following day. During COVID-19 pandemic, the Committee posted the video and audio recordings of its sessions on its YouTube channel. It made it much easier for any stakeholders to be updated on the work of the Committee. The Committee and its members have demonstrated rather active communications. The Committee Chair, O.V. Bondarenko, and the MPs who are the Committee members, as well as their assistants, actively use social networks to share information about the work of the Committee, the progress in consideration of draft laws.

UNDP organized training sessions on visibility and communications for assistant MPs of the 9th convocation in 2019.

At present, the Committee demonstrates its openness to cooperation with all stakeholders, from the government to civil society organisations and businesses.

To form a substantive dialogue, the Committee held thematic meetings attended by various stakeholders. With account to the low legislative activity of the government on environmental issues, the Committee actively cooperated with ecological civil society organizations, responding to their requests and taking into account their suggestions in the draft laws developed. Cooperation with stakeholders made it possible for the Committee to take into account the interests of the various process participants and those that the decisions will affect and facilitates work on complex draft laws by mobilising additional expert resources.

UNDP organized a series of EU-UA Environmental Platforms launched in cooperation with the Committee, aimed at analysing progress in development and implementation of related Ukrainian legislation in line with EU acquis, as well as identifying decisions to be made at the legislative and regulatory levels to reach required goals in terms of EU-UA integration.

Fulfilment of election promises on the Green Agenda

Green energy, forests, waste are the issues that unite all political forces for the Green Agenda promotion in the Verkhovna Rada.

According to the results of [the study of the Green Agenda in the 2019 elections to the Verkhovna Rada of Ukraine](#), several issues that future MPs planned to work on were shared by all political forces (except the Opposition Platform - For Life) that made it to the parliament. Those were the issues that MPs were expected to start working on both in their Committees and in the session hall. Those issues were green energy, forests, waste and green finance, that turned out to be shared by three political parties; and matters of nature, air, and climate change - by two political forces.

An analysis of the activities of the Committee on Environmental Policy and Natural Resources Management and the Committee on Energy, Housing and Utilities showed that, while essential laws in the area of green energy, forests and waste are yet to be adopted, MPs are working on the declared priorities by planning activities, establishing workgroups, developing and discussing specific draft laws.

Among its main areas of work, the Committee on Energy, Housing and Utilities notes explicitly the development of market mechanisms, promotion of energy efficiency and energy saving; increasing volumes of energy and energy products generated from non-conventional and renewable energy sources.

Among the laws of the Green Agenda (on matters that future MPs promised to work on after the election), **adopted** by the Verkhovna Rada of Ukraine of the 9th convocation, the following may be mentioned:

- Law of Ukraine “*On Amendments to the Law of Ukraine “On the Electricity Market”*”, dated 04 December 2019 [No.330-IX](#), aimed at ensuring the legislative regulation of the mechanism to fulfil special obligations for the purchase of electricity at the “green” tariff
- Law of Ukraine “*On Amendments to Certain Laws of Ukraine on Improving Legislation in the Area of Radioactive Waste Management*”, dated 17 October 2019 [No.208-IX](#), adopted to align the legislation in the area of radioactive waste management with international safety requirements pertaining to the classification of radioactive waste for their disposal
- Law of Ukraine “*On amendments to certain Laws of Ukraine pertaining to the ban on clean felling on mountain slopes in fir and beech forests of the Carpathian region*”, dated 30 October 2019 [No.249-IX](#).

The Committee on Environmental Policy and Natural Resources Management has paid considerable attention to **the issue of waste** since several draft laws have been registered in this area:

- (1) **framework legislation in the field of waste management** - the draft law on amendments to specific legislative acts of Ukraine in the area of waste management (reg. [No.2115](#)); draft law on the management of household and other types of waste (reg. [No.2207](#)); draft law on waste management (reg. [No.2207-1](#)); draft law on waste (reg. [No.2207-2](#)). At present, draft law No.2207-1 has been submitted for a new first reading. In the future, it will be the basis for the framework law to be adopted in the area of waste management.
- (2) **legislation on plastic packages** - draft law on the reduction of the amount of plastic bags in civil circulation (reg. [No.2051](#)), draft law on restricting the circulation of plastic bags on the territory of Ukraine (reg. [No.2051-1](#)). The draft law No.2051-1 was adopted in the first reading on 12 November 2019.
- (3) **legislation on hazardous waste** - draft law on amendments to specific Laws of Ukraine on improving the hazardous waste management system (reg. [No.2066](#)). At present, the draft law has been returned for revision.
- (4) **legislation on specific types of waste** - draft law on the waste of electrical and electronic equipment (reg. [No.2350](#)), Draft Law on batteries and accumulators (reg. [No.2352](#)). These draft laws have not yet been considered in the session hall, but are examined at the committee level.

The issue of **forests** was not left out by the Committee on Environmental Policy and Natural Resources Management either; in particular, work was carried out in the following areas:

- (1) **ban on forest clearance** - draft law on amendments to specific laws of Ukraine (pertaining to the ban on clean felling on mountain slopes in fir and beech forests of the Carpathian region) (reg. [No.0873](#)), draft law on establishing a moratorium on clean felling in forests and landscaped areas (reg. [No.1155](#)). On 30 October 2019, draft law No.0873 was approved by the Verkhovna Rada in principle, and draft law No.1155 was returned for revision.
- (2) **forest conservation** - draft law on amendments to specific legislative acts of Ukraine on establishment of additional forest preservation guarantees (reg. [No.2173](#)), draft law on amendments to the Forest Code of Ukraine pertaining to the national forest inventory survey (reg. [No.2379](#)). draft law No.2379 was approved in principle, and the draft law No.2173 was returned for revision.

The legislative activity of the Verkhovna Rada of the 9th convocation on the Green Agenda

In 2019, the activity of the Verkhovna Rada of the 9th convocation on the adoption of laws intensified, but in 2020, a slow-down has been observed. The amendments to the laws covered specific issues of the Green Agenda in terms of protection of forests, water, air and biodiversity, waste management, promotion of renewable energy. New systemic laws have been adopted on ozone-depleting substances and fluorinated greenhouse gases, principles of monitoring, reporting and verification of greenhouse gas emissions.

From 29 August 2019 to 20 May 2020 the following draft laws on Green Agenda issues (the environment, climate change and renewable energy) were adopted:

- Draft law on amendments to certain legislative acts of Ukraine on ensuring unimpeded access of citizens to the shoreline water bodies for general use (reg. No.[0869](#) dated 29 August 2019)
- Draft law on amendments to certain laws of Ukraine (pertaining to the introduction of a ban on clean felling on mountain slopes in fir and beech forests of the Carpathian region) (reg. No.[0873](#) dated 29 August 2019)
- Draft law on ozone-depleting substances and fluorinated greenhouse gases (reg. No.[0874](#) dated 29 August 2019)
- Draft law on principles of monitoring, reporting and verification of greenhouse gas emissions (reg. No.[0875](#) dated 29 August 2019)
- Draft law on amendments to certain laws of Ukraine on improving the legislation on matters of radioactive waste management (reg. No.[0913](#) dated 29 August 2019)
- Draft law on amendments to the Law of Ukraine “On the Electricity Market” (reg. No.[2233](#) d/d 04 October 2019)
- Draft law on amendments to certain legislative acts of Ukraine pertaining to regulation of the amber extraction issues (reg. No.[2240](#) dated 08 October 2019)
- Draft law on amendments to certain legislative acts of Ukraine aimed at preserving the environment (on strengthening the responsibility for actions that cause air pollution and destruction of or damage to flora) (reg. No.[2339](#) dated 29 October 2019)

In October and December 2019, the parliament adopted seven laws and until May 2020 - only one. Five of the laws adopted were “inherited” from the parliament of the previous convocation since they were submitted to the newly elected parliament for further consideration by the second reading procedure.

Important result of the Verkhovna Rada of the 9th convocation was the adoption of two new systemic laws on climate change:

- Law of Ukraine “*On ozone-depleting substances and fluorinated greenhouse gases*” No.[376-IX](#) dated 12 December 2019
- Law of Ukraine “*On principles of monitoring, reporting and verification of greenhouse gas emissions*” No.[377-IX](#) dated 12 December 2019

All other adopted laws contained certain amendments to the existing legislation and covered the following issues:

- access to the shorelines (Law of Ukraine “*On amendments to certain legislative acts of Ukraine on ensuring unimpeded access of citizens to the shoreline water bodies for general use*” No.[233-IX](#) dated 29 October 2019)

- protection of forests (Law of Ukraine “*On amendments to certain Laws of Ukraine pertaining to the ban on clean felling on mountain slopes in fir and beech forests of the Carpathian region*” No.[249-IX](#) dated 30 October 2019)
- strengthening the responsibility for environmental pollution (Law of Ukraine “*On amendments to certain legislative acts of Ukraine aimed at preserving the environment on strengthening the responsibility for actions that cause air pollution and destruction of or damage to flora*” No.[556-IX](#) dated 13 April 2020)
- improvement of amber extraction (Law of Ukraine “*On amendments to certain legislative acts of Ukraine on improving legislation on the extraction of amber and other minerals*” No.[402-IX](#) dated 19 December 2019), the price of services to ensure an increase in the share of electricity generation from alternative sources (Law of Ukraine “*On amendments to the Law of Ukraine“ On the electricity market*” No.[330-IX](#) dated 04 December 2019)
- radioactive waste management (Law of Ukraine “*On amendments to certain laws of Ukraine on improving legislation in the area of radioactive waste management*” No.[208-IX](#) dated 17 October 2019)

Time for consideration of draft laws in SEE area

The time for consideration of draft laws by the VRU of the 9th convocation, from the moment of their registration to the adoption, is 49 to 167 days. The governmental draft law on amendments to certain laws of Ukraine on improving the legislation on radioactive waste management (reg. No.0913 dated 29 August 2019) was considered the fastest (within 49 calendar days), while the longest time (167 calendar days) was needed for the draft law on amendments to certain legislative acts of Ukraine aimed at preserving the environment (on strengthening the responsibility for actions that cause air pollution and destruction of or damage to flora) (reg. No.[2339](#) dated 29 October 2019).

The average time for consideration of draft laws by the VRU of the 9th convocation is 85 calendar days. Time is similar both for the laws registered by the group of MPs and by the government (88 and 83 calendar days respectively). On contrary, the average time for consideration of the draft laws by the parliament of the 8th convocation was 311 days for the draft laws in SEE area registered by the government, 217 days for those registered by individual MPs and 197 days - by a group of MPs.

4. KEY OUTPUT RESULTS FOR THE REPORTING PERIOD (AS PER RRF)

Output 1: The parliament of Ukraine has strengthened capacity on SEE issues through the establishment and functioning of the Sustainable Energy and Environment Secretariat

- **Green Agenda (priorities in SEE area) for Ukraine till 2030** was developed by UNDP and presented by MPs on 19 March 2019 to serve as a guiding tool for the MPs in the implementation of ‘green’ reforms in Ukraine, notably achieving the SDGs, objectives of the State Environmental Policy of Ukraine for the period up to 2030, implementation of the EU Association Agreement and the Paris Agreement.
- The analysis of **implementing Green Agenda for Ukraine priorities by the 8th parliament of Ukraine convocation from 2014 to 2019** was conducted and presented to all interested stakeholders (at least 5,264 people reached through project events and other communication channels).
- **Two hundred and fifteen (215) Members of Parliament, national and local government representatives, VRU staff (128 women, 87 men)** improved their skills and knowledge on SEE issues through meetings, workshops, discussions and other events during the reporting period.
- **Two hundred and sixty-two (262) Members of Parliament, national and local government representatives, VRU staff (145 women, 117 men)** became more knowledgeable of SEE issues through all advocacy and communication activities of the Project (events, analytical notes, articles, informational products and other materials distributed online and in-person).
- **Analysis and recommendations provided to 42 draft laws** in the sustainable energy and environment area

Output 2: Duty-bearers and right-holders have increased awareness and understanding of green politics and business in Ukraine

- The analysis of **incorporating the green component in the election programmes of the candidates running for presidential elections in 2019** was completed and presented to all interested stakeholders (at least 4,867 people reached through project events and other communication channels).
- The analysis of **incorporating the green component in the election programmes of the candidates running for parliamentary elections in 2019** was completed and presented to all interested stakeholders (at least 10,866 people reached through project events and other communication channels).
- **Three hundred and forty-one (341) analytical materials (analytical papers, briefs, articles, recommendations, statements and other information products and notes)** were developed and disseminated.
- **One thousand one hundred forty-eight (1,148) people (703 women, 445 men)** participated in project events during the reporting period and improved knowledge of SEE issues. **Seven thousand two hundred twenty-eight (7,228) people** viewed the recordings of the events online.
- **Ninety-seven (97) journalists (77 women, 20 men) from national and regional media, bloggers and media activists** were trained on environmental reporting through dedicated educational sessions in Kyiv, Lviv, Kramatorsk and Odesa.

- **Over one hundred of partners (CSOs/NGOs, businesses, opinion leaders, national and local authorities)** joined a nationwide “Day without polyethene campaign” successfully ran in cooperation with IFU “Green Power Shift”, Ministry of Ecology and Natural Resources and Zero Waste Alliance Ukraine. More than **240,000 people** were reached through the campaign only in social media.
- Advocacy and communications strategy and work plan for raising awareness on SEE issues and promoting Green Agenda among decision-makers and the public was developed for the duration of the Project (implementation is ongoing).
- Total at least **546,000 people** were reached through awareness-raising activities/campaigns of the Project focused on Green Agenda promotion via a variety of channels, including events, direct information distribution, social media, mass media and more.
- Activities of the Project received **over 670 national and regional media mentions** during the reporting period.

5. PROJECT ACTIVITIES DURING THE REPORTING PERIOD

The following sections of the report are structured so to present the activities and achievements since the beginning of the Project.

Output 1: The parliament of Ukraine has strengthened capacity on SEE issues through the establishment and functioning of the Sustainable Energy and Environment Secretariat

Activity 1: Provide analytical support to the parliament of Ukraine on SEE issues

- 1.1. Develop analytical papers, articles and other informational notes on various SEE issues.
- 1.2. Develop and disseminate policy briefs, policy papers, statements, etc.
- 1.3. Analyze draft legislation, strategies and plans for implementation of the state policy in SEE area.

Given the variety and scope of issues in sustainable energy and environment, UNDP worked jointly with the MPs to identify priorities of legislative work, which will be supported by the Project. During the preparatory stage, UNDP did a baseline study / scoping of the draft legislation relevant to SEE issues and implementation of the relevant chapters of EU-Ukraine Association Agreement, other international commitments, as well as SDGs (*Annex II*), shared and discussed with the MPs to identify priority focus areas. As a result, 11 priority areas were identified: *waste management; monitoring, reporting and verification of GHG; energy efficiency; energy security; phase-out of single-use plastic bags; green auctions; gender in corporate governance (with focus on state energy companies); distributed energy and energy cooperatives; sustainable transportation (electro-vehicles and bicycles); green finance and establishing efficient green (and climate) finance instruments; fossil fuel subsidies and their impact on the regions dependent on fossil fuel extraction industry.*

Since the end of 2019, UNDP worked closely with the VRU Committee on Environmental Policy and Nature Management and IFU “Energy and Environment” to identify updated needs in analytical, advisory and communication support. As a result of consultations and review of the workplan and priorities of the [EcoCommittee](#) and [IFU](#) for 2020, the relevant project plan has been developed and agreed with the MPs.

