Programme Title: *Realizing the MDGs in Lao PDR - Consolidated Programme of Support to MPI for the Achievement of the Valuable Goals of the 7th NSEDP 2011-15*

UNDAF/CP Outcome 1: By 2015, the Government has effectively implemented the MDG-based NSEDP for more inclusive, equitable and sustainable development.

Expected CP Output 1.1: Substantially strengthened capacities for NSEDP implementation and increased aid effectiveness.

Implementing Partner: Ministry of Planning and Investment (Department of International Cooperation (DIC), Department of Planning (DoP), Lao Statistics Bureau (LSB), National Economic Research Institute (NERI), and Department of Investment Promotion (IPD)

Responsible Parties: Department of International Organisation (DIO), Ministry of Foreign Affairs, and Pilot Provinces (TBD)

Brief Description

The main objective of this consolidated programme of support is to provide more efficient and results-based support to help Lao PDR achieve the valuable goals of the 7th National Socio-economic Development Plan 2011-15, especially more inclusive and equitable growth, the MDGs and substantial further progress towards graduation from Least Developed Country (LDC) status.

In order to generate additional synergies, reduce overhead and transactions costs, and further increase managerial and administrative efficiency, the Government has requested that several separately implemented UNDP projects at MPI supporting in various ways the achievement of the goals of NSEDP be consolidated into a single more efficient results-based programme. In particular, three Government implemented capacity building projects supporting respectively NSEDP formulation and monitoring, the Round Table Process, and policy-informing research on human development have been consolidated into a single programme of support to MPI. In addition, more systematic linkages will be developed with other UNDP programme activities, and those of other UN Agencies and development partners.

The new consolidated support programme builds upon earlier capacity building support and includes four mutually supportive components each aimed at assisting the Government achieve the valuable goals within the NSEDP. These four components include: 1. Support to consultative planning, implementation, monitoring, assessment and reporting on the NSEDP/MDGs; 2. Support to strengthening effective monitoring and evaluation of progress towards goals of NSEDP/MDG via LaoInfo; 3. Support to strengthening the Round Table Process for achievement of NSEDP/MDGs; and 4. Support to advancing Human Development through policy-informing research on Human Development Issues especially relevant for achieving NSEDP/MDGs.

Notably, this more programmatic approach also better conforms with the commitments of the Paris and Vientiane Declarations on Aid Effectiveness.

**Note on Substantive Revision of the Programme Document
“Realizing the MDGs in Lao PDR – Consolidated Programme of Support to MPI for
the Achievement of the Valuable Goals of the 7th NSEDP 2011-15” (ID: 0061662)**

Objective:

The purpose of this note is to explain the rationale for substantive revision of Component 3 and 4 under MPI programme as well as to outline details of changes made as a result of the revision.

1- Component 3 – Strengthening the Round Table Process for Achievement of the 7th NSEDP/MDGs

Background:

The Strengthening the Round Table Process for Achievement of the 7th NSEDP and MDGs (herein after called the RTP) is one of four components of the consolidated programme with the primary objective to further strengthen the capacity of MPI to lead the effective mobilization and coordination of ODA for the achievement of the valuable goals of NSEDP, especially the MDGs and advancing the country towards graduation from LDC status.

Originally, the Component consisted of 4 main outputs, which are:

Output 1	Further enriched quality and effectiveness of the Round Table Process for facilitating substantive dialogue and closer partnerships in the implementation of NSEDP and the achievement of important national development goals such as the MDGs
Output 2	DIC capacities enhanced to more effectively guide Sector Working Groups in implementing the 7 th NSEDP and MDGs achievement
Output 3	Increased effective utilization and management of aid through effective implementation of the Vientiane Declaration on Aid Effectiveness Country Action Plan (VDCAP) and other aid effectiveness commitments
Output 4	The ODA related data, information and results are reliable, accessible and transparent

The Strengthening Capacity for National Implementation Project (NIM Project) was implemented by DIC from June 2009 – March 2012 (extended from December 2011). The overarching objective of the NIM project was to develop, consolidate, and sustain capacities of National Implementing Partners, including the Department of International Cooperation (DIC) of Ministry of Planning and Investment (MPI). As the NIM project is ending in March 2012, DIC and UNDP conducted a final project assessment during the last quarter of 2011. The NIM final assessment proposes that the next phase of the project is designed

to work closely with DIC in moving towards better harmonization and use of country systems. It is strongly recommended that this is integrated within the overall support UNDP is providing to MPI rather than as a standalone project. This should build on the strengths demonstrated through the NIM project as well as continue to address the areas that have been indicated as requiring further support.

Rationale:

Based on final project assessment results of NIM project and the approval the Programme Board Meeting on 19th January 2012, it was agreed to integrate new support of NIM into component 3, RTP, of MPI programme. To further enhance the role and functions of the Department of International Cooperation (DIC) and in light of its new management structure, this integration will ensure a harmonized duty and responsibility of DIC that rests under the Decree 75/PM on ODA.

