

## United Nations Development Programme

### PROJECT DOCUMENT

Country: Global

**Project Title:** Canada – UNDP Climate Change Adaptation Facility

**UNDP Strategic Plan Environment and Sustainable Development Primary Outcome:** Promoting Adaptation to Climate Change

**UNDP Strategic Plan Secondary Outcome:**

**Implementing Entity/Responsible Partner:** UNDP

#### Brief Description

The Canada – UNDP Climate Change Adaptation Facility will promote south-south cooperation and enhance understanding about initiatives that address adaptation to climate change, especially the gender dimensions of adaptation. The Facility will support global coordination and knowledge management involving the portfolio of national climate change adaptation projects co-financed by UNDP, Foreign Affairs, Trade and Development, Canada, and partners that are currently being implemented in Cambodia, Cape Verde, Haiti, Mali, Niger, and Sudan. The Facility will collect and analyze information, experiences, and lessons learned emanating from the projects to produce and disseminate knowledge that can be shared among the project countries and usefully applied in other contexts, as well as broadly inform climate and sustainable development policies at the local, national, and global levels. The Facility will promote global exchange of information, experiences, and lessons learned among project countries and more widely; coordinate relevant side events at UNFCCC COPs and other international fora; and elaborate global knowledge products on different themes related to climate change adaptation, including climate resilient food systems and water resources management, strengthening women’s participation, and other gender elements.

Programme Period:	2013-2016	Total resources required	USD 1,166,763
