

Government of Mozambique

2014 Annual Workplan Support to the National Demining Programme

UNDAF (2012-2015)

- **Outcome 3:** Sustainable and effective management of natural resources and disaster risk reduction benefit all people in Mozambique, particularly the most vulnerable.
- **Output 3.2:** Local communities participate actively in risk reduction activities and natural resources management in districts at risk.

Country: Mozambique

CPD (2012-2015)

- **Output 3.3:** Quality of data and its analysis on mine clearance to meet Article 5 of Anti-Personnel Mine Ban Convention.
- **Output 3.4:** Mechanism for residual risks established to improve socio-economic conditions of mine and UXO affected communities.

Implementing Agencies:

National Demining Institute, APOPO, HANDICAP International, The HALO Trust, Norwegian People's Aid (NPA) and UNDP

Implementation Modality:

National Implementation (NIM)

Program Period: 2012 - 2015

UNDAF Results Area: Economic

UNDP Program Component: Disaster Reduction, Environmental Management and Mine Action

Budget Code: Award 00063219
Project 00080471

Duration: 2014

Estimated Annual Budget: USD 10,993,938

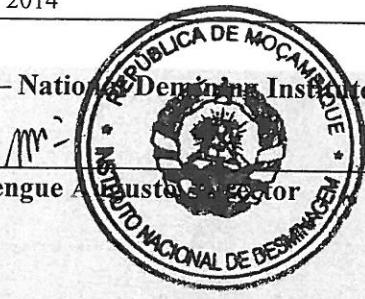

Allocated Resources: USD 6,872,397

Regular Resources: - TRAC USD 355,328
Other Resources: USD 6,102,763

Other Resources + GMS: USD 414,306

Unfunded: USD 4,121,541

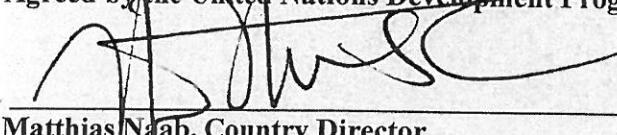

Agreed by IND – National Demining Institute:

Augusto Maverengue Augusto Director

5.2.2014
Date

Agreed by the United Nations Development Programme:

Matthias Naab, Country Director

6.2.2014
Date

Description:

The fundamental objective of the demining program in Mozambique is to ensure the eradication of mines and UXO remnants of war in affected communities, in order to reduce the loss of human life caused by explosive devices and guarantee the free circulation of people and goods, the implementation of economic and social development projects, and pursuance of the district by district demining strategy established in the National Mine Action Plan (NMAP) 2008 - 2014 approved by the Government of Mozambique in April 2008 and fulfilment of Mozambique's obligations under Article 5 of the Anti-Personnel Mine Ban Convention (Ottawa Convention).

In addition to threatening the lives and physical safety of civilian populations, landmines and other explosive remnants of war deprive inhabitants of access to land for economic purposes thereby increasing poverty. Mine action is therefore included in the Government's 2011-2014 *Plano de Acção para a Redução da Pobreza* (PARP – Mozambique's Poverty Reduction Strategy Paper) as a cross-cutting issue, emphasising the importance of addressing the mine contamination problem in a sustainable development context. In this context, demining becomes a strategically crucial activity, because it has a direct impact on other key priority areas. When mines are present it is impossible to implement development projects or programs. Two fundamental objectives of demining in Mozambique is, first, to ensure that mines are cleared in the affected regions in order to prevent and reduce the loss of human life and, second, allow implementation of economic projects, resettlement, and greater mobility of population groups. In accordance with the government's priorities for development assistance, UN support to Mine Action in Mozambique is included in the UN Development Assistance Framework (UNDAF). It contributes to the wider UN assistance to better prevent and respond to both natural and man-made disasters, thereby reducing risk of disasters for the benefit all people in Mozambique, particularly the poorest and most vulnerable. The overall outcome for Mozambique's Mine Action Programme reflects those objectives outlined in the PARP and UNDAF. The Mine Action activities will ultimately reduce poverty by releasing land back to communities for agricultural activities, infrastructural development, and increased livelihoods, while ensuring its sustainability by reducing risks and hazards to the general population.

The Government of Mozambique has declared a goal of clearing all known mined areas by 31 December 2014. This is in accordance with its commitments under the Anti-Personnel Mine Ban Convention of which it was an early signatory and in pursuit of which it plays a leadership role. Mozambique has been successful in clearing mines in five of the ten provinces in the country, which have now been declared mine free. The 2014 National Mine Action Plan of Mozambique focuses on the five remaining provinces in the south and centre of the country still affected. The UNDP project supports that goal by enhancing the national capacities for the implementation of the National Mine Action Plan, increasing the national capacity to manage and implement all activities required to clear all known mined areas by the 31 December 2014 deadline and strengthening the national capacity to address the residual threats from other explosive remnants of war.

The implementing partners of the UNDP supported programme on Mine Action are the National Institute for Demining (*Instituto Nacional de Desminagem* – IND) and the Humanitarian Demining Operators (i.e. Apopo, Handicap International, the HALO Trust and Norwegian People's Aid) responsible for all mine action activities in Mozambique. The project beneficiaries include all citizens of the affected areas whose livelihood and human security is affected by the impact of landmines and other Explosive Remnants of War (ERW). Ultimately, this programme will release contaminated land to affected communities for agricultural activities and infrastructural development resulting in increased livelihoods. The 2014 Annual Work Plan contains four expected outputs: (1) to strengthen the capacity of the National Demining Institute for coordination, information management, and quality assurance; (2) to support the demining operations in the field, including post-clearance inspections and official handover of released land to the provincial authority; (3) to facilitate establishment of a national mechanism to address residual risks from other ERW; and (4) to assist the Government of Mozambique to organize and host the Third Review Conference of the Ottawa Convention that will be held in Maputo from 23-27 June 2014. The success of each of these components is of equal importance for an effective programme as the first component provides the framework to ensure that the activities undertaken in the second component are performed in a cost-effective and targeted manner, and can be sustained by national authorities. The third component ensures sustainability of an integrated national capacity to address the residual threat from other explosive remnants of war that will remain after the 2014 deadline to clear all known anti-personnel landmines. The fourth component provides a high-level opportunity for the Government of Mozambique to demonstrate its leadership in the global mine action sector and share lessons-learnt from more than 15 years of mine action experience in Mozambique.
