

**TRANSFER OF TITLE OF ASSETS FROM
THE UNITED NATIONS DEVELOPMENT PROGRAMME
TO THE GOVERNMENT OF REPUBLIC OF PALAU**

THIS AGREEMENT made this 06 day of January, 2020, by and between the United Nations Development Programme (hereinafter referred to as “UNDP”), for the transfer to and the Government of Republic of Palau (hereinafter referred to as the “Government”), accepts full title and ownership of assets as specified in the attached supplies and equipment list, hereto as Annex I at a total cost of US\$16,969.44.

The assets transferred represent assistance of UNDP to the Government to facilitate the Enhancing Disaster and Climate Resilience in the Republic of Palau through improved Disaster Preparedness and Infrastructure, Project # 115303 (hereinafter referred to as “Project”), undertaken in Palau. The transfer of title is limited to the use of such assets solely for the stated purposes of the Project in the manner and place as set out in the Project Document, hereto as Annex II, and subject to further limitations contained therein.

The transfer of such assets must be affected in compliance with UNDP Financial Rules and Regulations, the Procurement Manual and the Asset Management Guidelines.

IN WITNESS WHEREOF, UNDP and the Government, through their duly authorized representatives, have signed this Agreement:

Project Title: Enhancing Disaster and Climate Resilience in Palau through improved Disaster Preparedness and Infrastructure”

Project Number:

Implementing Partner: UNDP Pacific Office in Fiji

Start Date: March 18th, 2019

End Date: March 17th, 2020

PAC Meeting date:

Brief Description

The project aims to improve the capacity for preparedness and mitigation of Palau’s resilience to man-made, geo-physical, climate and different types of related hazards and enhancing resilience to climate change impact. The project will respond to Outcome 1 of the UN Pacific Strategy 2018 – 2022: By 2022, people and ecosystems in the Pacific are more resilient to the impacts of climate change, climate variability and disasters; and environmental protection is strengthened. The cooperation with the Government of Japan will contribute to achieving the goals of the Sendai Framework for Disaster Risk Reduction, elimination of threat to human security and protect gains of sustainable development and inclusive of the Sustainable Development Goals. The Palau DRR project is consistent with the 2020 Palau National Master Development Plan priority of mainstreaming disaster risk reduction and aligned with the National Disaster Risk Management Framework (NDRMF) vision of “safe, resilient and prepared communities in Palau.

Given the nature of the supplementary Budget project, concerted efforts will be devoted to responding to urgent and unpredicted needs arising out of slow/sudden onset of natural hazards impacting livelihoods, economy and persistent inequalities. The outcome will be achieved through 3 expected outputs:

1. Strengthened Disaster Communication and Climate and Tsunami Monitoring Systems,
2. Enhanced National and State Disaster preparedness capacity,
3. Enhanced Community Disaster and Climate Resilience through improved water and food resource management, inclusive livelihood diversification.

The project will be implemented by the UNDP Pacific Office in Fiji under the UNDP Direct Implementation Modality (DIM) and as part of the Resilient and Sustainable Development team.

The duration of this project is one year (March 18th 2019 – March 17th 2020). The proposed budget is US\$7,500,000.

Contributing Outcome (UNDAF/CPD, RPD or GPD): Outcome 1 of the UN Pacific Strategy 2018 – 2022: By 2022, people and ecosystems in the Pacific are more resilient to the impacts of climate change, climate variability and disasters; and environmental protection is strengthened. Indicative Output(s) with gender marker2: Output 3.2. Preparedness systems in place to effectively address the consequences of and response to natural hazards (geo-physical and climate related) and man-made crisis at all levels of government and community. Gender Marker: GEN2 (Gender equality as a significant objective)	Total resources required:	\$7.5 million	
	Total resources allocated:	UNDP TRAC:	
		Donor:	7.5 million
		Donor:	Government of Japan
		Government:	
	In-Kind:		
	Unfunded:

*UN Exchange Rate: US\$1= 2.18 FJD as of October 2019

REMARKS:

In accordance with Japan Project for Palau Procurement Plan acquisition of HF radio manpack for NEMO of the Republic of Palau is envisaged. Allocated budget is US\$ 20,000 for 2 (two) units. In this regard, Japan Project team reviewed UNDP LTA repository and learned that there available agreements with Codan Limited, Danimex and Motorola Solutions for provision of radio equipment. In reply to the email invitation Danimex and Codan submitted their quotations. As per comparative analysis, Codan Limited offered lower price and radio equipment that meets NEMO expectation. In this regard, you are kindly requested to approve Purchase Order for supply of HF radio manpack with Codan Limited for total price of USD 17520.01.
 NEMO agreed that special permission that might be required in Palau for importing HF radio equipment will be arranged by themselves.

Department of Defence

DEC03 – END USE AND NON TRANSFER CERTIFICATE

What is the purpose of the DEC03?

The DEC03 – End Use and Non Transfer Certificate authorises a consignee and end user to receive goods and or technology for an approved end use, on the condition that they will not re-export, resell or otherwise transfer, the goods and/or technology without the consent of the Australian Minister for Defence or their delegate.

When do I need to submit a DEC03?

