Implementing Partner: UNDP

Responsible Parties: Gwadar Technical Institute

Brief Description

UNDP Pakistan is scaling up its community recovery work in Balochistan by transforming it into a local, area-based development programme with social innovation as a cross cutting theme. The programme will support the creation of the necessary conditions for stability (citizen-state trust building) through inclusive local development planning processes, addressing basic local infrastructure and livelihoods needs, and make tangible progress towards the achievement of the SDGs. While leveraging a pilot project funded by the Country Investment Facility and the Government of Balochistan, this programme aims to mobilize US\$40m over the period 2018-22. The project will work to find innovative and sustainable solutions to address Balochistan's development challenges by showcasing local government delivery on Pakistan's Sustainable Development Goals. It will support improved delivery of basic public services including water, health and education etc; and also to create employment generation and improved livelihoods. Social Innovation will be mainstreamed across all the activities to create a greater impact through employing innovative solutions for realising SDGs. The project will be specifically focused on three outputs: 1) Building capacities of the local governments to effectively plan and deliver services in order to achieve the SDGs.; 2) Accelerating the delivery of the SDGs by investing in basic services to address immediate and urgent needs with a special focus on the needs of women and vulnerable groups, and 3) Developing alternative livelihoods for both men and women and stimulating the local economy through skills training, business development and trade.