Under this output, the team of experts provided analytical assistance to the parliament by working closely with the inter-faction union of MPs “Green Power Shift” during 2018/19 (8th convocation); VRU Committee on Environmental Policy and Nature Management and inter-faction union of MPs “Energy and Environment” during 2019/20 (9th convocation), as well as other MPs and representatives of national and regional governmental institutions.

PRIORITY AREAS FOR ANALYTICAL SUPPORT (2019)

1. Waste management
2. GHG monitoring, reporting and verification
3. Energy efficiency
4. Energy security
5. Phase out of single-use plastic bags
6. Green auctions
7. Gender in corporate governance
8. Distributed energy and energy cooperatives
9. Sustainable transportation
10. Green finance
11. Fossil fuel subsidies and their impact

Nine focus areas were identified:

- general support for the VRU Committee on Environmental Policy and Nature Management in **development and implementation of its Roadmap for 2020-2021**
- **Industrial pollution prevention and control**
- **Environmental monitoring**
- **Environmental Control**
- **Climate policy** (MRV implementation and defining financial incentives for GHG decrease; climate adaptation)
- **Waste management**
- **Environmental education**
- Post-Legislative Scrutiny of the Laws adopted on compliance with EU-UA Association Agreement (particularly, Laws “On Environmental Impact Assessment”, “On amendments to the Water Code of Ukraine”)
- **Interparliamentary cooperation support in the field of environment**

In total, fifty-nine (59) analytical notes (including 17 legal opinions) and forty-nine (49) comments and recommendations to draft laws were prepared and shared with MPs. Thirty-three draft laws were analysed for harmonisation and compliance with the EU-Ukraine Association Agreement and EU acquis. Information materials were prepared for four (4) draft laws to facilitate their consideration by the parliament in the first reading. As a result, recommendations and comments were considered in five (8) draft laws (of which four (4) draft laws were adopted in general and one - in the first hearing).

ANALYTICAL PRODUCTS

(details in Annex I)

- 59 analytical notes (including 17 legal opinions) for draft laws
- 49 comments and recommendations to draft laws
- Green Agenda for Ukraine till 2030
- Guidelines for policy development on international and domestic commitments of Ukraine
- Research “World practices of reducing the use of plastic bags”
- Climate Action Roadmap for the Parliament of Ukraine
- State of Play of Environmental Policy under AA implementation
- State of Play of Environmental Policy under AA implementation update as of March 2020
- Overview of key laws / draft laws status in terms of EU-UA Association Agreement
- Draft Roadmap for the VRU Committee on Environmental Policy and Nature Management for 2020-2021
- Research “World practices of preventing forest fires”
- Guidebook on Environmental Policy for the Members of Parliament
- 224 articles, publications and other information products

- Analytical note to the draft law 8449 “[On amendments to certain laws of Ukraine on ensuring competitive conditions for the production of electricity from alternative sources](#) (the draft law on the introduction of green auctions and updated conditions for the application of the green tariff) was developed on MPs amendments, which were proposed for the second reading. Based on the analysis, comments were added to six amendments referring to the use of renewable fuels from municipal waste as an alternative source of energy due to their non-compliance with the commitments of Ukraine in the field of European integration and EU law. The analysis was taken into account - the corresponding amendments were rejected. The draft law is adopted as a whole.
- **Two analytical notes** were developed to assist the MPs in the process of reviewing the draft laws: “On ozone-depleting substances and fluorinated greenhouse gases” (9082) and “On basics of monitoring, reporting and verification of greenhouse gas emissions” (9253), which were adopted by the parliament in the first reading. Follow-up hands-on advisory support was provided to the VRU committee members and MENR after the adoption in the first reading.

- Four draft laws on reducing the use of plastic bags (6020, 9507, 9507-1, 9507-2) were analysed. Also, one draft law (9507) has been re-analysed in the revised version. The Project also prepared an analytical note on EU experience and regulations the area, and several comments and recommendations were made. Observations and recommendations were partially taken into account in the draft law 9507 and almost completely taken into account in the draft law 9507-2 (alternative).

- Seven draft laws on waste (3198, 3198-1, 3374, 4835, 5354, 6602, 7127) were analysed for harmonisation and compliance with the EU-Ukraine Association Agreement and EU acquis. The results of the analysis have shown that all draft laws, fully or partially, do not comply with EU legislation, and are fragmentary, while current legislation of Ukraine requires complex changes to meet the EU integration commitments. Recommendations were provided to each draft law (7 recommendations). The parliament considered none of these draft laws.

- Analytical note and legal opinion were prepared on draft Law of Ukraine 4028 “On packaging and packaging waste” on its compliance with EU-Ukraine AA commitments and EU acquis. Following the analysis, several observations have been made that indicate the need for substantive revision of the draft law or for the development of a new version. The parliament did not consider the draft law.

- Analytical note and legal opinion were prepared on draft Law of Ukraine 8609 “[On the Basic Principles of State Policy in the Field of Energy Security of Ukraine](#)” on its compliance with EU-Ukraine AA and Energy Community commitments, EU acquis. UNDP provided recommendations for further elaboration. The parliament did not consider the draft law.

- Analytical materials were developed to assist the MPs in the process of reviewing in the first reading the Draft Laws 8159-d “On Amendments to the Tax Code of Ukraine and Certain Legislative Acts of Ukraine on Stimulating the Development of the Electric Transport Industry in Ukraine” and 8160-d “[On Amendments to the Tax Code of Ukraine and Certain Legislative Acts of Ukraine on stimulating the development of the electric transport industry in Ukraine](#)” with a detailed explanation of the existing international obligations of Ukraine in the area of European integration, description of challenges to be addressed and economic consequences for the state. The parliament did not consider the draft laws.

DRAFT LAWS IN SEE AREA (VIII convocation) (analysis/recommendations provided)

- 1) 3198 “On amendments to certain legislative acts of Ukraine in the field of waste management regarding prevention of the negative impact of waste of end use of products on the environment”
- 2) 3198-1 “On amendments to certain legislative acts of Ukraine on household waste management and encouragement of their use as an alternative energy source”
- 3) 3374 “On amendments to the Law of Ukraine “On Waste”
- 4) 4028 “On packaging and packaging waste”
- 5) 4835-d “On amendments to certain laws of Ukraine on the promotion of the use of household waste as an alternative energy source”
- 6) 5354 “On amendments to certain laws of Ukraine on hazardous waste management”
- 7) 5614 “On the system of collection and disposal of used packaging”
- 8) 6020 “On regulation of production, use, import and distribution of polymer bags in Ukraine”
- 9) 6602 “On amendments to the Law of Ukraine “On Waste”
- 10) 7127 “On amendments to the Law of Ukraine “On Waste”
- 11) 8159-d “On Amendments to the Tax Code of Ukraine and Certain Legislative Acts of Ukraine on stimulating the development of the electric transport industry in Ukraine”
- 12) 8160-d “On Amendments to the Customs Code of Ukraine on stimulating the development of the electric transport industry in Ukraine”
- 13) 8449 “On amendments to certain laws of Ukraine on ensuring competitive conditions for the production of electricity from alternative energy sources”
- 14) Ukraine 8449-d “On amendments to certain laws of Ukraine on ensuring competitive conditions for the production of electric energy from alternative energy sources”
- 15) 8138 “On state regulation of detergents” (not considered by the Parliament)
- 16) 8609 “On the Basic Principles of State Policy in the Field of Energy Security of Ukraine”

- Analytical materials, including recommendations on legal and fiscal incentives to stimulate and promote electric vehicles purchase, switch to electric vehicles and development of E-vehicle infrastructure, based on best international practices and existing lessons learned in Ukraine, were developed to assist the MPs in the process of development and reviewing the Draft Law №10405 “On Amendments to Certain Legislative Acts of Ukraine on Creating Access to Infrastructure for Electric Vehicles Charging Stations”. The bill was voted through the Verkhovna Rada on 11 July 2019 and signed by the President of Ukraine on 6 August 2019. The law came into force on 1 January 2020.
- Analytical review of draft laws, which were re-registered for the parliamentary consideration in the 2nd hearing by the 9th convocation of the parliament, was provided to the new members of the VRU Committee on Environmental Policy and Nature Management (№0869, 0870, 0873, 0874, 0875).
- Comprehensive analysis and recommendations on improvement of draft laws on waste management (№2207, 2207-1 and 2207-2), aimed at implementation EU Waste Framework Directive 2008/98/EC conducted on compliance with the obligations of Ukraine under the EU-Ukraine Association Agreement and EU law and provided to the VRU Committee on Environmental Policy and Nature Management.
- Analysis and comparison of draft laws on plastic bags regulation in Ukraine (№2051 and 2051-1) were conducted and provided to the VRU Committee on Environmental Policy and Nature Management for consideration. Draft law №2051-1 successfully passed the first hearing with 365 votes in favour in November 2019. Following the Committee’s request to the Project, UNDP provided additional analysis of the draft law further consideration for the second hearing.
- Comprehensive analysis of draft law “On Emerald Network” on its compliance with EU law, in particular, EU Habitats Directive 92/43/EEC was conducted with development of recommendations on the draft law improvement before its registration in the VRU. Project experts work directly with draft law developers, including the subcommittee on nature protection of the VRU Committee on Environmental Policy and Nature Management.
- So-called ‘sectoral’ draft laws “On batteries and accumulators” (№2352) and “On waste electronic and electric equipment” (№2350) analyzed by the Project on their compliance with the obligations of Ukraine under EU-UA Association Agreement and relevant EU Directives.

**DRAFT LAWS IN SEE AREA
(VIII convocation) - continuation
(analysis/recommendations provided)**

- 17) 9082 “On ozone-depleting substances and fluorinated greenhouse gases”
- 18) 9253 “On basics of monitoring, reporting and verification of greenhouse gas emissions”
- 19) 9260 “On Amendments to the Tax Code of Ukraine and certain other legislative acts of Ukraine on improving the administration and revision of rates of individual taxes and fees”
- 20) 9336 (9336-1) “On state nature conservation service” (not considered by the Parliament)
- 21) 9507 “On the reduction of the number of individual types of polyethylene waste in civilian circulation”
- 22) 9507-1 “On restrictions for use of certain packaging”
- 23) 9507-2 “On reducing the use of plastic bags”
- 24) 10411 “On waste management” (not considered by the Parliament)
- 25) 10405 “On Amendments to Certain Legislative Acts of Ukraine on Creating Access to Infrastructure for Electric Vehicles Charging Stations”

- Analysis of draft law "On State Environmental Control" (№3091) conducted on compliance if its regulations with EU law, including EU Council Recommendation 2001/331/EC, conducted and shared with MPs for consideration before the Draft Law's first hearing.
- Analysis of the draft law "[On amendments to the Law of Ukraine On Environmental Impact Assessment to prevent the occurrence and spread of the coronavirus disease \(COVID-19\)](#)" (№3438) on compliance with EU Law and current anti-pandemic practices conducted on request of the MP and shared with Environmental Committee and IFU in order to improve the draft law's provisions before the second hearing.

Green Agenda for Ukraine till 2030, the list of specific priorities in sustainable energy and environment area, was developed based on a series of consultations with MPs and other stakeholders and presented by MPs for public discussion on 19 March 2019. The Green Agenda was subsequently offered to a broader public for review and online voting to receive comments from the public and adjust the priorities if needed.

The agenda has been finalized and published to serve as a guiding tool for the MPs and a wider circle of stakeholders.

GREEN AGENDA PRIORITIES

- Green Economy
- Waste Management
- Quality and longevity of life
- Clean and safe transportation
- Renewable energy
- Climate action
- Sustainable development of rural communities and organic agriculture
- Environmental protection
- Green Cities
- Energy Efficiency and Energy Saving

DRAFT LAWS IN SEE AREA (IX convocation) - continuation (analysis/recommendations provided)

- 26) 0869 "On amendments to certain legislative acts of Ukraine on ensuring unimpeded access of citizens to the coast of water bodies for general water use"
- 27) 0870 "On amendments to certain legislative acts of Ukraine on the protection of fauna and flora in accordance with international agreements"
- 28) 0873 "On amendments to certain legislative acts of Ukraine on the establishing a prohibition of continuous felling of fir-beech forests on the mountain slopes of the Carpathian region"
- 29) 0875 "On basics of monitoring, reporting and verification of greenhouse gas emissions"
- 30) 2115 "On amendments to certain legislative acts in the field of waste management"
- 31) 2051 "On reducing a number of plastic bags in civilian circulation"
- 32) 2051-1 "On limitation the plastic bags circulation at the territory of Ukraine"
- 33) 2207 "On household and other waste management"
- 34) 2207-1 "On waste management"
- 35) 2207-2 "On waste"
- 36) Draft Law "On Amendments to Some Legislative Acts of Ukraine Concerning the Immediate Crisis Management of Forest Fires"
- 37) Draft Law "On Energy efficiency"
- 38) 2352 "On batteries and accumulators"
- 39) 2350 "On waste electrical and electronic equipment"
- 40) Draft Law "On Emerald Network"
- 41) 3091 "On State environmental control"
- 42) 3438 "On Amendments to the Law of Ukraine "On Environmental Impact Assessment to prevent the occurrence and spread of the coronavirus disease (COVID-19)"

UNDP conducted a nationwide survey in February 2020 to assess citizens perceptions and priorities in the sustainable energy and environment area. Among other questions, respondents were asked about their opinion on the most pressing environmental challenges for Ukraine (among Green Agenda priorities) that must be addressed in the nearest five years.

Which Green Agenda priorities should be focused upon in the following five years?

