Second regular session 2015

31 August – 4 September 2015, New York

Item 5 of the provisional agenda

Country programmes and related matters

Country programme document for Uganda (2016-2020)

Contents

	<i>Page</i>
I. Programme rationale	2
II. Programme priorities and partnerships	4
III. Programme and risk management	6
IV. Monitoring and evaluation	7
Annex	
Results and resources framework for Uganda (2016-2020)	8
Abbreviations and acronyms used in the annex table	16

I. Programme rationale

1. Uganda aspires to become a competitive upper-middle-income country by 2040¹. The national development plan, 2016-2020, has prioritized investments in agriculture, tourism, minerals, infrastructure and human capital development sectors, with governance as its backbone². The plan is aligned to the sustainable development goals and takes into account the 6.4 per cent growth of Uganda over two decades and its reduction of poverty from 54 per cent in 1992 to 19.7 per cent in 2013³. Uganda has transitioned from a post-war, one-party state to an evolving multi-party democratic state, ranking 19th of 52 African countries in terms of good governance⁴. Northern Uganda, stabilized through the peace, recovery and development plan, is slowly reintegrating into the national economy. Uganda has shifted from poverty reduction strategies to an economic growth and transformation agenda. Anchored in ‘Agenda 2063’ of the African Union, progress has been achieved in East African regional integration such as in the sectoral policies harmonization, infrastructural development and common market systems. These, coupled with new prospects for the extractives industry, put Uganda in a unique position to accelerate its development trajectory.

2. Development progress in Uganda faces five key challenges:

- a) *Evolving democracy is characterized by* institutional capacity gaps, inadequate citizen participation in governance processes⁵, as well as gender inequality in economic and political arenas⁶.
- b) *Corruption, limited national resources envelope and low technological development impacts service delivery.* It is estimated that annually \$250-300 million dollars⁷ of public resources are lost through corruption. The national anti-corruption framework is beset with weak asset recovery systems, weak coordination amongst anti-corruption agencies and limited capacity in the legislative and accountability and public sector management institutions.
- c) *Instability in neighboring countries* has reduced cross-border trade and increasingly creates a security burden.
- d) *Inequitable distribution of growth dividends is compounded by a population growth of 3 per cent* with more than 50 per cent of the population under 18 years. Although poverty has declined, 43 per cent of the population could regress into poverty during shocks⁸. Disparity is highest in the north (44 per cent) and east (24.5 per cent), compared to the country average (19.7 per cent)⁹. Poverty is 14 points higher in rural than in urban areas. Inequality results from unequal access to, and control of, productive assets by women and youth¹⁰; inefficient and unresponsive markets; inefficiencies in national resource allocations and budget executions; and fiduciary malpractice.
- e) *The degradation of natural resources increases vulnerability to climate change and natural hazards.* From 1994 to 2008, forest areas declined from 25 per cent to 15 per cent and wetland cover from 15.6 to 10.9 per cent¹¹ due to low capacity to enforce regulatory frameworks; unsustainable production and consumption

⁸ Poverty status report, 2014

⁹ Estimates based on comparisons of consumption expenditure per adult equivalent with the official absolute poverty line

¹⁰ 75 per cent of the people are under 31 years of age (2014 census)

¹¹ National State of the Environment Report, 2012

systems and limited alternative livelihoods opportunities. The convergence of high biodiversity and exploitable oil in the Albertine Graben poses challenges for environmental sustainability, tourism and stability. Uganda experienced 2,500 disasters in the last decade, and in 2010-2011¹² rainfall variability cost the country \$1.2 billion.

3. In line with the United Nations Development Assistance Framework, 2016-2020, the logic of this country programme is that achieving good governance by 2020 creates enabling conditions for achieving high-quality human capital by 2025, which in turn drives attainment of sustainable, inclusive economic development by 2035. Attainment of sustainable, inclusive economic development reinforces governance effectiveness and human capital development, making them mutually reinforcing pillars that must be addressed concurrently, as evidenced by lessons from Botswana. UNDP is leveraging its comparative advantages by focusing on governance and sustainable, inclusive economic development while complementing the efforts of other United Nations country team members on human capital development. This model assumes that Government leadership is committed to undertake necessary reforms, and that UNDP will mobilize the requisite resources to enhance national capacities.

4. The UNDP *inclusive, effective governance portfolio* will encompass all tenets of good governance while collaborating with the Office of the United Nations High Commissioner for Human Rights on human rights and with UN-Women on gender mainstreaming. The evidence from Brazil and Mauritius illustrates that constitutional democracy fosters national development by creating political stability and an environment conducive to investment. Efficient and effective national resource allocation systems facilitate the equitable distribution of growth dividends. Strong public institutions will combat corruption and improve service delivery. Furthermore, strong security and justice systems enhance social cohesion, peace and stability thus guaranteeing sustainable development.

