

Brief Description

Namibia's First Biennial Update (FBUR NAM) to the UNFCCC Project involves the preparation of FBUR for submission to the Conference of Parties (COP) of the UNFCCC in accordance with its commitment as a party to the Convention as per Decision 2/CP.17 taken at COP 17. The BUR will be the first for Namibia and it will be conducted in complimentary with Namibia's Third National Communication building on and updating work carried out under the previous National Communications namely the Initial National Communication (INC) (2002), the top-up (2003) and public education and awareness (2005), and the Second National Communication (SNC) (2011). The main components of the FBUR are: a) information on national circumstances and institution arrangements; b) GHG inventory by sources and removal by sinks; c) measures to mitigate climate change and their effects; d) constraints and gaps and related financial, technical and capacity needs; e) preparation and submission of biennial update reports; f) information on domestic Measurement Reporting and Verification (MRV). The project will be implemented over a two year period commencing in January 2014 until December 2015. Specifically the implementation of activities will be coordinated by the MET/DEA/MEA Climate Change Sub-division/TNC PMU.