RANKING OF GREEN AGENDA PRIORITIES

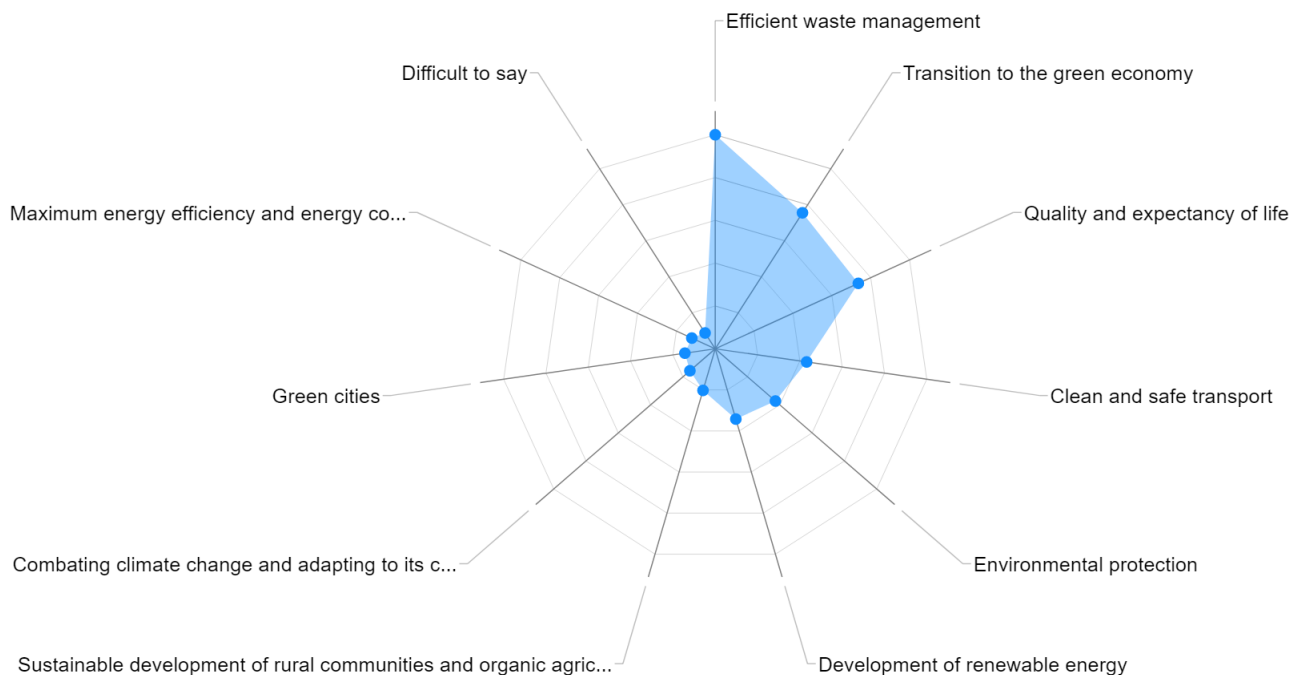

Source: UNDP survey "Perceptions and priorities of Ukrainians in SEE area", February 2020

- Waste Management - 52 per cent
- Green Economy - 40 per cent
- Quality and longevity of life - 39 per cent
- Clean and safe transportation - 23 per cent
- Environmental protection - 20 per cent
- Renewable energy - 18 per cent
- Sustainable development of rural communities and organic agriculture - 11 per cent
- Climate action - 8 per cent
- Green Cities - 8 per cent
- Energy Efficiency and Energy Saving - 6 per cent

(% among all respondents, n=2038, each respondent could select up to 3 responses)

In your opinion, which of the following objectives in the sphere of sustainable energy and the environment (Green Agenda) must be fulfilled as priority objectives in Ukraine within the next five years?

● 2020

The research "[Best international practices for reducing the use of plastic bags](#)" was developed and shared with partners/participants of the "Day without polyethylene" campaign, including parliamentarians and other interested stakeholders (downloaded by at least 220 people).

[White Paper on Distributed Energy Technologies and Resources Deployment in Ukraine](#) developed by the Project, which was preceded by a series of stakeholders' consultations. The White Paper includes definitions to be used in legislation, target market conditions, an overview of bankability as the main criteria for reaching target market conditions, social preconditions for the use of distributed energy

resources, grid segmentation, as well as recommendations for an increase of markets granularity and providing clear price signals to consumers.

Review of [Environmental commitments under the EU-UA Association Agreement and state of play of relevant policy of Ukraine](#) was developed and designed by the Project. The reports cover already implemented commitments, tasks for the parliament of Ukraine, next steps for the Government and local authorities, stakeholders' engagement and additional actions for Directives implementation in the following sectors: access to environmental information, air quality, waste and resources management, water quality and management of water resources, including the marine environment, environment protection, industrial pollution, climate change and ozone layer protection, and GMOs. The report was presented to MPs and assistants to MPs during the two-days intensive training on environmental commitments under the AA on 6 and 7 November 2019. The updated document was produced in March 2020 and shared with MPs.

[Climate action roadmap for the parliament of Ukraine](#) developed by the Project as per the request from the VRU Committee on Environmental Policy and Nature Management. It includes the overview of potential a) legislative activity in the fields of climate change mitigation and adaptation, including obligations taken per the Paris Agreement, b) local development issues, c) cross-ministerial coordination, d) international climate cooperation and e) institutional development options that might be mainstreamed by the Members of Parliament. The Roadmap was intended to be presented during the climate policy event in April in cooperation with the VRU Committee on Environmental Policy and Nature Management. However, due to quarantine restrictions, the other possible options of its presentation are being discussed with the stakeholders.

[Guidebook on environmental policy for the Members of Parliament](#) developed and designed by the Project, aimed at providing the Members of Parliament with key information on policy development and implementation, basics of EU policy and law in the field of environment, international environmental agreements, stakeholders in environmental policy and other relevant information. The guidebook was presented during an online event on 28 May 2020 where MPs with the broad engagement of MPs and their assistants.

Activity 2: Provide organizational support to the Parliament of Ukraine on SEE issues

- 2.1. Organize meetings of the Parliament members working on SEE issues on a quarterly basis.
- 2.2. Organize seminars at the relevant Parliament Committees.
- 2.3. Organize professional events involving Parliament members, Government representatives, think-tanks and CSOs (discussions, roundtables, meetings, public hearings).
- 2.4. Organize roundtables and workshops in the regions of Ukraine.
- 2.5. Maintain media visibility on SEE issues.

Under this output, the project team of experts provided organizational and communication assistance to the parliament by working closely with the inter-faction union of MPs “Green Power Shift” during 2018/19 (8th convocation); VRU Committee on Environmental Policy and Nature Management and inter-faction union of MPs “Energy and Environment” during 2019/20 (9th convocation), as well as other MPs and representatives of national and regional governmental institutions.

- **Two hundred and fifteen (215) Members of Parliament, national and local government representatives, VRU staff (128 women, 87 men)** improved their skills and knowledge on SEE issues through meetings, workshops, discussions and other events during the reporting period.
- **Two hundred and sixty-two (262) Members of Parliament, national and local government representatives, VRU staff (145 women, 117 men)** became more knowledgeable of SEE issues through all advocacy and communication activities of the Project (events, analytical notes, articles, informational products and other materials distributed online and in-person).
- **Twenty-three meetings** were conducted with the Members of Parliament working on various SEE issues to provide analytical support, including on SEE legislation making.
- **Three meetings** were held by July 2019 with the Secretariats of the Parliamentary Committee on Environmental Policy [...] and Committee on Energy and Fuel Complex [...] to identify needs in analytical and advisory support on SEE issues:
 - The Secretariat of the Energy Committee has requested assistance in training the personnel through a short-term leadership and management programme. The process is currently on hold given the announcement of snap parliamentary elections on 21 July 2019. Upon further agreement with the secretariats of the committees, the training sessions will be provided jointly with the EU-UNDP Parliamentary Reform Project.
 - The Environmental Committee has officially requested the assistance in strengthening the analytical capacity of the Secretariat by deploying a dedicated specialist to support the Secretariat and Committee. The process has been paused pending further consultations with the Secretariat due to early parliamentary elections.
- **Eleven meetings** were held with the newly created VRU Committee on Environmental Policy and Nature Management, as well as new IFU "Energy and Environment" to establish partnerships and identify needs in analytical and advisory support on SEE issues. The meetings were dedicated to needs assessment of the new committee in analytics, facilitation and laws advocacy. Two separate sessions were dedicated to analytical and legislative support for IFU.
- **Thirty one (31) event** involving Members of Parliament, representatives of the government, think tanks and CSOs were organized:
 - *Roundtable on SEE priorities for the parliament* (Project launch event) held on 19 December 2018 (67 participants: 31 men, 36 women). The vision of MPs, governmental institutions and civil society regarding the priorities of Ukraine priorities in the field of sustainable energy and environment were presented and discussed. Key Project goals, tasks and expected activities were presented to stakeholders.
 - *Round table on the role of parliament in achieving SDGs* (including presentation of the IFU Green Power Shift) held on 25 February 2019 (50 participants: 17 men, 33 women). The role of national parliaments in supporting and monitoring of SDGs achievement, including the Goals related to climate change, environment protection and sustainable energy was discussed. The Project was also presented as one of the tools for environmental issues integration in the Parliament activities.
 - *Presentation of the Green Agenda for Ukraine till 2030* held on 19 March 2019 (85 participants: 40 men, 45 women; 239 participants viewed online). During the event, the Green Agenda for Ukraine till 2030 was presented and discussed, the Omnibus results on public priorities in SEE issues were presented and disseminated; examples of international experience of environmental agenda promotion were discussed. Advisory meetings with the MPs on environmental draft laws as a part of Environmental Day in parliament were held (three draft laws were adopted in the first hearing on 28 February 2019 - the draft law on greenhouse gases

monitoring, reporting and verification, draft law on ozone-depleting substances, and draft law on Environmental Policy Strategy of Ukraine till 2030).

- *Green Agenda for Ukraine panel discussion within the UN Environmental Forum* was held on 14 May 2019 (at least 200 participants of the event; 1,249 participants viewed online: 16 per cent men, 84 per cent women). The issues of available financing for environmental activities, the role of media in Green Agenda promotion, views of business and youth on the green priorities were discussed.
- *Media training within the School of Environmental Journalism* organized on 17 May 2019 in Kyiv (30 participants: 10 men, 20 women; 733 participants viewed online). Media training covered such topics as European integration in the environmental sphere, writing about climate change, environmental impact assessment and strategic environmental assessment, a transition to 100 per cent renewable energy, working with open data (air, water and finances).
- *Public discussion and presentation of the findings of the report "Green Agenda during Parliament Elections in Ukraine: is mission possible?"* held 21 May 2019 (44 participants: 17 men, 27 women; 121 participants viewed online). During the event, the results of the analysis on incorporating the green component in the election programmes of the candidates running for presidential elections in 2019 were presented, as well as the key outcomes of the "President's Environmental Portrait" information campaign run by the Coalition of Environmental NGOs.
- *Introductory meeting with the retailers to discuss the "Day without polyethylene" campaign*, organized together with MPs, the Ministry of Environment and Zero Waste Ukraine (22 participants: 4 men, 18 women), and subsequent online webinar for NGOs on (viewed by 308 participants) and for retailers/markets (viewed by 448 participants).
- *Media training within the School of Environmental Journalism* organized on 11 July 2019 in Lviv (24 participants: 1 man, 24 women). The training covered the following topics: reforming of environmental policy within the EU, writing about climate change and adaptation, key local (Lviv oblast) environmental problems and their solutions, avoiding myths about waste management and working with online data on waste statistics.
- *Media training within the School of Environmental Journalism* organized on 20 August 2019 in Kramatorsk (26 participants: 5 men, 21 women). The training covered the following topics: writing about environmental reforms, climate change and adaptation, key local environmental problems and their solutions, avoiding myths about waste management.
- *A series of discussions with stakeholders to develop a White Paper on the deployment of distributed energy resources in Ukraine* was launched on 2 October 2019 (28 participants: 20 men, 8 women). The first event featured a presentation of a legislative definition of distributed energy resources and an analysis of legislative and regulatory loopholes in DER deployment, as well as further steps needed to integrate DERs with Ukrainian legislation. The following discussion with a *presentation of the draft White Paper*, including legislative and regulatory actions required for optimal distributed energy resources and technologies use, was held on 18 November 2019 (31 participants: 20 men, 11 women). *The final report was presented* during the press-briefing on 9 December 2019, engaging assistants to MPs, media and experts (12 participants: 9 men, 3 women).
- *Discussion "Green Agenda for Ukraine: Integration of Priorities from Elections to the Session Hall"* held on 3 October 2019 (56 participants: 18 man, 38 women; 122 participants viewed online) on the results of the analysis of Green Agenda issues inclusion into the programmes of political parties and majoritarian candidates to the Parliament of Ukraine during the parliamentary elections in 2019, but, importantly, on translating promises into policy and on a role of public initiatives in shaping the environmental demand.
- *Media training within the School of Environmental Journalism* organized on 8 and 9 October 2019 in Odesa (23 participants). The training covered the following topics: writing about environmental reforms, climate change and adaptation, Environmental Impact Assessment and

Strategic Environmental Assessment, critical local ecological problems, waste management, water policy and water monitoring.

- *A series of Intensive training on Strategic Communications about Energy and Environmental Policy* for assistants to MPs held on 28 October 2019 and on 25 November 2019. The first training module covered an overview of critical reforms in the field of environment protection and renewable energy support, main stages of developing a communication strategy and carrying communication campaign with limited resources (11 participants). The second training module included techniques for visualization and presentation and secrets for successful interview/media communications (8 participants). During both pieces of training, participants applied in practice their new knowledge, solving real cases and examples.
- *EU-UA Environmental Platform* series of facilitating events launched in cooperation with the VRU Committee on Environmental Policy and Nature Management, aimed at analyzing progress in development and implementation of related Ukrainian legislation in line with EU aqua, as well as identifying decisions to be made at the legislative and regulatory levels to reach required goals in terms of EU-UA integration. The *EU-UA Environmental Platform No.1* focused on air quality and protection and air pollution monitoring policies held on 5 November 2019 (18 participants: 7 men, 11 women) in the premises of VRU Committee on Environmental Policy and Nature Management. It raised actual issues of the relevant EU Directives implementation in Ukraine, especially the Air Quality Directive (2008/50/EC) and Industrial Emissions Directive (2010/75/EU).
- *EU-UA Environmental Platform No.2* held on 13 November 2019 (48 participants: 20 men, 28 women) and focused on actualizing implementation of EU legislation on access to environmental information and environmental open data. The key challenges were confronting Ministry of Energy and Environment Protection and other authorities responsible for data gathering, processing and publication, as well role of public initiatives in the cycle of environmental data management.
- *EU-UA Environmental Platform No.3* focused on climate policies and related obligations within the Association Agreement, in particular enabling GHG monitoring, reporting and verification (MRV) system. The event was held on 2 December 2019 (93 participants: 33 women, 60 men), and gathered a wide number of stakeholders from Government, Ministry of Energy and Environmental Protection, VRU Committee on Environmental Policy and Nature Management, legislation drafters, business and expert society. The main discussion was taken around further economic tools (carbon tax or emission trading system) to be implemented based on the CO2 emissions monitoring results.
- *EU-UA Environmental Platform No.4* was held on 10 March 2020 (65 participants: 31 women, 34 men) and focused on legislation that needs to be developed and implemented in the sphere of environmental protection - to comply with EU Habitat and Birds Directives. Draft Law "On Emerald Network" was presented and discussed with the key representatives of the VRU Committee on Environmental Policy and Nature Management, Ministry of Energy and Environment Protection, business and research community, civil society organizations and other stakeholders.
- *Intensive Training on Environmental Policy and EU Association Agreement* organized on 6 and 7 November 2019 for Members of Parliament (VRU Committees on environmental policy, on housing and utilities, and IFU "Energy and Environment"). The first training day (6 November 2019, 21 participants) covered goals and place of environmental policy in AA, the importance of environmental reforms, peculiar features of AA implementation, EU law: types of EU law acts, principles of regulation, concepts and limits of approximation, cooperation with EU: bilateral bodies, their decisions, AA implementation assessment by EU. The second day (7 November 2019, 15 participants) concentrated on practices of AA implementation and cases of implementation (EU Directives on Environmental Impact Assessment, on Strategic Impact Assessment, and Water Framework Directive).