5. For sustainable development, Government's planned investments in the priority sectors must be matched with rapid progress in environmental protection, natural resources rehabilitation and resilience to climate change and disaster risks. However, evidence from African civil wars suggests that exclusiveness can reverse development progress. Therefore, the UNDP *sustainable, inclusive economic development portfolio* will strengthen natural resources management and resilience to climate change and disaster risks, while expanding livelihood and employment opportunities for excluded groups.

6. The final evaluation of the country programme action plan, 2010-2015, recommends that the next cycle focus particularly on: developing national and subnational capacities to implement, monitor and evaluate the second national development programme in priority sectors; and strengthening pro-poor service delivery and youth employment at subnational levels. Past cooperation positioned UNDP as a partner of choice in facilitating transformative national development processes;¹³ future efforts will explore development financing. Based on evaluative evidence of the success of the recovery and peacebuilding fund programme in northern Uganda, UNDP will continue strengthening national capacities for sustaining peace and economic development while informing national policy discourse¹⁴. The evaluation of the sustainable land management project documented UNDP contributions to strengthened national frameworks for environmental management, climate risk and disaster management¹⁵. Future efforts will enhance national capacities to implement frameworks for environmental management, climate risk and disaster management, and contribute to responsible environmental behaviour¹⁶. As recommended by the final evaluation of the country programme action plan and the UNDP strategic plan, 2014-2017,

¹² Uganda integrated rainfall variability impacts, needs assessment and drought risk management strategy, 2010-2011

¹³ Final evaluation (2014) of the country programme action plan, 2010-2015

¹⁴ Final evaluation (2013) of the northern Uganda early recovery project; final evaluation (2012) of the peacebuilding fund programme in Acholi

¹⁵ Sustainable land management mainstreaming and terminal evaluation of the Mbale territorial approach to climate change

¹⁶ *Cobweb* terminal evaluation

UNDP will diversify implementing partners while Government remains the main counterpart, and adopt *portfolio programming* supported by development solution teams.

7. The post-2015 Agenda, Agenda 2063 of the African Union, the Istanbul Programme of Action, and the East African Community Integration Protocol provide opportunities to engage with Government on strategies for achieving wealth, equality and inclusion. Furthermore, the adoption of mobile phones and social media, and the emergence of e-governance, offer opportunities for increased voice and participation of marginalized groups in national development processes.

II. Programme priorities and partnerships

8. In line with the priorities of the second national development plan, the United Nations Development Assistance Framework, 2016-2020, the UNDP strategic plan, 2014-2017, the UNDP gender equality strategy, 2014-2017, and the sustainable development goals, the country programme will comprise two portfolios: *inclusive, effective governance* and *sustainable, inclusive economic development*.

9. The UNDP *inclusive, effective governance portfolio* will develop national capacities in the rule of law; constitutional democracy; transparency and accountability; and peace, security and system resilience:

10. Under the rule of law, UNDP will focus on upstream support to targeted justice, law and order sector institutions in order to enhance service delivery and equitable access in line with human rights standards. Downstream support will provide increased access to legal aid and justice by poor and vulnerable groups, especially the elderly; HIV & AIDS infected and affected persons; youth; and female-headed households.

11. Support to *constitutional democracy* will focus on strengthening democratic institutions for improving the electoral cycle and strengthening civil society participation, including promoting women's participation in political leadership. The national peace platforms will be supported to become institutionalized mechanisms for political dialogue and consensus building.

12. UNDP will enhance government effectiveness through *institutional development, transparency and accountability* in order to deliver on commitments to anti-corruption conventions. Advocacy and capacity development support will facilitate the establishment of independent high-level national research and evaluation functions to foster transformative development approaches. Leadership development support to legislative, accountability and public sector management institutions will strengthen negotiation, standardization, integrity, oversight, transparency, and accountability, particularly in the extractives and infrastructure sectors. Supporting civil society and media engagement will enhance public demand for accountability.

13. Under the *peace, security and system resilience* component, 'downstream' support for innovative formal and informal community security and peacebuilding mechanisms will promote social cohesion. UNDP will lead the United Nations country team Great Lakes strategy for cross-border peace and resilience system-building initiatives to leverage peace dividends for communities. The Horn of Africa initiative of the Intergovernmental Authority on Development (IGAD) will be leveraged, particularly in Karamoja. Voice and participation of women, youth and the elderly will be strengthened.

14. Besides United Nations organizations, UNDP will partner with: the Democratic Governance Facility, on the rule of law and democracy; the European Union, on peace, security and resilience; the Department for International Development and the World Bank, on institutional development, transparency and accountability; and IGAD, the International Conference on the Great Lakes Region, the East African Community and the Regional Centre on Small Arms, on regional peace and security; and with the Republic of Korea on local economic development.