When you are submitting an *Application to Export or Supply Controlled Goods and Technology* and:

- the goods and/or technology are on the Sensitive or Very Sensitive list in the *Defence and Strategic Goods List*; or
- have a military end-use; or
- Defence Export Controls has requested a DEC03 based on the circumstances of your application.

Who needs to complete and sign a DEC03?

An authorised agent of the **Applicant** (*i.e. the exporter*) must complete and sign all fields in the Applicant section of this DEC03.

An authorised agent of the **Consignee** (*a third/intermediary who is part of the supply chain for the export of the goods and/or technology. For example, a distributor or transport company*) must complete and sign the Consignee section of this DEC03 (if the consignee is NOT the same as the End User). All fields must be completed and the Certification of Consignee section signed.

An authorised agent of the **End User** (*i.e. the person/company that will receive and use the goods and/or technology*) must complete the End User and End Use sections, and complete and sign the Certification by End User of this DEC03.

How should I submit my DEC03?

The **Applicant** should send a scanned copy of the DEC03 when submitting an *Application to Export Controlled Goods and Technology* to exportcontrols.applications@defence.gov.au

Where can I find further information on exporting goods and technology?

The Defence Export Controls website provides further information at www.defence.gov.au/exportcontrols. You can also contact Defence Export Controls on 1800 661 066, or on +61 6266 7222 if outside Australia, between 0830 and 1630 Australian Eastern Standard Time from Monday to Friday except on Public Holidays, and via our email address: exportcontrols@defence.gov.au

Hi Dale

That's a yes to all below. Digital voice and spare battery needs to be added extra, but are available yes.
Let us know if you need a quotation

BR René

24. sep. 2019 07.45 skrev Dale Kacivi <dale.kacivi@undp.org>:

Dear Rene,

Once again thank you for your email.

Kindly request if you can confirm if the proposed radio manpack has the following features:

- digital voice
- operators use them on the move and stop and setup a long wire antenna (basically do both)
- has both antenna types, whip and wire in the same package?
- Spare battery

Look forward to receiving your quote.

Regards.

Dale

Subject: RE: Quotation - HF Radio Manpack

Dear Dale

Thank you for your inquiry.

To the UN in general, Danimex provides Codan HF, which is also part of our current LTA with UNDP.

For Manpack in specific, kindly see attached Data sheet for the 2110 series Manpack. This model is also included in the LTA of course.

How many do you need and do you have any specific feature requirements for the configuration

Kind regards

Hello Dale, please see our attached updated quotation which includes shipping costs via DHL Express.

For the UN LTA, Codan offers an extended full five (5) year warranty on all Codan products for the duration of the contract (3+1+1 years). All OEM-supplied products (including batteries) will be supported by a three (3) year warranty.

I am going to ask my manufacturing team to review the estimated lead time for items on the quotation and I will advise ASAP.

Best regards,

Nannette Szott
Sales Administrator

Dear Dale,

Please see the attached combined quote **without shipping costs**. I will request shipping costs to Koror, Palau and send revised quote hopefully tomorrow.

I had added a note onto the quote advising we had options for the 2120 Smart Patrol Handset option, such as Mount and Pouch. Are you interested in these items? Below are screen shots from our catalog for reference.

TRANSCIVER ACCESSORIES

General

2120 Handset

2120 Patrol Handset

The 2120 Patrol Handset can be used in place of the standard H-250 handset for the 2110 and 2110V transceivers and provides full transceiver control in the palm of your hand. The handset is fully ruggedised and incorporates a speaker mode when used with its mounting cradle. The main transceiver user interface is fully replicated on the handset providing an excellent solution for extended control and walk-and-talk use case scenarios.

08-07367-001

Patrol Handset

2120 Handset Accessories

Cable, 2120 Extension, 4.5m

Used to extend the distance between the 2120 Patrol Handset and the 2110/V transceiver for a total of 6m.

08-07359-001

2120 Handset cradle with RAM mount

Provides a robust and secure mount for the 2120 Patrol Handset. Incorporates sensor for activating speaker mode when the handset is docked and a RAM™ mount with gimble for angle adjustment. Cradle includes a kit of fasteners for a variety of installation scenarios.

15-60040

2120 Handset cradle

Provides a robust and secure mount for the 2120 Patrol Handset, incorporating the sensor for activating speaker mode when the handset is docked. Cradle includes screws and is designed for use with suitable RAM™ mount accessories. Contact Codan for details.

08-07386-001

2120 Molle Storage Pouch

Zippered pouch design for stowage of the 2120 Handset, including molle straps for attachment for military style backpacks.

15-00224

2110 Component
Options & Access

The Low Rate Digital Voice option is Export Controlled and will require an export permit. I will forward the application to you tomorrow.

Digital Voice (Factory Fit)

Enables digital voice capability. Digital voice provides highly intelligible audio, free from the noise, interference and fading effects often heard over analogue voice.

Supplied as standard with a 2400 bit/s Vocoder. AES-256 Encryption option (part number 15-10595), 1200 bit/s Vocoder and 600bit/s Low Rate Vocoder Upgrade options (part numbers 15-10596 and 15-10597) can be added.