- Event "*Green Agenda during 8th VRU convocation: results and recommendations*" held on 19 November 2019 (27 participants: 17 men, 10 women). Analysis of 8th convocation's work on implementing Green Agenda, as well as recommendations for further improvement were presented to MPs.
 - *Green Agenda for Ukraine: Regional Dimension* series of events launched by Project, aimed at drawing attention to regional aspects of environmental policies development and implementation, in line with SDGs achievement and EU-UA Association Agreement implementation on the local level. First regional event held in cooperation with RPP in Svyatogirsk, Donetsk Oblast on 20 and 21 November 2019 (75 participants: 36 women, 39 men) within the Environmental Partnership Forum. Separate Green Agenda discussion panel raised questions about environmental monitoring, environmental tax distribution on the local level, and the role of civil society in promoting environmental agenda on the regional level.
 - Second *Green Agenda for Ukraine: Regional Dimension* event was held in Khmelnytskyi on 5 December 2019 (28 participants: 15 men, 13 women) in partnership with Khmelnytskyi City Council and City Mayor, Smart Environment Khmelnytskyi and public initiative Waste Ukraine Analytics. Open discussions focused mainly on the impact of the national environmental policy on the local level and on the tools and opportunities available for local communities to influence regional environmental performance.
 - Third *Green Agenda for Ukraine: Regional Dimension* event was held in Dnipro on 24 February 2020 (29 participants: 19 women, 10 men), and focused on critical environmental problems for the region- water and air pollution, specifically, on the role of the regions to perform obligations in line of the EU-UA Association Agreement and other international commitments, role and responsibilities of business, local authorities and the public, as well as current results in implementation of water and air quality protection policies. Public discussions engaged representatives from Dnipro city council, Dnipropetrovsk State Regional Administration, local business and NGOs.
- Workshop "*How to navigate the complexities of energy and environment issues?*" held in cooperation with UNDP project "Energy Efficiency Expert Hub" and Dixi Group on 29 November 2019 (39 participants: 28 women, 11 men). The workshop aimed to educate journalists, regional and national media representatives, bloggers on primary obligations of Ukraine under the Association Agreement in energy and environmental sectors, latest status of key environmental policy reforms and its connection to policy agenda in Ukraine, typical mistakes and misunderstandings when writing about the environment, and on how environmental priorities might impact political programmes (in a game format). Participants expressed interest to participate in the journalism competition on the environmental topics if any announced in the future.
- A two-day intensive workshop entitled "*Current issues of environmental policy at the national, European and international levels: concepts, practices, the role of parliament*" was held in Kozyn, Kyiv Oblast, on 27 and 28 February (27 participants: 9 men, 18 women). The main objective of the event was to provide essential information and tools for sustainable energy and environmental policy development in line with international obligations. Members of Parliament and assistants to MPs actively participated in the practical sessions, which included all aspects of the policy development cycle, sources of information, international environmental agreements and their implementation, EU environmental law, environmental policy stakeholders.
 - Online event "*Green Agenda for Ukraine: Challenges for the Parliament of Ukraine*" was conducted on 28 May (19 participants: 12 women, 7 men). Participants discussed the current status of implementing Green Agenda priorities (9th VRU convocation) and level of involvement of MPs from other committees of the Verkhovna Rada in developing legislation in the field of sustainable energy and environment; critical threats and risks from the

implementation of the European Green Course for Ukraine and the role of parliament. The Guidebook on Environmental Policy was also presented to MPs and their assistants

- Series of online thematic events "*Green Agenda vs COVID-19: Safety, Risks and Opportunities during and after the pandemic*" were held between 1 and 5 June (162 participants: 114 women, 48 men):
 - The first day (1 June 2020) was dedicated to the discussion on *waste management* during the pandemic. Participants learned more about plastic pollution, medical waste amid COVID-19 and ways of using the pandemic to accelerate a transit to a circular economy. -
 - The second virtual event (2 June 2020) focused on the *climate change issues* and ways to tackle those in times of coronavirus pandemic. Members of Parliament, governmental officials and eco-activists joined the online event, as well as watched online translation.
 - The third "*Energy: No back to normal*" online discussion (3 June 2020) focused on the COVID-19 as an enhancing factor in strengthening the spread of sustainable energy solutions.
 - The fourth event on 4 June 2020 focused on the *connection between the air quality and COVID-19 pandemic*, what are the risks for human health and how to mitigate them.
 - The fifth event on 5 June, World Environment Day, was dedicated to the conversation about the *biodiversity and wildlife conservation* issues with the MPs, WWF Ukraine and eco-activists.

VISIBILITY OF SEE ISSUES

Advocacy and Communications Strategy and Work Plan (*see attached as Annex IV*) for raising awareness on SEE issues and promoting Green Agenda among decision-makers and the public was developed for the duration of the Project and implementation is ongoing. Progress report, which provides information on the results and media coverage, *is attached as Annex V*.

Analytical materials developed by the Project (*see Annex I for the complete list*) were distributed through several communications channels, as described in the progress report.

Key communication activities, products and channels:

- Communications and organizational support were provided to nine project events (media advisories, invitations, presentations, social media posts, press releases).
- Draft visibility package was developed for IFU Green power shift, and later - for IFU Energy and Environment (logo, essential visual guide) and submitted to MPs for review.
- Sixteen (16) **Green Updates digests** were distributed as an email newsletter to 1052 subscribers (including 36 MPs, VRU staff and governmental representatives: 24 men, 12 women). Average open rate is 36.44 per cent.
- Eight (8) Green Analytical Updates / Green Picks (37 articles) with overviews of the latest papers and reports in the field of SEE were distributed as an email newsletter to 30 subscribers (MPs and assistants to MPs).
- Forty-eight (48) draft laws reviews - an overview of the draft laws on SEE issues to be proposed for voting on a plenary week with a short description - were distributed among the 163 Telegram channel "[Green Updates](#)" subscribers.
- 33 articles on SEE issues and sustainable lifestyle were prepared for publication at the [IFU's Facebook](#) page. Total reach of all posts over 37,000 people.
- Article on the analysis of incorporating the [green component in the election programmes of the candidates running for presidential elections in 2019](#) was published on Ukrainska Pravda.

- SEE related updates/events are regularly shared among the network of journalists, who participated in the School of Environmental Journalism (currently [Facebook group](#) with 100 members).

SCHOOL OF ENVIRONMENTAL JOURNALISM

In May 2019 the project [launched](#) a School of Environmental Journalism (SEJ) to help Ukrainian reporters from national and regional media and media-bloggers to produce more penetrating insight into such topics as European integration, climate policy, waste management and renewable energy.

In total, four modules of SEJ held in Kyiv, Lviv, Kramatorsk and Odesa, where almost 100 journalists and media activists had an overview of the critical environmental issues for Ukraine and governmental reforms in this sphere, ways they are covered in the media, typical mistakes, terminology, and the sources of information.

Each School module covered additional topics specific to the region or some new popular issues in the field of environment and sustainable energy. For example, in Lviv, waste management and the circular economy was covered with additional information about working with open data on waste management; in Kramatorsk experts from OSCE provided data and tools on environmental risk analysis from armed conflict in Eastern Ukraine; in Odesa, a separate School day was devoted to environmental problems of Black and Azov Seas, and reforms implementation in Ukraine in water sector line with EU-UA Association Agreement.

UNDP engaged experts from the Ministry of Ecology and Natural Resources of Ukraine, professional journalists, academia (NASU Institute for Economics and Forecasting, Ukrainian Research Center of Ecology of Sea and the Institute of Marine Biology of the National Academy of Sciences of Ukraine), experts from international organizations (OSCE, EMBLAS+ Project) and NGOs (Zero Waste Lviv, Waste Ukraine Analytics) to covering training modules. All experts are available

SEJ trainers are always available for comment in the closed Facebook [group](#) created for SEJ participants. Relevant environmental releases, analysis or opportunities are frequently shared with about 100 group participants.

- As a follow up for the School of Environmental Journalism, a "how-to-write-about" draft guides for media were developed, including on how to write about climate change, European integration in the environmental sphere, EIA and SEA, energy transition. First article "[Climate is already not the same](#): how to write about climate crisis" (606 views) was published by MediaLab platform (platform with various educational materials tailored for journalists/media).
- Package of educational and awareness-raising materials/articles was prepared for the "Day without polyethylene" campaign, which was distributed among partners/participants. Over 100 partners (CSOs/NGOs, businesses, opinion leaders, national and local authorities) joined a nationwide "Day without polyethylene campaign" successfully ran in cooperation with IFU, Ministry of Ecology and Natural Resources and Zero Waste Alliance Ukraine. More than 240,000 people were reached through the campaign only in social media.

- Article on the presentation of the [review of 8th VRU convocation in the implementation of Green Agenda between 2014 and 2019](#) was published by Ukrainian Crisis Media Center.
- Article on the presentation of the [White Paper on Distributed Energy Technologies and Resources Deployment in Ukraine](#) was published by UNIAN
- Project activities during the reporting period received **over 670 national and regional media mentions.**

“A DAY WITHOUT POLYETHYLENE” CAMPAIGN

To attract Ukrainians attention to the plastic pollution problem and its negative impacts, and to celebrate the International Plastic Bag-Free Day, the United Nations Development Programme, together with the Ministry of Ecology and Natural Resources of Ukraine, inter-faction union of Parliament Members “Green Power Shift” and Zero Waste Alliance Ukraine held a “Day Without Polyethylene” campaign in Ukraine. Over 100 shops, supermarkets, cafes, pharmacies, educational facilities, fast food restaurants and other companies joined the initiative to avoid single-use plastic for a day, replacing it with more environmentally-friendly alternatives. Among them were the Auchan and Spar supermarkets, the KIMS dry cleaners, and other service companies such as the YE bookshop network, the Old Lion Publishing House, IT company UniSender, the Eurasia restaurant network, and many more. Customers were able to use paper or textile grocery bags instead of plastic ones, use tongs instead of plastic gloves to pick up bread, buns and other baking products, and buy food in reusable containers and beverages in their own reusable mugs – often with a discount. Dedicated awareness-raising campaigns were held in Lviv, Zhytomyr, Kyiv, Iztaslav (Khmelnysk Oblast), Chortkiv (Ternopil Oblast), Kharkiv, Askania Nova and other cities.

The campaign raised public interest and concern about the issue, and given the publicity and attention to the topic, a draft law №2051-1 “On reducing the number of plastic bags in civilian circulation” was registered by MPs in September 2019 and passed the first hearing in November 2019. The draft law was highly appreciated by the public and gained official support from the Ministry of Energy and Environment Protection.

A full list of participating organizations can be found via this [link](#).

Materials and presentations can be found via this [link](#).

Output 2: Duty-bearers and right-holders have increased awareness and understanding of green politics and business in Ukraine

Conduct and present two gender-disaggregated public sociological surveys on SEE issues

The Project has conducted a public sociological survey on SEE issues among some 2,034 respondents *in November and December 2018* to establish the project baseline and inform the implementation of the Project and necessary adjustments.

The results of the public survey were presented during the project launch event and disseminated through social media channels. They are also available at the [UNDP website](#).

The results of the survey were presented during the events "Green Agenda for Ukraine" on 19 March 2019 and "Green Agenda in parliamentary elections in Ukraine: Is mission possible?" event on 21 May 2019. The [survey results](#) were also promoted by the coalition of 17 environmental NGOs within the campaign "Environmental Safety Agenda for the VRU".

During *February 2020*, the Project has conducted the second wave of the sociological survey on SEE issues, with some additional questions concerning climate change and energy.

HIGHLIGHTS OF THE SURVEY (DECEMBER 2018)

- 82.7 per cent of respondents believe that authorities do not act enough to solve environmental problems
- Every fourth respondent believes that MPs have a significant influence on how to solve environmental issues, followed by the Government and local authorities
- 45.6 per cent of respondent believe that a clear position on environmental protection and sustainable energy by political parties can be a determinant factor when deciding for a candidate when voting
- The top five environmental issues for respondents include: water pollution and poor drinking water (59.9 per cent), deforestation (59.1 per cent), air pollution (51.6 per cent), environmental pollution by households (47.8 per cent) and industrial waste (34.2 per cent).

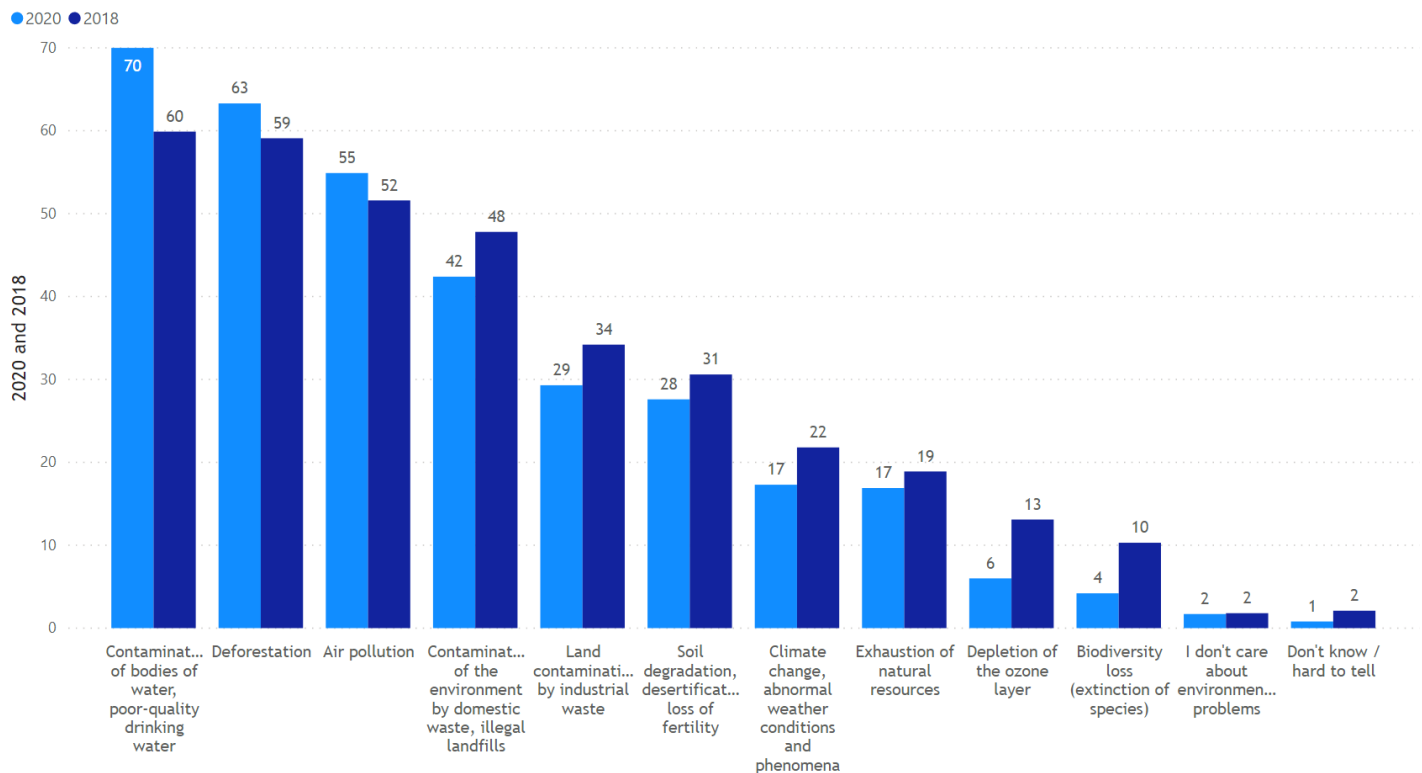

The survey results showed some significant changes in public perceptions in the field of sustainable energy and environment. For example, 70 per cent of Ukrainians marked water pollution as a top priority environmental problem (only 60 per cent in 2018). Visible changes have occurred in public perceptions regarding the importance and interconnection of environmental protection and economic growth. The percentage of those attaching equal attention to both has increased by 10 per cent (from 60 to 70 per cent). Also, the rate of Ukrainians ready to act based on environmental considerations have visibly increased since 2018. Public perceptions on the most influential actor in tackling environmental challenges did not change since 2018: most respondents consider citizens themselves the biggest influencer (31 per cent versus 30 per cent in 2018), followed by the Verkhovna Rada of Ukraine (26 per cent versus 25 per cent in 2018).

