### Development goal

Climate change policies, national targeted programme and action plans, including budgets and investment plans at national and provincial levels take full account of climate change challenges to minimize future social, economic and environmental vulnerability, and to control GHG emissions fulfilling obligations under multinational agreements, particularly the post-Kyoto framework.

### Project objective

Frameworks, mechanisms and capacities in place to inform, guide and coordinate (i) analysis of climate change related risks and formulation of CC adaptation policy responses and investment plans; and (ii) analysis of Green House Gas emissions, and formulation of investment plans and ways to change consumer behaviour for low-carbon economic development.

### Project outcomes and outputs:

Outcome 1 – Climate change policy formulated and mainstreamed into the National Target Program to respond to Climate Change, related action plans formulated, and policy and management capacities for roll out strengthened.

Outcome 2 - Improved knowledge base, and national research capacity strengthened to deliver analysis for evidence-based planning and policy development, and implementation of CC-related measures to support sectors and provinces in rolling out the NTP.

Outcome 3 - Build capacities for regulation, guidance, local policy measures, and project management, and formulate concrete regulations, policy measures and investment plans for CC adaptation and GHG emissions control.

Outcome 4 - Project management and long term technical advice.

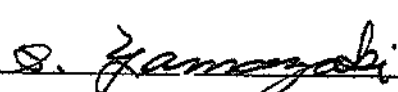

**Government Agency:** Ministry of Natural Resources and Environment (MONRE)

**Project focal point:** Viet Nam Institute of Meteorology, Hydrology and Environment (IMHEN)

### Government agency

**implementing partner:** Ministry of Agriculture and Rural Developments (MARD), and People Committees of Can Tho, Binh Thuan and Binh Dinh provinces.