Modification:

With the above changes, the component management team with close consultation with the MPI Deputy Minister, have reorganized the component outputs to better synchronize and streamline the flow of those output and their supported activities with the DIC's organizational structure so that they are more effectively implemented and monitored.

The table below articulates the revised outputs, which will be reflected in 2012 work plan onward. The revision does not result in any changes in terms of the final programme objectives. Given the new NIM activities have been added and reorganization of RTP's outputs, it results in an overall increase in the programme annual budget by US\$: 365,000 per year (additional UNDP core fund).

Detailed revision is summarized in the table below:

Output	Description	Remark
1	Enhanced greater substantive dialogue and closer partnerships with development partners and effective resource mobilization and management through the Round Table Process, including Sector Working Groups mechanism for facilitating effective implementation of NSEDP and VDCAPs towards achieving the MDGs in Lao PDR	Combined output 1 on RTM/RTIMs, output 2 on SWGs and output 3 on VDCAP in order to increase synergy among the outputs through mainstreaming their activities into one single output.
2	Enhanced reliability, accessibility and transparency of ODA related data, information and results through the established ODA Database Management System and related quality ODA analytical reports/documents	This was output 4 under the original structure.
3	Strengthened capacities of DIC and implementing partners in effectively managing ODA related programmes and projects	Newly added - to further enhance capacity of DIC and Implementing Partners in ODA management and coordination, especially for UNDP funded projects.
4	Provided quality assurance and support to national implementation management through audit, spot checks and HACT	Newly added - to streamline to the current function of DIC especially in management of UNDP funded projects.

2- Component 4 – Support to Advancing Human Development through Policy-Informing Research on Human Development Issues especially Relevant for Achieving NSEDP/MDGs

The main objective of this component is to help further develop government capacity to undertake applied policy research on strategically-selected human development issues especially relevant to achieving the goals outlined in the NSEDP, particularly the MDGs and advancing progress towards the country's graduation from LDC status. Such policy-informing research will also help inform the formulation of annual NSEDP implementation plans, and eventually the formulation of the 8th NSEDP 2016-2020.

To achieve this objective, the component will also focus on assisting the government in preparation of draft Strategy for LDC graduation by increasing Government officials' understanding on the implications of graduation; engaging across government and with other stakeholders in undertaking the analysis to arrive at the strategy and mainstreaming the strategy into national development processes. A synergy between component 1 (Planning) and Component 4 will be further strengthened.

In this connection, NHDR will be used as a tool to enable the government and other national stakeholders to monitor the country's progress toward LDC graduation.

Therefore, this note is prepared to accompany the MPI programme document as a reference certifying the revision of the MPI programme especially the component 3 and 4. This change shall be effective as of the date of signing of the revised programme document.

MINUTES OF MEETING

After closing the ARM of MPI Programme, Programme Board members (Representatives of MPI relevant departments and UNDP) continued meeting to further update and agree on new programme management structure and arrangements, and discuss and approve the 2012 Annual Work Plan of MPI Programme and PEI Programme.

The board has discussed and agreed on following issues:

1. Programme management structure and arrangements:

- a) Since there has been changes in MPI senior management, there is a need to update on the new MPI programme management structure, especially the Programme Executive Board that MPI proposed to replace HE Dr Bounthavy Sisouphanthong with HE Somchith Inthamith who has been assigned to oversee international cooperation related activities as an Executive Board while performing his responsibilities as a National Programme Coordinator. In this regard, UNDP will further consult its Head Office and get back to the Government if this option would be feasible.
- b) It is noted that since PEI Programme involves other Ministries not just MPI, to ensure an overall coordination among the PEI components, it is recommended that during the formulation of the new PEI Phase, the PEI Programme Board should be developed. So from this year onward (2012), PEI will have its own Board.

2. 2012 MPI Programme Annual Work Plan:

- a) Overall, the 2012 Annual Work Plan has been approved by the Programme Board, but each component in collaboration with UNDP POs needs to work more on prioritizing activities and budget as there is a significant resource gap. It is also proposed that a joint mission for the resource mobilization will be conducted by MPI and UNDP possibly in Hanoi and Bangkok to ensure the resource gap is securely filled.
- b) The board has agreed to include NIM activities as outputs 5 and 6 of the RTP Component 3 of the MPI Programme.
- c) In addition, it has been proposed that the Flexible Funding Facility be developed as one of activities within the RTP Component.

- d) More streamlined programme, especially the streamlined activities of each component, is required in order to reduce overhead and transactions costs.

3. Linkages among NSEDP, MDGs, NHDRs and LDC Strategy:

- a) There is a need for DPs to support the Government in formulating long-term LDC Strategy, as well as integrating LDC criteria and targets into the Five-year and Annual NSEDP including regular monitoring of NSEDP and PIP in order to achieve MDGs by 2015 and LDC graduation by 2020.
- b) The NHDR will be used to closely monitor Laos' progress towards the LDC graduation. The NHDR research will look at implications of LDC graduation on Laos especially in the following areas:
 - Implications on ODA, soft and commercial loans
 - Implications on Trade preferential treatment from trade partners
 - Technical assistance