HIGHLIGHTS OF THE SURVEY (FEBRUARY 2020)

- **86 per cent**↑ of respondents believe that authorities do not act enough to solve environmental problems
- **Every fourth respondent** believes that MPs have a significant influence on how to solve environmental issues, followed by the Government and local authorities
- **44.3 per cent** ↓ of respondents believe that a clear position on environmental protection and sustainable energy by political parties can be a determinant factor when deciding for a candidate when voting
- **The top five environmental issues** for respondents include: water pollution and poor drinking water (70 per cent ↑), deforestation (63.3 per cent ↑), air pollution (54.9 per cent ↑), environmental pollution by households (42.4 per cent ↓) and industrial waste (29.3 per cent ↓)
- **The top 5 environmentally friendly practices** that people claim to be already doing or ready to do include: sorting waste (52 per cent), reduce the use of plastic packaging (37 per cent), reduce electricity and gas consumption (33 per cent), improve energy efficiency of residential buildings (31 per cent), eat more products produced locally/on their own and use public transport more frequently instead of private car/taxi (both 20 per cent).

RANKING OF ENVIRONMENTAL ISSUES

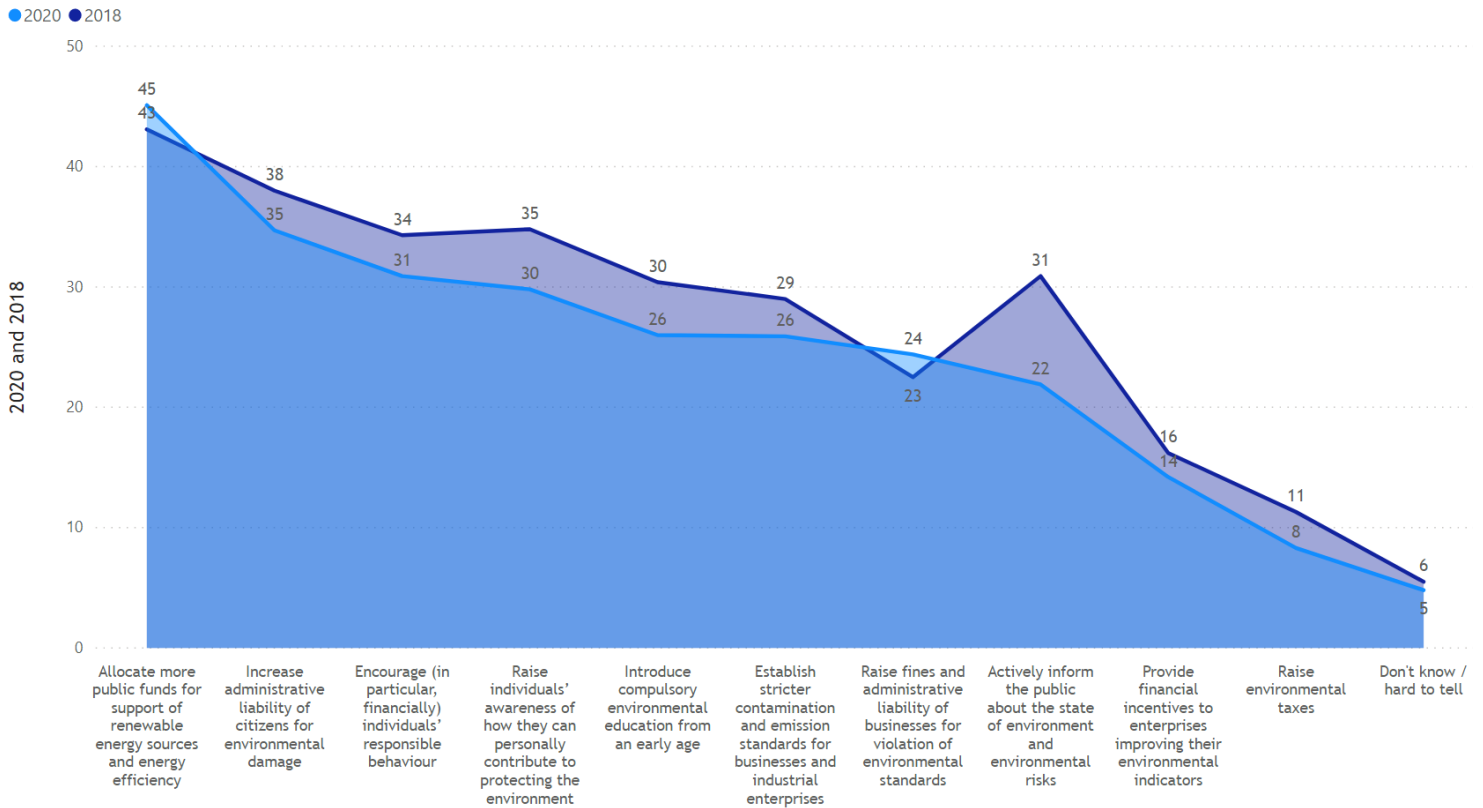

Source: UNDP surveys "Perceptions and priorities of Ukrainians in SEE area" (December 2018 & February 2020)

(per cent among all respondents, n=2034 (Dec 2018) & n=2038 (Feb 2020), each respondent could select up to 5 responses)

RANKING OF MEASURES REQUIRED TO TACKLE ENV ISSUES

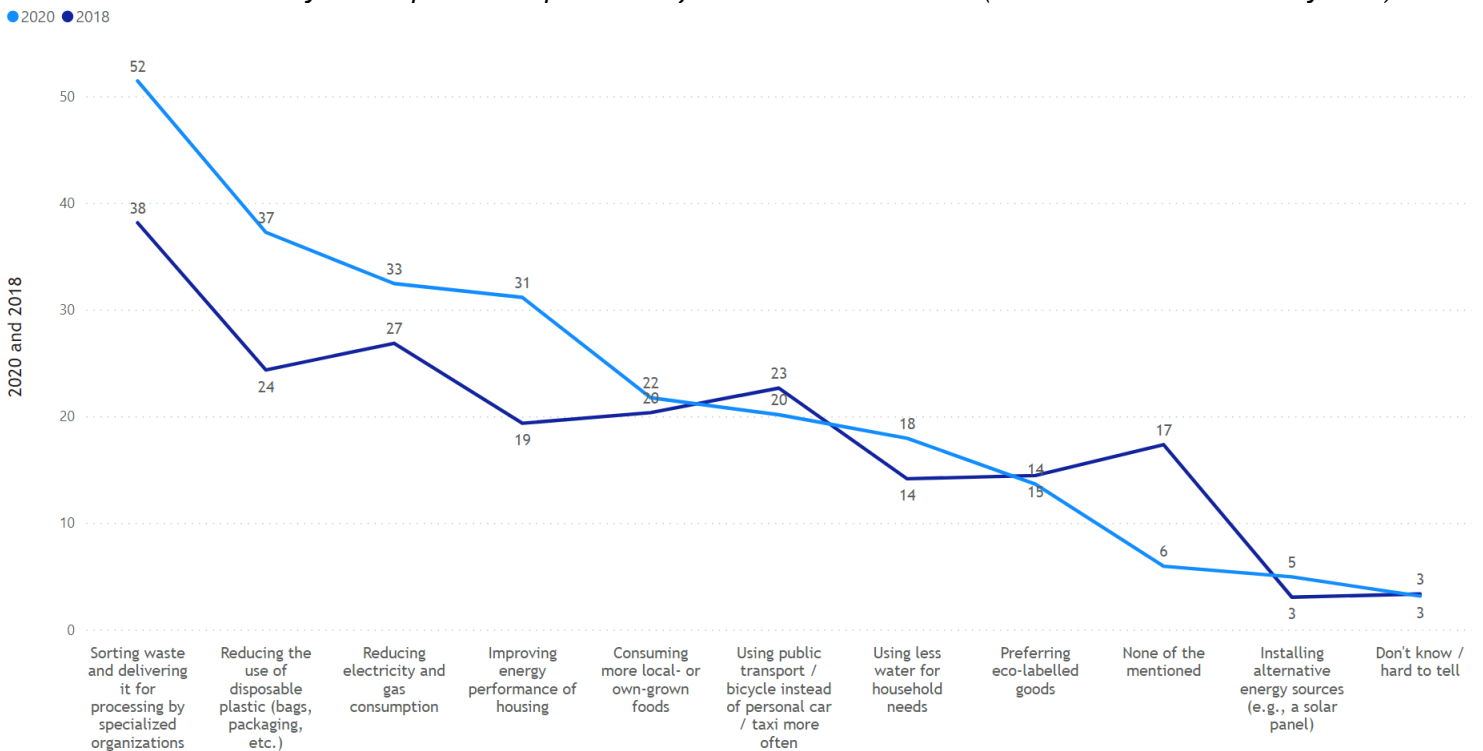

Source: UNDP surveys "Perceptions and priorities of Ukrainians in SEE area" (December 2018 & February 2020)

(per cent among all respondents, n=2034 (Dec 2018) & n=2038 (Feb 2020), each respondent could select up to 5 responses)

RANKING OF ENVIRONMENTAL PRACTICES (doing or ready to do)

Source: UNDP surveys "Perceptions and priorities of Ukrainians in SEE area" (December 2018 & February 2020)

(per cent among all respondents, n=2034 (Dec 2018) & n=2038 (Feb 2020), each respondent could select up to 5 responses)

Conduct and present an analysis on green business competitiveness of the regions of Ukraine

UNDP held consultation meetings with the MPs of the IFU “Green Power Shift” and representatives of think tanks such as Institute for Low Carbon Economy and Institute for Social and Economic Research, partner UNDP SDG Programme to determine the scope, aim and key elements of the research, which will underpin the Terms of Reference for the assignment. Furthermore, more extensive consultations with think tanks and academia were envisaged to refine the focus of the study.

Conduct and present an analysis of incorporating the green component in 2019 election programmes for the candidates for the presidency

An analysis of the election manifestos of parties and majoritarian candidates in the 2019 election to the Verkhovna Rada of Ukraine, conducted by the Project before and after the elections, showed the various parties have similar sustainable energy and environmental policy priorities.

The Project has commissioned the analysis of the election programmes of the candidates running for presidential elections in 2019.

The results of the [analysis](#) were [presented](#) to the public at the "Green Agenda in the midst of parliamentary elections in Ukraine: Is mission possible?" event on 21 May 2019 (44 participants: 17 men, 27 women; 121 participants viewed online).

Analysis of the election programmes and speeches of presidential candidates in Ukraine has shown a growing interest in environmental issues among candidates for the post of the head of state. Some 64 per cent of election programmes contain issues on the green agenda, which is 25 per cent more than in the 2014 presidential elections.

HIGHLIGHTS OF THE ANALYSIS

- 64 per cent of election programmes include green issues, which is 25 per cent more than during President elections in 2014
- None of official election programmes covers climate change issues
- Renewable energy and energy efficiency are the most frequently mentioned issues in the programmes, the rarest are nature protection, green tourism and green transport
- All of four women-candidates have thorough provisions on green issues

Conduct and present an analysis of incorporating the green component in 2019 election programmes for the political parties running for Parliament seat

However, the election campaign also showed many more green issues were being raised, and that there were areas of common interest that could unite politicians from different political parties to support the passing of legislation to protect the environment.

Compared to the 2014 parliamentary elections, the situation regarding green issues in the election programmes has not changed fundamentally, but the election discourse now includes more Green Agenda issues.

However, the most significant (difference) in this election was the development of additional, expanded environmental policy programmes by the parties, partly due to the influence of the public, public demand, and other factors.

The results of the analysis were presented to the public at the "*Green Agenda for Ukraine: Integration of Priorities from Elections to the Session Hall*" on 3 October 2019 (56 participants: 18 men, 38 women; 122 participants viewed online). The report is also available at the [UNDP website](#).

HIGHLIGHTS OF THE ANALYSIS

- 44 per cent of election programmes of the majoritarian candidates include at least one green issue, in total majoritarian candidates made 2,586 green promises
- None of official election programmes covers nature protection, biodiversity and development of the nature reserves
- Energy, water and waste were the most frequently mentioned issues raised in the election manifestos of parties
- Six political parties supported the Environmental Safety Agenda proposed by a coalition of environmental CSOs

Conduct and present an analysis of incorporating the Green Agenda in legislative process of 8th VRU Convocation (2014-2019)

Comprehensive assessment of the work of the parliament of Ukraine of the 8th convocation on developing a legislative framework for Green Agenda for Ukraine till 2030 that represents general political overview based on the analysis of the length of each relevant legislative procedure and its outcome, as well as on the performance of the legislative initiators. It also covers each Green Agenda priorities and analysis of the indicative draft laws and provides critical conclusions and recommendations for the new VRU convocation.

HIGHLIGHTS OF THE ANALYSIS

- Green Agenda consolidated all parliamentary factions, groups and no-faction members of the parliament of the 8th convocation.
- Parliament's agenda included all Green Agenda priorities, but not all treated equally important.
- Legislative work of the Parliament on systemic laws was not effective enough.
- Efficiency of the legislative initiators, adoption of the laws as final outcome of the procedure, quality of the law-drafting and transparency of the process had significant impact on the overall assessment of the legislative work of the Parliament of the 8th convocation.