15. The UNDP *sustainable, inclusive economic development portfolio* will focus on strengthening capacities for (a) natural resources management, *adaptation* and developing resilience to climate change and disaster risk, and (b) green growth, expanding livelihood and employment opportunities including supporting the integrated approach to fostering sustainability and resilience for food security.

16. The *natural resources management, adaptation and developing resilience to climate change and disaster risk* component: UNDP will strengthen capacity at national and subnational levels, focusing on oversight and coordination; investment efficiency; protecting ecosystem services; facilitating the shift of government investments from emergency response to disaster risk management; building resilience to natural disasters and climate variability; and empowering citizens, including women and youth, to monitor and demand public accountability from regulatory agencies. UNDP will support Government in scaling up *resources mobilization and capacity building* for proven innovative approaches and evidence-based policy reform to address emerging issues.

17. The *livelihood and employment opportunities* component will strengthen institutions to improve productive and income generation capacities targeting low-income women, youth and other vulnerable groups. In particular, UNDP will support the development of inclusive and green value chains; and low emission and climate resilience in tourism, extractives, and agriculture and infrastructure sectors. East African regional integration efforts will be strengthened by supporting public and private sector institutions to participate in intra and inter regional peace and trade enhancement processes in the sectors of agriculture, tourism, natural resources management, climate change and disaster risk reduction.

18. The *economic development portfolio* will focus on: dry-land districts; the Albertine Rift; the mountainous ecosystems of Elgon and Rwenzori; and the Lake Victoria and Kyoga crescents.

19. UNDP will pursue cost-sharing agreements with bilateral and multilateral partners, including the European Union, the Netherlands, the Republic of Korea, and the Government of Uganda. Under the Global Environment Facility (GEF)-5 system of transparent allocation of resources (STAR), \$10.68 million has been secured for 2013-2018. Under GEF-6 for 2015-2020, \$10.48 million has been endorsed. The UN-REDD Programme is funding an additional \$0.63 million for climate change mitigation. There are new prospects for accessing \$20m from Green Climate Fund following UNDP's recent accreditation. The UNDP will also intensify efforts to mobilize funds for the Least Developed Countries' Climate Change Fund and the Climate Change Adaptation Fund. Funding from the Department for International Development will support the Karamoja resilience programme. Joint programming with the Food and Agriculture Organization, UN-Habitat, and the United Nations Industrial Development Organization, will focus on sustainable production and consumption initiatives, climate change mitigation, and sustainable cities programmes. Collaboration will be sought with the UNDP 'green commodities' programme, the Africa Facility for Inclusive Markets, the United Nations Environment Programme (UNEP), and the International Labour Organization, on 'green economy' and 'green jobs' for youth and women.

20. Both the *inclusive, effective governance* and the *sustainable inclusive economic development* portfolios will focus on the insecure income and non-income poor, women and youth, and on northern and eastern Uganda. Transformational change will be achieved through 'upstream' capacity development, by scaling up development solutions as well as pursuing greater East African regional integration at policy and functional levels. A catalytic fund will be established to promote South-South and Triangular cooperation for innovation, knowledge transfer and development financing. Partnerships with non-traditional donors, including Brazil, China, India, the Republic of Korea, Russia, and South Africa, will be pursued.

III. Programme and risk management

21. The national implementation modality will be continued based on a comprehensive capacity assessment of implementing partners and the application of results-based management principles. National ownership and mutual accountability for development results will be strengthened through joint annual work planning and reviews in alignment with national priorities.

22. Planned initiatives for increasing effectiveness and efficiency include: participating in corporate 'gender-equality seal' certification processes; reengineering business processes; and implementing additional levels of delegated authority.

23. Four major risks are anticipated:

(a) *UNDP's role in support to the electoral cycle may not be easily understood by some stakeholders.* This will be assuaged through communications about the impartiality and technical role of UNDP.

(b) *Shifts in Government priorities for post-2016 may require re-alignment of the country programme.* Harmonization of country programme planning cycles and priorities with that of the national development plan will mitigate this risk.

(c) *Instability in the Horn of Africa and Great Lakes region affects security in Uganda.* Government will be supported to engage in regional peace initiatives and to implement the national action plan for small-arms control. UNDP will continue strengthening compliance to minimum operating safety and security standards.

(d) *Donor withdrawal of direct budget and use of government systems may over load government capacity and slow down implementation.* UNDP will engage with the Government to strengthen systems of accountability and transparency.

24. UNDP resources mobilization targets will include non-traditional donors such as the Bill and Melinda Gates Foundation and the MasterCard Foundation. In anticipation of expanded resources, UNDP will partner more with civil society and the private sector, strengthen procurement capacity and maximize delivery per person.

25. UNDP will strengthen its position as partner of choice, connector and thought leader, by enhancing its visibility. Up to 1 per cent of all programme funds will support country office communication efforts.