NOTE:

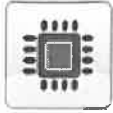

- 2.7 kHz BW Filter included with this option and is not required to be ordered separately.
 - Retro Kit: 15-10586
- Suits 2110 only

15-10586-000

**Opt 1200 bps Vocoder**

15-10596

Enables 1200 bps vocoder data rate to improve digital voice performance in degraded channel conditions. Compatible with Digital Voice related options (part numbers 15-10585, 15-10586, 15-10588, 15-10590, 15-10591, 15-10593)

**Opt Low Rate Vocoder**

15-10597

Enables low rate 600 bps vocoder data rate to improve digital voice performance in highly degraded channel conditions. Compatible with Digital Voice related options (part numbers 15-10585, 15-10586, 15-10588, 15-10590, 15-10591, 15-10593)

This option is subject to Australian Government Export Controls. A signed End-User Declaration must be provided for supply of this option.

Please advise if you have any further questions or changes. Meanwhile I will work on finalizing our quotation.

Dale,

We will work on the shipping costs today and revert.
Attached is the quote for 2 Manpack radios at UN contract pricing.
These are quoted without digital voice. The option for digital voice is priced on quote ending in 6911.
The other HF radios you have do not have digital voice.
DV will provide clearer comms from units where both have the option enabled.
Should we combine the two?

Very Respectfully,

Dale

Thank you for contacting us.

Just a few questions to be sure we quote you the proper fit.

Do you have base stations, if so how are they featured?

We have existing base stations for VHF radios, HF radios and HF base radios.

With ALE?

With Encryption?

With Digital voice?

We have the regular analog voice in some location. **We want to move to digital voice.**

What brand(s) are the radios you have now?

Vertex Standard and Motorola (VHF) for Sonsorol and Tobi, it's ICOM (HF)

Will the operators be using them on the move or will they stop and setup a long wire antenna?

Both

Should we offer both antenna types, whip and wire in the same package?

Yes, both antenna

Would you require a spare battery for each? Yes please, so while one is charging we can use the other.

How many do you require? 2

When do you need them? As soon as

**Digital Voice (Factory Fit)****15-10586-000**

Enables digital voice capability. Digital voice provides highly intelligible audio, free from the noise, interference and fading effects often heard over analogue voice.

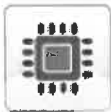

Supplied as standard with a 2400 bit/s Vocoder. AES-256 Encryption option (part number 15-10585), 1200 bit/s Vocoder and 600bit/s Low Rate Vocoder Upgrade options (part numbers 15-10586 and 15-10587) can be added.

NOTE

- 2.7 kHz BW Filter included with this option and is not required to be ordered separately.
- Retro Kit: 15-10586
- Suite 2110 only

**Opt 1200 bps Vocoder****15-10586**

Enables 1200 bps vocoder data rate to improve digital voice performance in degraded channel conditions. Compatible with Digital Voice related options (part numbers 15-10585, 15-10586, 15-10588, 15-10590, 15-10591, 15-10593)

**Opt Low Rate Vocoder****15-10597**

Enables low rate 600 bps vocoder data rate to improve digital voice performance in highly degraded channel conditions. Compatible with Digital Voice related options (part numbers 15-10585, 15-10586, 15-10588, 15-10590, 15-10591, 15-10593)

This option is subject to Australian Government Export Controls. A signed End-User Declaration must be provided for supply of this option.

Please advise if you have any further questions or changes. Meanwhile I will work on finalizing our quotation.

Thank you John.

If you combine will it make it 2 x Digital Voice HF Radio manpack? If so, please combine the 2 quotes.

This also includes a spare battery?

Thanks.

Dale

Subject: RE: Codan Manpacks

Dale,

We will work on the shipping costs today and revert.

Attached is the quote for 2 Manpack radios at UN contract pricing.

These are quoted without digital voice. The option for digital voice is priced on quote ending in 6911.

The other HF radios you have do not have digital voice.
DV will provide clearer comms from units where both have the option enabled.
Should we combine the two?

Very Respectfully,
John Robins · KB3UXK

Dear John,

Can you confirm the total cost of the 2 HF Radio Manpack please. Also grateful if you can provide the total cost including freight to Koror, Palau.

Thanks.

Dale

Dale,

Please find the quotation and a 2nd for digital voice.

We priced the DV separately as it is not required to talk with the other HF radios.

Very Respectfully,

Dale

Thank you for contacting us.

Just a few questions to be sure we quote you the proper fit.

Do you have base stations, if so how are they featured?
We have existing base stations for VHF radios, HF radios and HF base radios.

With ALE?
With Encryption?
With Digital voice?
We have the regular analog voice in some location. **We want to move to digital voice.**

What brand(s) are the radios you have now?
Vertex Standard and Motorola (VHF) for Sorsorol and Tobi, it's ICOM (HF)

Will the operators be using them on the move or will they stop and setup a long wire antenna?
Both

Should we offer both antenna types, whip and wire in the same package?
Yes, both antenna

Would you require a spare battery for each? Yes please, so while one is charging we can use the other.

How many do you require? 2

When do you need them? As soon as