Based on the analysis, several recommendations were developed for the new (9th) VRU convocation:

- increase institutional role and capacity of legislative initiators
- improve mechanisms for the adoption of systemic laws and avoiding legislative spam
- strengthen cooperation in law drafting between Parliament and the Government
- introduce tools for assessing efficiency, effectiveness and relevance of the legislation vis-à-vis its initial goals
- increase transparency and openness of the Parliament's work

[The analytical report](#) was presented to the public on 19 November 2019 during the event "Green Agenda for Ukraine: analysis and lessons from 8th VRU convocation". Members of Parliament of both 8th and 9th convocations provided their comments and reflections to the analysis' key highlights and mentioned challenges.

The report update is planned to be conducted for the VRU 9th convocation work on Green Agenda implementation.

ANNEXES:

1. List of analytical products prepared by Project
2. Analysis of draft legislation registered in the Parliament vis-à-vis SDG targets, international commitments and national strategic documents
3. 8th convocation of VRU: project legislative support mapping
4. Communications and advocacy strategy and work plan
5. Communications and advocacy progress report (as of June 2020)
6. Project monitoring indicators

Annex I. List of analytical products prepared by Project

ANALYTICAL NOTES, RECOMMENDATIONS, LEGAL OPINIONS

1. Analytical Note and legal opinion on draft Law of Ukraine 3198 “[On amendments to certain legislative acts of Ukraine in the field of waste management regarding prevention of the negative impact of waste of end-use of products on the environment](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
2. Analytical Note and legal opinion on draft Law of Ukraine 3198-1 “[On amendments to certain legislative acts of Ukraine on household waste management and encouragement of their use as an alternative energy source](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
3. Analytical Note and legal opinion on draft Law of Ukraine 3374 “[On amendments to the Law of Ukraine “On Waste”](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
4. Analytical Note and legal opinion on draft Law of Ukraine 4028 “[On packaging and packaging waste](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
5. Analytical Note on draft law 4835-d “[On amendments to certain laws of Ukraine on the promotion of use of household waste as an alternative energy source](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
6. Analytical Note and legal opinion on draft Law of Ukraine 5354 “[On amendments to certain laws of Ukraine on hazardous waste management](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
7. Analytical Note and legal opinion on draft Law of Ukraine 5614 “[On the system of collection and disposal of used packaging](#)” on its compliance with EU-Ukraine AA and EU acquis.
8. Analytical Note and legal opinion on draft Law of Ukraine 6020 “[On regulation of the production, use, import and distribution of polymer bags in Ukraine](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
9. Analytical Note and legal opinion on draft Law of Ukraine 6602 “[On amendments to the Law of Ukraine “On Waste”](#) (regarding the implementation of EU directives requirements in the field of waste management)” on its compliance with EU-Ukraine AA commitments and EU acquis;
10. Analytical Note and legal opinion on draft Law of Ukraine 7127 “[On amendments to the Law of Ukraine “On Waste”](#)” on its compliance with EU-Ukraine AA commitments and EU acquis.
11. Analytical Note on draft law 8159-d “[On Amendments to the Tax Code of Ukraine and Certain Legislative Acts of Ukraine on stimulating the development of the electric transport industry in Ukraine](#)” and key issues to be taken into account during its consideration in the Parliament on the “Eco Day”;
12. Analytical Note on draft law 8160-d “[On Amendments to the Customs Code of Ukraine on stimulating the development of the electric transport industry in Ukraine](#)” and key issues to be taken into account during its consideration in the Parliament on the “Eco Day”;
13. Analytical Note on the draft law 8449 “[On amendments to certain laws of Ukraine on ensuring competitive conditions for the production of electricity from alternative sources](#)”;
14. Analytical Note on amendments to the draft Law of Ukraine 8449-d “[On amendments to certain laws of Ukraine on ensuring competitive conditions for the production of electric energy from alternative sources](#)” for the second reading, on its compliance with EU-Ukraine AA commitments and EU acquis;
15. Comments to the draft Law of Ukraine 8449-d “[On amendments to certain laws of Ukraine on ensuring competitive conditions for the production of electric energy from alternative sources](#)” for the second reading;
16. Analytical Note and legal opinion on draft Law of Ukraine 8609 “[On the Basic Principles of State Policy in the Field of Energy Security of Ukraine](#)” on its compliance with EU-Ukraine AA and Energy Community commitments, EU acquis.
17. Analytical Note on draft law 9082 “[On ozone-depleting substances and fluorinated greenhouse gases](#)” and key issues to be taken into account during its consideration in the Parliament on the “Eco Day”;
18. Analytical Note on draft law 9253 “[On basics of monitoring, reporting and verification of greenhouse gas emissions and key issues to be taken into account during its consideration in the Parliament on the “Eco Day”](#)”;
19. Analytical Note and legal opinion on draft law 9253 “[On basics of monitoring, reporting and verification of greenhouse gas emissions](#)” on its compliance with EU-Ukraine AA commitments and EU acquis;
20. [Table of concordance of the draft law of Ukraine No. 9253 to the Directive 2003/87/EC](#)

Правові джерела для досягнення Україною Цілей сталого розвитку

Цілі сталого розвитку: Україна Національна доповідь 2017 ²	Міжнародно-правові зобов'язання України, виконання яких сприятиме досягненню Цілей сталого розвитку ³	Основні стратегічні і програмні документи, які передбачають заходи, пов'язані з Цілями сталого розвитку	Законопроекти, пов'язані з Цілями сталого розвитку, зареєстровані у ВРУ ⁴
<p>ЦІЛЬ 6: ЧИСТА ВОДА ТА НАЛЕЖНІ САНІТАРНІ УМОВИ</p> <p>Завдання 6.1</p> <p>Забезпечити доступність якісних послуг з постачання безпечної питної води, будівництво та реконструкцію систем централізованого питного водопостачання із застосуванням новітніх технологій та обладнання</p> <p>Завдання 6.2</p> <p>Забезпечити доступність сучасних систем водовідведення, будівництво та реконструкцію водозабірних та каналізаційних очисних споруд із застосуванням новітніх технологій та обладнання</p> <p>Завдання 6.3</p> <p>Зменшити обсяги скидання неочищених стічних вод, насамперед з використанням інноваційних технологій водоочищення на державному та індивідуальному рівнях</p> <p>Завдання 6.4</p> <p>Підвищити ефективність водокористування</p> <p>Завдання 6.5</p> <p>Забезпечити впровадження інтегрованого управління водними ресурсами</p>	<p>Угода про асоціацію між Україною та ЄС 2014 р.:</p> <p>Глава 13 «Торгівля та сталий розвиток» Розділу IV «Торгівля і питання пов'язані з торгівлею»;</p> <p>Глава 6 «Навколишнє середовище» і Додаток ХХХ щодо наближення законодавства України до актів права ЄС Розділу V «Економічне і галузеве співробітництво»;</p> <p>Конвенція про охорону біологічного різноманіття 1992 р.;</p> <p>Конвенція з охорони та використання транскордонних водотоків та міжнародних озер 1991 р.;</p> <p>Протокол про реєстри викидів і перенесення забруднювачів 2003 р.;</p> <p>Конвенція щодо співробітництва по охороні та сталому використанню ріки Дунай 1994 р.;</p> <p>Конвенція про захист Чорного моря від забруднення 1992 р.</p>	<p>План законодавчого забезпечення реформ в Україні, схвалений Постановою Верховної Ради України від 4 червня 2015 р. No.509-VIII (пп. 176, 389, 443);</p> <p>Програма діяльності Кабінету Міністрів України (Розділ XVII «Реформа системи управління довіллям та інтеграція екологічної політики в інші галузеві політики»);</p> <p>План пріоритетних дій Уряду на 2018 рік, схвалений розпорядженням Кабінету Міністрів України від 28 березня 2018 р. No.244-р (п. 180);</p> <p>Концепція Загальнодержавної програми розвитку та реконструкції централізованих систем водовідведення населених пунктів України на 2012 - 2020 роки</p>	<p>8138 Проект Закону про державне регулювання у сфері мийних засобів;</p> <p>8131-1 Проект Закону про державне регулювання у сфері поводження із мийними засобами;</p> <p>9125 Проект Закону про внесення змін до деяких законодавчих актів України щодо охорони водних біоресурсів та середовища їх існування;</p> <p>8347 Проект Закону про внесення змін до деяких законодавчих актів України щодо питної води та питного водопостачання;</p>
<p>ЦІЛЬ 7: ДОСТУПНА ТА ЧИСТА ЕНЕРГІЯ</p>	<p>Угода про асоціацію між Україною та ЄС 2014 р.:</p>	<p>Стратегія Сталого розвитку «Україна - 2020»</p>	<p>4849 Проект Закону про внесення змін до деяких законів України щодо забезпечення виконання</p>

² Доповідь було підготовлено Міністерством економічного розвитку і торгівлі України та схвалено Міжвідомчою робочою групою високого рівня для організації процесу імплементації Цілей Сталого Розвитку для України під головуванням Першого віце-прем'єр-міністра України – Міністра економічного розвитку і торгівлі України Степана Кубіва та Координатора системи ООН в Україні, Координатора з гуманітарних питань в Україні та Постійного Представника Програми розвитку ООН в Україні Ніла Вокера. До складу групи увійшли 17 представників міністерств та відомств на рівні заступників міністрів.

³ Згідно зі статтею Стаття 292 Глави 13 «Торгівля та сталий розвиток» Розділу IV «Торгівля і питання, пов'язані з торгівлею» Угоди про асоціацію між Україною та ЄС сторони підтверджують своє зобов'язання щодо ефективної імплементації у своїх законах та практиках багатосторонніх угод з охорони навколишнього середовища, учасниками яких вони є. Сторони співробітничать з метою сприяння обґрунтованому і раціональному використанню природних ресурсів відповідно до цілей сталого розвитку з метою зміцнення зв'язків у сфері торговельної та екологічної політики та практики Сторін.

⁴ Кожен законопроект потребує аналізу на відповідність зобов'язанням України, що випливають з Угоди про асоціацію між Україною та ЄС, інших міжнародних договорів та конвенцій у сфері європейської інтеграції. За результатами аналізу та консультацій з Верховною Радою України список може корегуватися.

<p>Завдання 7.1</p> <p>Розширити інфраструктуру та модернізувати мережі для забезпечення надійного та сталого енергопостачання на основі впровадження інноваційних технологій</p> <p>Завдання 7.2</p> <p>Забезпечити диверсифікацію постачання первинних енергетичних ресурсів</p> <p>Завдання 7.3</p> <p>Збільшити частку енергії з відновлюваних джерел у національному енергетичному балансі, зокрема за рахунок введення додаткових потужностей об'єктів, що виробляють енергію з відновлюваних джерел</p> <p>Завдання 7.4</p> <p>Підвищити енергоефективність економіки</p>	<p>Глава 13 «Торгівля та сталий розвиток» Розділу IV «Торгівля і питання пов'язані з торгівлею»;</p> <p>Глава 1 «Співробітництво у сфері енергетики, включаючи ядерну» і Додаток XXVII щодо наближення законодавства України до актів права ЄС Розділу V «Економічне і галузеве співробітництво»;</p> <p>Глава 11 «Питання, пов'язані з торгівлею енергоносіями» Розділу IV «Торгівля і питання, пов'язані з торгівлею»;</p> <p>План заходів із виконання Угоди про асоціацію (п. 762), затверджений постановою Кабінету Міністрів України від 25 жовтня 2017 р. ANNEX III. PROJECT LEGISLATIVE SUPPORT AND ADVOCACY MAPPING

9th convocation of the Parliament

N o.	Draft Law	Title / Goal	Status	Analytical Support	Communicational / Advocacy Support	Remarks
Green Economy						
1	8328	On the Basics (Strategy) of the National Environmental Policy of Ukraine until 2020	Adopted	N/A	Communication campaign for the EcoDay in Rada organized by the project, advocacy materials shared	
Renewable Energy						
2	8449d	On Auction System for Renewable Energy in Ukraine	Adopted	Analytical note on amendments for the 2 nd reading; Comments for the 2 nd reading.		Comments were made on 6 amendments concerning the use of renewable fuel from household waste as an alternative energy source (non-compliance with Ukraine's obligation in the field of EU-integration). The results of the analysis were considered - the corresponding amendments were rejected.
Waste management						
3	3198	On Amendments to certain legislative acts of Ukraine in the field of waste management concerning prevention of negative action of waste of final consumption of production	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration . The results of the analysis were considered - the draft Law was not voted.
4	3198-1	On Amendments to certain laws of Ukraine on Household Waste Management and Stimulation of Their Use as an Alternative Energy Source	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration . The results of the analysis were considered - the draft Law was not voted.
5	3374	On Amendments to the Law of Ukraine "On Waste" (on	Not voted	Analytical Note on compliance with EU-		Comments provided on non-compliance with Ukraine's obligation in

		Improving State Regulation of Waste Management)		UA AA commitments and EU acquis		the field of EU-integration. The results of the analysis were considered - the draft Law was not voted.
6	4028	On packaging and packaging waste	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-full-compliance with Ukraine's obligation in the field of EU-integration. The results of the analysis were considered - the draft Law was not voted.
7	4835d	On the promotion of use of household waste as an alternative energy source	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration. The results of the analysis were considered - the draft Law was not voted.
8	5354	On amendments to certain laws of Ukraine on conduct with hazardous waste	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. However, the reservation expressed that EU integration commitments require more complex implementation of EU acquis. The results of the analysis were considered - the draft Law was not voted.
9	5614	On the system of collection and utilization of used containers	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration. The results of the analysis were considered - the draft Law was not voted.
10	6602	On amendments to the Law of Ukraine "On Waste" (regarding the implementation of	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration.

		EU directives requirements in the field of waste management)”				The results of the analysis were considered - the draft Law was not voted.
11	7127	On Amendments to the Law of Ukraine "About waste" (concerning transfer of term)	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Comments provided on non-compliance with Ukraine’s obligation in the field of EU-integration. The results of the analysis were considered - the draft Law was not voted.
12	9507	On the reduction of the number of individual types of polyethylene waste in civilian circulation	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis + analysed revised edition	Nation-wide awareness raising campaign “Plastic Bag Free Day” organized in close cooperation with the MPs union “Green Energy Shift”, Ministry of Ecology and Natural Resources of Ukraine, Zero Waste Alliance of Ukraine. More than 100 partners - retails, service companies, educational institutions, etc. joined the campaign and lunched their own plastic-free initiatives. More than 250 thousand people were reached only with the social media campaign.	Recommendations partially considered in the revised edition
13	9507-1	On restrictions for use certain packaging	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Recommendations partially considered in the revised edition
14	9507-2	On reducing the use of plastic bags	Not voted	Analytical Note on compliance with EU-UA AA commitments and EU acquis		Recommendations for the 9507 and 9507-1 were almost fully considered during the development of 9507-2. It has been warned that the management of plastic bags is closely linked to packaging waste management, which is regulated in the EU by a separate directive and is part of the European waste management system. Therefore, a more effective way to solve the problem is to consistently adapt Ukrainian legislation to EU waste management law.
15	6020	On regulation of the production, use, import and distribution of polymer bags in Ukraine	Not voted	Analytical Note and legal opinion on compliance with EU-UA AA commitments and EU acquis; Comparative analysis of the draft laws 6020, 9507, 9507-1, 9507-2 on single-use plastic bags circulation in Ukraine		Comments provided on non-compliance with EU Directive 2015/720 as regards reducing the consumption of lightweight plastic carrier bags. The results of the analysis were considered - the draft Law was not voted.

