# HIV Rapid Testing and Counseling Training Report

Monday 17<sup>th</sup> to Friday 21<sup>st</sup> May 2021

Pre-testing counseling, Post-testing counseling (HIV negative & positive). Skills acquired included rapid testing and basic counseling. Participants demonstrated the skills to be certified.

**Learning Methods / Activities:** The HIV Rapid Testing training includes the following types of activities to aid in accomplishing workshop goals and objectives:

- ✦ **Presentations** allowed participants to gain knowledge through didactic exchange of information.
- ✦ **Group discussions** allowed participants to share experiences and ideas.
- ✦ **Role plays** allowed participants to learn through simulated situations.
- ✦ **Video presentations** introduced participants to the procedural steps for collecting blood specimens, performing tests, and interpretation of results.
- ✦ **Demonstrations** allowed participants to observe a particular procedure or test prior to individual performance.
- ✦ **“Hands-on” practice** exercises allowed participants to experience collecting specimens, and performing, and interpreting a variety of HIV rapid tests.

All training materials were emailed to participants at the beginning of the training. The training materials used were resources from UNDP, JHPIEGO, and CHART.

### **Duration of training**

The training covered a total 32 hours (excluding lunch time), {Monday to Thursday 7x4=28hours; Friday 4hours, total number of hours 32}. [50 minutes is equivalent to 1 credit at UB]

### **Refreshments/Accommodation**

Full meals were provided throughout the period of training. Also, hotel accommodation and local transportation was provided during the training.

### **Graduation/Certification**

Attendance (all sessions, all day), participation, post-test (80%), and practical (100%) exams were conducted for certification. All the 16 participants attended the sessions and successfully passed the written post-test (Fig. 1 below) and practical examination. The practical examination consisted of a rapid HIV testing and practical demonstration of pre/post HIV testing counseling in form of a role play.

- ✦ UB pharmacy lab technologist (Mrs. Genea Palacio) and the secretary Allied Health (Mrs. Martha Jonch) were very supportive and appreciated.

### **Recommendations/Suggestions for future training**

- ✦ At least 1 or 2 preview planning meetings be held by all the organisers at least 2 weeks before the commencement of the training. This will facilitate communications, planning, and execution.
- ✦ The sudden change in training location made the training venue a bit challenging since the air conditioners were not as effective. Early planning required for future training.
- ✦ Participants should be consulted in terms of dietary needs (example, vegetarians, diabetics etc.).
- ✦ A follow-up training be conducted to look at other aspect of HIV testing and counselling.
- ✦ UNDP to engage UB on a regular scheduled training once or twice a year. Dates be agreed upon for proper planning.

### **Conclusion**

Despite a few glitches encountered before the training, the training was conducted successfully and in the end, all the participants demonstrated knowledge and skills on HIV rapid testing and basic counseling as evidenced by the results of the examinations and comments from participant's daily evaluation. Participants were generally satisfied with the training, the facilitators, and the organisation.