Climate Change						
16	9253	On the basics of monitoring, reporting and verification of greenhouse gas emissions	Adopted on the 1 st reading	Analytical Note and key issues to be considered during its consideration in the Parliament; Analytical Note and legal opinion on its compliance with EU-UA AA commitments and EU acquis; Table of concordance to the Directive 2003/87/EC ; Table of concordance of draft law 9253 to Reg 600_2012	Infographics on MRV prepared to the EcoDay in Rada and disseminated among MPs; Blogs, posts and other communication materials developed and disseminated	According to the analysis, the draft law was recognized as complying to the obligations in the field of EU integration and EU law. However, the Project proposed to clarify the term "installation" in order to achieve maximum compliance with EU law. The Ministry of Ecology and Natural Resources considered the proposal in the text of the bill for the second reading. The Law adopted.
17	9082	On ozone-depleting substances and fluorinated greenhouse gases	Adopted on the 1 st reading	Analytical Note and key issues to be considered during its consideration in the Parliament	Blogs, posts and other communication materials developed and disseminated	The Law adopted.
18	9260	On Amendments to the Tax Code of Ukraine and certain other legislative acts of Ukraine on improving the administration and revision of rates of individual taxes and fees” on CO2 eco taxation	Adopted	Analytical Note on considering the draft law, including the EU-UA AA commitments	Blogs, posts and other communication materials developed and disseminated	The Law adopted.
Clean and Safe Transport						
19	10405	On Amendments to Certain Legislative Acts of Ukraine on Creating Access to Infrastructure for Electric Vehicles Charging Stations	Adopted	Draft Law developed with the project support; Explanatory note ; Analytical Note on Electric vehicles market, tendencies and opportunities for its sustainable development	Blogs, posts and other communication materials developed and disseminated	The project fully supported the development of whole draft law package. The adopted law came into force on 1 January 2020.

20	8159d	On Amendments to the Tax Code of Ukraine and Certain Legislative Acts of Ukraine on stimulating the development of the electric transport industry in Ukraine	Draft law withdrawn	Analytical Note and key issues to be considered during its consideration in the Parliament on the EcoDay in Rada	Blogs, posts and other communication materials developed and disseminated	
21	8160d	On Amendments to the Customs Code of Ukraine on stimulating the development of the electric transport industry in Ukraine	Draft law withdrawn	Analytical Note and key issues to be considered during its consideration in the Parliament on the EcoDay in Rada	Blogs, posts and other communication materials developed and disseminated	

9th convocation of the Parliament

No.	Draft Law	Title / Goal	Status	Analytical Support	Communicational / Advocacy Support	Remarks
Nature Protection						
1	0869	On amendments to certain legislative acts of Ukraine on ensuring unimpeded access of citizens to the coast of water bodies for general water use	Law adopted	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law	Communication support via relevant Telegram channel	Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. The Law adopted.
2	0870	On amendments to certain legislative acts of Ukraine on the protection of fauna and flora in accordance with international agreements	Adopted on the 1 st hearing	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law	Communication support via relevant Telegram channel	Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. The Law adopted in the the 1st hearing.
3	0873	On amendments to certain legislative acts of Ukraine on the establishing a prohibition of continuous felling of fir-beech forests on the mountain slopes of the Carpathian region	Law adopted	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law	Communication support via relevant Telegram channel	Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. The Law adopted.

4	N/A	On Amendments to Some Legislative Acts of Ukraine Concerning the Immediate Crisis Management of Forest Fire		Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law; Research "World practices in preventing forest fires"	Communication support for the draft law 2339 consideration	Analysis results were considered in the draft law 2339 (adopted)
5	N/A	On Emerald Network	Not registered yet	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law	Stakeholders consultations event within the EU-UA Environmental Platform organized on 10 March 2020, engaging MPs, GOU representatives, CSO, experts and academia	Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. Recommendations to improve the draft Law with consideration of certain articles of EU acquis provided.
6					Biodiversity and wildlife protection during and after COVID-19 pandemic issue risen during the Ecoweek "Green Agenda vs COVID-19", engaging MP, international organizations. GoU, NGOs, experts, business and academia	
Climate Change						
7	0875	On basics of monitoring, reporting and verification of greenhouse gas emissions	Law adopted	Analytical materials prepared for the 8 th convocation shared with MPs	Communication and advocacy support	
8	0874	On ozone depleting substances and fluorinated greenhouse gases	Law adopted	Analysis of proposals for the second reading on their compliance with AA, EU Law, other international commitments	Communication and advocacy support	
					Climate policy during and after COVID-19 pandemic issue risen during the Ecoweek "Green Agenda vs COVID-19", engaging MPs. GoU, NGOs, experts, business and academia	

Waste Management

9	2115	On amendments to certain legislative acts in the field of waste management	Law withdrawal	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided according to which the draft Law is not in contradiction to the EU integration commitments, however, the reservation expressed that Ukraine's waste management policy needs complex alignment with EU acquis envisaged in the AA.
10	2051	On reducing a number of plastic bags in civilian circulation		Comparative table of the draft laws on plastic bags regulation; Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law		Recommendations provided and partially considered in the revised edition 2051-1
11	2051-1	On limitation the plastic bags circulation at the territory of Ukraine	Adopted on the 1 st hearing	Comparative table of the draft laws on plastic bags regulation; Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law Analysis of amendments consideration to the second hearing	Communication and advocacy support	Recommendations provided and partially considered in the proposals to draft Law for the 2 ^d reading.
12	2207	On household and other waste management	Excluded from consideration	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration.
13	2207-1	On waste management		Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law	Communication support	This draft law was supported as the main out of three alternatives to be reconsidered in the 1 st hearing. Mostly all recommendations provided by the project were considered by the Committee in the finalized draft law (2207-1-D)

14	2207-2	On waste	Excluded from consideration	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided on non-compliance with Ukraine's obligation in the field of EU-integration.
15	2352	On batteries and accumulators	On Committee's consideration	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. Recommendations to improve the draft Law with consideration of certain articles of EU acquis provided.
16	2350	On waste electrical and electronic equipment	On Committee's consideration	Analytical note on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration. Recommendations to improve the draft Law with consideration of certain articles of EU acquis provided.
					Waste management during and after COVID-19 pandemic issue risen during the Ecoweek "Green Agenda vs COVID-19", engaging MP, international organizations. GoU, NGOs, experts, business and academia	
Maximum Energy Efficiency and Energy Saving						
17	N/A	On Energy efficiency	Not registered yet	Analysis of initial text of draft Law « On Energy efficiency » on its compliance with Directive 2012/27/EU	Draft Law stakeholders consultations supported within another UNDP/Slovak Project	Recommendations provided
18	N/A	Distributed Energy Resources and Technologies		White Paper on DER deployment	A series of consultation events on DER organized; Communication support	The topic of energy storages as one of DER technology risen by VRU Energy & Housing Utilities Committee

					Energy policy during and after COVID-19 pandemic issue risen during the Ecoweek “Green Agenda vs COVID-19”, engaging MP, international organizations. GoU, NGOs, experts, business and academia	
Green Economy						
19	3091	On State environmental control	On Committee's consideration	<u>Analytical note</u> on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration.
20	N/A	On prevention, reduction and control of industrial pollution	Not registered yet	<u>Analytical note</u> on compliance with Ukraine's obligations under the EU-UA AA and EU law		Comments provided according to which the draft law is not in contradiction with Ukraine's obligation in the field of EU-integration.
21	3438	On Amendments to the Law of Ukraine “On Environmental Impact Assessment to prevent the occurrence and spread of the coronavirus disease (COVID-19)	Law adopted	<u>Analytical note</u> on compliance with Ukraine's obligations under the EU-UA AA and EU law		MPs used the analysis results for amendments to the draft law for the 2 nd hearing, but they were rejected

ANNEX IV. COMMUNICATIONS AND ADVOCACY STRATEGY AND WORK PLAN (2019-2020)

ACRONYMS

AWP	Annual Work Plan
IFU	inter-faction union (in Parliament)
MENR	Ministry of Ecology and Natural Resources
MP	Member of Parliament
SDGs	Sustainable Development Goals
SEE	Sustainable Energy and Environment
UNDP	United Nations Development Programme

INTRODUCTION

The Communications and Advocacy Strategy and Work Plan is based on the “Sustainable Energy and Environment Secretariat to Support the Parliament of Ukraine in Sustainable Energy and Environment Area” project objectives and has been designed by taking into account the trends in the energy and environment protection fields in Ukraine, as well as international and national engagements of Ukraine. Priorities for communications and advocacy will be identified on an annual basis upon consultations with the key stakeholders and elaborated in the annual work plans.

The following **principles** will be the cornerstone of the Strategy implementation:

- **Openness and accuracy in communication.** The Strategy is based on the principle of providing fact-based and results-based, as well as evidence supported information.
- **Listening and engaging.** The actions are shaped based on the dialogical model of communication and respond to anticipated needs and expectation of stakeholders. They are aimed at increasing the engagement and the commitment of key stakeholders to becoming advocates for effective, evidence-based actions. This is particularly important in the light of Government engagement in achieving the SDGs related to environmental protection and energy.
- **Clear, concise and consistent language.** A key aspect of communication must be the use of simple, precise and user-friendly language to ensure that information is relevant to all targeted groups. “De-jargoning” and use of bespoke arguments and examples will be the main principles of external communication.
- **Coordination of communication activities with the partners and key stakeholders.** The implementation of the Strategy is based on following the UNDP communication and visibility guidelines. Joint communication activities with other partners will take into consideration the partners’ visibility and branding rules and will be subject to joint branding.
- **Monitoring and evaluation.** All activities will have an objective, a clear implementation and evaluation mechanism. The Strategy aims at ensuring learning from implemented activities to ensure continuous improvement and increase of communication efficiency. The lessons learned from the early achievements will serve as a basis for further revision and improvement of the Strategy. UNDP will monitor the implementation of the Strategy through the implementations of Annual Work Plan and update it accordingly. The monitoring will be done on a continuous basis to allow UNDP to act accordingly and modify the communications approach if not yielding expected results. A semi-annual review of the Strategy will be conducted to ensure all activities are proceeding as planned and that the goals of the strategy and AWP are timely met. Several tools that will be used to evaluate the activities, including a quantitative and qualitative analysis of the results.

PROJECT OBJECTIVES AND EXPECTED OUTCOMES

- The Parliament of Ukraine has strengthened capacity on sustainable energy and environment issues through the establishment and functioning of the Sustainable Energy and Environment Secretariat.
- Duty-bearers and right-holders have increased awareness and understanding of SEE issues.
- The quality of SEE legislation and draft laws improved.
- The likelihood of integrating green component into the pre-election campaigns increased.
- The political will behind SEE laws and reforms gets stronger.
- The politicians together with mass media contribute to stronger advocacy on the SEE issues.
- The likelihood of adopting SEE reforms and mainstreaming them into sectoral policies increased.

STRATEGY OBJECTIVES

- Cooperation with key stakeholders and partners established and maintained.
- Media visibility of the SEE issues increased and maintained.
- Awareness on SEE issues through the media for the public increased.
- Knowledge of the Government officials on the SEE issues improved.
- Analysis of legislation prepared, and results are widely disseminated.

- Recommendations on legislation amendments reviewed and considered by a legislative body.
- Public access to the project materials, concepts, recommendations including best international practices, and other relevant information ensured.

TARGET AUDIENCES

The Strategy activities primarily target stakeholders who are involved in the sphere of environmental protection and energy in Ukraine in the broadest sense, and whose commitment is crucial for achieving the UNDP's goal of prioritization and increasing investments in these areas: governmental decision makers, donors and development partners, other UNDP agencies, medium and large businesses, business associations, specialized NGOs and targeted population (school children, young people 18-24 and 25-35, owners of apartment buildings and homeowners 35-60) and business owners. Although the governmental decision makers' commitment will be encouraged through tailored advocacy actions, the communication action will serve the purpose of awareness raising and reinforcement in this regard.

Therefore, the **Strategy target audiences** are:

- Duty bearers - relevant governmental officials, politicians, including senior and middle-ranking civil servants of ministries of ecology and natural resources, energy and coal industry, economic development and trade and other ministries directly or indirectly influencing the Governmental policies in the field of environmental protection and energy, MPs for thematic parliamentary committees, local public authorities. Given the timeline of the Strategy - 2018-2020, as well as the electoral cycles, the mapping of MPs and local authorities will be conducted after each cycle of parliamentary and local elections.
- donors and international development partners of Ukraine;
- small, medium and large businesses, including the ones with strong Corporate Social Responsibility (CSR) policies as champions, in the field as motors for behavioral change;
- business associations;
- NGOs and outspoken activists in the field of environmental protection;
- media, in particular editors and journalists of key media, outspoken celebrities and influencers. This will be to ensure visibility of UNDP, but also specifically to contribute directly to a better understanding of the importance of environmental energy issues by targeted population (school children, young people 18-24, owners of apartment buildings and homeowners 35-60) and business owners and as a driver for behavior change.
- other UN agencies and international organizations;
- Academia.

Key Stakeholders to be informed of key results and the impact of the Sweden-funded support together with the successes and best practices emanating from the project - targeted group of Parliament Members (the inter-faction association of MPs "Green Power Shift"), all Parliament Members and their assistants, relevant Parliament Committee (on Environmental Policy, Nature Resources Utilization and Elimination of the Consequences of Chornobyl Catastrophe and on Fuel and Energy Complex, Nuclear Policy and Nuclear Safety, etc) and their members, Parliament Parties and their members, Government of Ukraine, relevant Ministries and Agencies (Ministry of Ecology and Natural Resources, Ministry of Energy and Coal Industry).

Civil society and key experts within the sphere (e.g. the Reanimation Package of Reforms), academia and media, who will need to be informed of the context, results.

Opinion Makers (national and regional media, civil society, key expert leaders within the sphere), who will need to be informed of the context, result areas and activities for the project, to promote and strengthen the Parliament in Ukraine on SEE and thus green development in Ukraine.

Development community and donors - information to this target group will highlight the key achievements of the project made possible through the support of Sweden.

KEY MESSAGES

The advocacy/communication actions envisaged by the Strategy are aimed at promoting the topics of environmental protection and energy efficiency, rather than just promoting the results of the Project. Listed in the table below are key messages to be disseminated within the information and awareness-raising components. These will be evidence and fact based, using the projects achievements and human stories. Additional specific messages are attached as an Annex No.1 to this document.

No.	Messages and call for actions	Target group	Channel
1.	SEE issues shall be a priority for Ukrainian Government UNDP provides analytical and expert support to the legislators in the Parliament on a variety of SEE issues to improve the quality of legislation and draft laws.	Duty bearers NGOs and community activists and influencers Business entities	Direct communication / advocacy

	<p>UNDP supports development and promoting the Green Agenda for Ukraine - top priority SEE issues to be addressed by 2030 - to increase the likelihood of integrating green component into the pre-election campaigns and strengthen the political will behind SEE laws and reforms.</p> <p>UNDP works on promotion of Green Agenda among parliamentarians to increase the political demand for these issues.</p>	<p>Donors and developmental partners UN agencies</p>	<p>Joint advocacy campaign Newsletter Website Media relations Social media</p>
2.	<p>Society must drive a demand for change to an environmentally friendly and energy efficient Ukraine.</p> <p>UNDP's priority is to support Ukraine in becoming environmentally friendly and energy efficient: from one of the most energy-intensive countries to a modern country carrying about the environment and sustainability. Focus on promoting the achievements in Ukraine through results of the existing project.</p> <p>UNDP works on promotion of Green Agenda among society to increase the political demand for these issues.</p>	<p>Donors and developmental partners UN agencies Duty bearers NGOs, CBOs and community activists Media Owners of small, medium and big enterprises Business associations</p>	<p>Direct communication / advocacy Media relations Websites Newsletter for the media Social media</p>
3.	<p>Green is the new black! Play your role and join our efforts in saving the environment.</p> <p>Encourage the society to start with a small first step and play a role in protecting the environment.</p> <p>Separate supportive messages and call for actions will be developed for environmentally friendly behaviour change and for fostering energy efficient actions.</p> <p>Environment:</p> <ul style="list-style-type: none"> - Practical advices on how to become environmentally friendly in daily life by making small changes in the routine, targeting behaviour change among school children and young people (mainly via Social Media campaigns); - Practical advices for transforming the office or business into a green one targeting young professionals and business owners. <p>Energy efficiency:</p> <ul style="list-style-type: none"> - Practical advices how to save money on energy and reduce the environmental impact and CO2 footprint as part of the strategy to be part of the green economy transition; <p>Arguments and calls for actions supported and exemplified by results which can be achieved supported by evidence and facts.</p>	<p>Young people 18-35 NGOs, CBOs and community activists Owners of small, medium and big enterprises Business owners Media</p>	<p>Media relations Social media Events</p>
4.	<p>Lead the change to a green future - make your business environmentally friendly!</p> <p>Adopt the lean approach and be the champion in the field of environmentally friendly business. Supportive messages will be developed on benefits which result from the switch to environmentally friendly practices and energy efficiency measures: profit increase, responsible attitude towards the nature and consumers, innovations and positive changes.</p>	<p>Small, medium and large enterprises Business associations Duty bearers</p>	<p>Joint advocacy Media relations Social media Events</p>

Messages - SEE Secretariat Project

Audience - Problems		
<i>General messages</i>	<ul style="list-style-type: none"> Lack of understanding of green/environmental issues and lack of political will to put Green Agenda into priority issues People would rather prefer to vote for party/candidate with clear position on environmental issues as these are issues that are important for everyday life and health of all people, including children Environmental transformation is going on slowly due to lack of political will and/or lack of technical/sector specific knowledge Governmental draft laws are moving slowly along the bureaucratic steps until they are registered in Parliament The Green Agenda issues (sustainable energy and environment) has got leadership in the Parliament just recently The "green" component of political parties and leaders programme documents is usually ignored or declarative: during the 2014 elections, environmental aspects analysis of the election programmes showed that only 14 out of 29 party programmes had relevant provisions and only a third of candidates in single-mandate constituencies had a position on environmental protection Environmental transformation has crisis addressing nature "from disaster to disaster" Lack of information on Parliament environmental legislative initiatives Ukraine has numerous international commitments in climate change, environment protection, Energy efficiency and sustainable energy issues to be implemented and integrated into national legislation 	<ul style="list-style-type: none"> Існує брак розуміння питань охорони навколишнього природного середовища, захисту довкілля і сталої енергетики і нестача політичної волі з винесення зеленого порядку денних до пріоритетних питань Виборці більш охоче голосуватимуть за партії/кандидатів з чіткою позицією стосовно захисту довкілля, оскільки ці питання безпосередньо впливають на їх щоденне життя та здоров'я Екологічні реформи рухаються повільно через брак політичної волі і/або низький рівень знань Урядові законопроекти повільно просуваються бюрократичними сходами, поки зареєструються в Парламенті Питання зеленого порядку денного (захист довкілля та стала енергетика) відносно недавно отримали власну платформу у Парламенті "Зелена" програмна складова політичних партій та лідерів зазвичай ігнорується або декларативна: як показав аналіз, протягом виборів у 2014 році 14 з 29 партійних програм містили позиції, пов'язані з захистом довкілля Екологічні реформи приймаються "від кризи до кризи" Існує брак інформації про парламентські екологічні ініціативи В Україні є ціла низка міжнародних зобов'язань з питань охорони навколишнього природного середовища, зміни клімату, енергоефективності та розвитку відновлювальної енергетики, які мають бути запроваджені на національному рівні
<i>Poll-based messages (hypothetical)</i>	<ul style="list-style-type: none"> Every third Ukrainian believes environmental issues should be put on top priorities list of national political agenda 6 Ukrainians out of 10 think that Parliament has to do more to address environmental issues 30 per cent of Ukrainians would put environmental protection as priority, even if it curbs economic growth and 20% think that these issues should be balanced in National agenda Based on poll results, authorities should make pollution standards more stringent, while creating more incentives for business to address environmental issues 	<ul style="list-style-type: none"> Кожен третій українець вважає, що питання захисту довкілля має бути пріоритетним в національному політичному порядку денному На думку 6 українців з 10, Парламент має вживати більше заходів для вирішення екологічних проблем 30% українців вважають, що пріоритет нацполітики має бути наданий захисту довкілля, навіть якщо це гальмуватиме економічний розвитку, і ще 20% схиляються до думки, що економічні та екологічні пріоритети мають бути збалансовані За результатами опитування, для вирішення екологічних проблем, потрібно посилити вимоги до бізнесу щодо зменшення впливу на довкілля, одночасно створюючи дієві фінансові механізми стимулювання заходів зі зменшення впливу на довкілля
<i>Environmental stats messages (might be expanded if necessary)</i>	<ul style="list-style-type: none"> Air pollution in 2016, according to the Institute for Health Metrics and Evaluation, has led to more than 58 thousand deaths in Ukraine 93 per cent of waste in Ukraine is landfilled and near 7 per cent of solid household waste is used as a secondary resource 	<ul style="list-style-type: none"> Забруднення повітря призвело до більш ніж 58 тисяч смертей в Україні в 2016 році, за даними Інституту показників та оцінки здоров'я В Україні на сміттєзвалища потрапляє 93% твердих побутових відходів, і близько 7% переробляється та використовується як вторинний ресурс

	<ul style="list-style-type: none"> Fines for violation of mandatory environmental requirements currently do not serve its purpose to stimulate avoidance of pollutions High level politician should address environmental risks and disasters caused by armed conflict in the Eastern Ukraine 	<ul style="list-style-type: none"> Штрафи за порушення вимог природоохоронного законодавства на сьогодні не стимулюють підприємства уникати забруднення довкілля Екологічні ризики внаслідок збройного конфлікту на Сході України повинні бути включені до пріоритетів національного порядку денного
What if problems are not addressed		
	<ul style="list-style-type: none"> Transformation of national environmental legislation in line with the best international practices would lead to sustainable environment and decreasing number and frequency of extreme events and pollution crises Failure to fulfil its international environmental and energy commitments by Ukraine (Rio Conventions, EU-UA Association Agreement, Energy Community) could lead to reputational and financial losses Without a proper energy diversification actions and transition to renewable energy and energy efficiency, Ukrainian population will continue to be “fossil fuel” dependent - gas wars, coal blockades, Rotterdam +, rolling power cuts etc. Sectoral reforms will be implemented without addressing sustainable development agenda The lack of clear positions on environmental issues in political programmes leaves the public “behind the scenes” to control the implementation of these issues after the election A significant part of parties/leaders may lose an environmentally conscious electorate, which is usually young educated people, if they cannot communicate their environmental agenda due to lack of political will Lack and/or slow adoption of environmental legislation and sustainable energy legislation delays “green”/sustainable economic growth, green investment inflow and the creation of “green” jobs. 	<ul style="list-style-type: none"> Реформування національного екологічного законодавства з урахуванням кращих міжнародних практик покращить стан довкілля та сприятиме зменшенню екстремальних природних явищ і криз, пов’язаних із забрудненням довкілля Невиконання Україною міжнародних зобов’язань (Конвенції Ріо, Угода про асоціацію між Україною та ЄС, Енергетичне Співтовариство та ін.) матиме наслідком суттєві репутаційні та фінансові втрати Без належних заходів з диверсифікації джерел енергії та переходу до відновлювальної енергетики, українське населення залишатиметься “заручником” викопного палива - газових війн, вугільних блокад, Роттердам+, віялових відключень тощо Секторальні реформи впроваджуватимуться без врахування питань сталого розвитку і захисту довкілля Брак чітких позицій з екологічних питань у політичних програмах залишає громадськість без достатнього контролю за вирішеннями цих проблем після виборів Значна частина партій/кандидатів може втратити екологічно свідомий електорат, представлений зазвичай освіченою молоддю, якщо екологічні позиції не матимуть належного комунікування через брак політичної волі Нестача або повільне прийняття законодавства у сфері охорони довкілля та сталої енергетики стримує зелене економічне зростання, притік зелених інвестицій та створення зелених робочих місць
Project - Solutions		
	<ul style="list-style-type: none"> Green Secretariat provides analytical and expert support to the legislators in the Parliament, Government(?) on sustainable energy, green growth and climate change issues to enhance national legislation framework and improve decision-making process Green Secretariat works on promotion of environmental and sustainable development issues, and green energy among parliamentarians and society in order to increase the political demand for these issues The project team will establish and manage the inclusive and transparent stakeholders’ engagement process to ensure collaborative decision-making process via roundtables, hearings, working groups and other forms of cooperation Green Secretariat will provide support on wide range of sustainable development issues: combating climate change by reducing 	<ul style="list-style-type: none"> Зелений Секретаріат надає аналітичну та експертну підтримку Верховній Раді України з питань сталої енергетики, зеленого зростання та зміни клімату для покращення національного законодавства та процесу прийняття рішень Зелений Секретаріат працює над висвітленням тем сталого розвитку, захисту довкілля, енергозбереження і відновлювальної енергетики з метою удосконалення державної політики та підвищення якості законодавчих ініціатив Команда проекту провадить інклюзивний та прозорий процес залучення зацікавлених сторін, зокрема у форматі круглих столів, слухань, робочих груп та інших форм співпраці Зелений Секретаріат надаватиме підтримку з широкого кола питань сталого розвитку: низьковуглецевий розвиток, боротьба зі зміною клімату шляхом скорочення викидів парникових газів та адаптації до негативних наслідків змін клімату, скорочення промислового

	<p>GHG emissions and adapting to negative effects of climate change, reducing industrial pollution, improving energy efficiency and deployment of renewable energy, waste management, water management, mitigating the effects of the negative impact on the environment caused by the conflict in the East of Ukraine, "green" development of Donetsk and Lugansk regions</p> <ul style="list-style-type: none"> • Green Secretariat will work on Green Agenda for Ukraine which would include the top priority issues to be addressed in the short-term period • Communication products and awareness-raising campaigns will be developed and launched to increase the political demand for environmental reforms • During the project implementation period, the population's attitude towards environmental issues will be measured which would help to develop relevant policies and behaviour change strategies • The project team will work on increasing attention to the "green" agenda in election programmes of parties and their leaders • For Green Agenda promotion, Green Secretariat will engage leadership positions and increase capacity of Inter-faction union "Green Power Shift" - multi-partisan driver of environmental and sustainable energy issues in the Parliament 	<p>забруднення, покращення енергоефективності та розвиток відновлювальних джерел енергії, поводження з відходами, стає управління лісовим господарством та стає сільське господарство, управління водними ресурсами, пом'якшення екологічних наслідків, спричинених збройним конфліктом на Сході України, "зелений" розвиток підконтрольних територій Донецької і Луганської областей</p> <ul style="list-style-type: none"> • Зелений Секретаріат працюватиме над розробленням Зеленого порядку денного для України, який передбачатиме вирішення найважливіших екологічних питань у короткостроковій перспективі • З метою збільшення політичного запиту на екологічні реформи, командою проекту будуть розроблені комунікаційні продукти та кампанії з підвищення обізнаності про актуальність екологічних реформ • Протягом роботи проекту буде оцінюватись відношення населення до екологічних питань, що в свою чергу допоможе розробити відповідні законодавчі ініціативи та стратегії зміни поведінки • Робота команди буде спрямована на підвищення уваги до "Зеленого" порядку денного у передвиборчих програмах партій та їх лідерів • З метою просування Зеленого порядку денного, експерти Секретаріату використовуватимуть лідерський потенціал МФО "Зелена Енергія Змін" - драйвера з питань охорони довкілля та сталої енергетики у Парламенті
Benefits		
	<ul style="list-style-type: none"> • Ukrainian Parliament will gain its positions as a leader in pushing environmental reforms and SDGs • The environmentally conscious electorate will have an opportunity to make its choice based on green component • Green Agenda for Ukraine might become a transition roadmap for the current Parliament as well as for the next convocation • Expert Civil Society and NGOs might get an additional support and advocacy tool for promotion of environmental and sustainable energy issues on political agenda • The project might increase the number of eco-conscious voters with a request on including environmental and sustainable energy issues in political programmes • Implementation of environmental initiatives can increase "green" economic growth, attract green investments and create "green" jobs • Environmental reforms will contribute to the rising of social standards of living, health quality and ensuring the constitutional right to a safe environment 	<ul style="list-style-type: none"> • Український Парламент займе лідерські позиції у просуванні екологічних реформ та ЦСР • Екологічно свідомий електорат матиме можливість зробити свій політичний вибір, базуючись на оцінці зеленої складової програм • Зелений порядок денний для України може стати перехідною дорожньою картою для Парламентів цього та наступного скликання • Експертне та громадянське суспільство матимуть додатковий інструмент з підтримки та просування ініціатив стосовно охорони довкілля та сталої енергетики до політичного порядку денного • У результаті діяльності проекту, можливе зростання кількості екологічно свідомих виборців із запитом на включення питань довкілля та сталої енергетики до політичних програм • Впровадження екологічних реформ може підвищити "зелене" економічне зростання, залучення "зелених" інвестицій та створення "зелених" робочих місць • Екологічні реформи сприятимуть покращенню стану довкілля, підвищенню рівня безпеки життєдіяльності населення та охорони здоров'я, економічних і соціальних умов країни.

Events (e.g. workshops, training, press conferences)