26. UNDP will leverage regional service centre expertise to achieve on issues-based approaches, linkages to global and regional initiatives, South-South and triangular cooperation, and knowledge management. Headquarters bureaus will enhance country-level thought leadership, share global best practices, and facilitate engagement with global funding such as GEF and the Peacebuilding Fund.

27. UNEP environmental impact assessments will be leveraged in compliance with UNDP principles for social and environmental safeguards.

28. This country programme document outlines expected UNDP contributions to national results and serves as the primary unit of accountability to the Executive Board for results alignment and resources assigned to the programme at the country level. Accountabilities of managers at the country, regional and headquarters levels with respect to country programmes are prescribed in the UNDP programme and operations policies and procedures and the internal controls framework.

IV. Monitoring and evaluation

29. Monitoring and evaluation will be guided by the *UNDP Handbook on Planning, Monitoring and Evaluating for Development Results*, and aligned with the United Nations

Development Assistance Framework, 2016-2020; the second national development plan , 2016-2020; and the UNDP strategic plan, 2014-2017. Data sources include the Uganda Bureau of Statistics, human development reports, the World Bank studies, and other global reports. Data will be disaggregated by sex, age and region, wherever relevant and possible.

30. The harmonized approach to cash transfers, spot checks, and financial audits, will complement regular programme monitoring and reviews with stakeholders.

31. The country programme will conduct midterm and end-cycle evaluations to inform programme design and implementation, in line with UNDP evaluation policy.

32. UNDP will collaborate with development partners to support national statistical and research institutions and academia in undertaking evidence-based, gender-sensitive studies. Partnerships will be established with national, regional, and international academic institutions to ensure the availability of credible evaluation data. Multi-year research will inform national poverty status reports, national human development reports, and sustainable development goals progress reports. UNDP will participate in United Nations Development Assistance Framework results groups for a harmonized approach to tracking outcome indicators, including using the United Nations electronic management information system. A partnership with Kampala Pulse Lab will be established to access real-time 'big-data' information. Transformational impact will be communicated through multiple means, including UNDP websites, television, roundtables and conferences.

33. At least 5 per cent of programme contract agreements will be allocated for monitoring and evaluation, focusing on strengthening staff and partner capacities in results-based management, financial management and knowledge management.

Annex. Results and resources framework for Uganda (2016-2020)

National priority or goal: Second national development plan (NDP II), objective 4: To strengthen mechanisms for quality, effective and efficient service delivery				
UNDAF (or equivalent) outcome involving UNDP, 1.1. By end 2020, rule of law, separation of powers and constitutional democracy are entrenched in Uganda and all individuals are treated equally under the law and have equitable access to justice				
Related strategic plan outcome: 2. Citizen expectations for voice, development, rule of law and accountability are met by stronger systems of democratic governance				
UNDAF outcome indicator(s), baselines, target(s)	Data source (S) and frequency (F) of data collection, and responsibility (R)	Indicative country programme outputs (including indicators, baselines and targets)	Major partners/partnerships Frameworks	Indicative resources by outcome (in thousands of dollars)
<p>1. % of women/men who think Uganda has democracy (or with minor problems), by sex B: 52 (M/F: 58/46) Rural/urban (R/U): 56/44 (2012) T: 60 (M/F: 60/60; RU: 60:40)</p> <p>2. % who have trust in the courts of law institutions, by sex B: 64 (M/F: 62/68; R/U: 49/51) 2012 T: 70 (M/F: 70:70; R/U: 49/51)</p> <p>3. % of women in national parliament (IRRF 2.3) B: 35 (2013) T: 42</p>	<p>S: Afrobarometer/UBOS survey F: Annual R: UGU</p> <p>S: Afrobarometer/UBOS Survey/JLOS annual report F: Annual R: UGU</p> <p>S: JLOS annual report F: Annual R: UGU</p> <p>S: http://www.ipu.org (Inter-Parliamentary Union) F: Annual R: UGU</p>	<p>1.1.1 Strengthened technical and functional capacities of democracy institutions for enhancing equal participation, accountability, rule of law and access to justice</p> <p>Indicators:</p> <p>1.1.1.1: No. of target democracy institutions with functional e-governance systems to promote efficiency and accountability B::0 (2013); T: 3; S: Government performance reports; F:Annual</p> <p>1.1.1.2: Proportion of completed to registered cases B: 90.7 (2013); T: 95; S: Government performance reports; F: Annual</p> <p>1.1.1.3: Extent to which democracy institutions (Electoral Commission and HRC) effectively meet minimum core function performance benchmarks (scale of 1-4: Not at all, very partial, partial; fully) B: Partial (2013); T: Fully; S: Electoral Commission report on general elections, HRC reports; F: Annual</p>	<p>Parliament; Electoral Commission; JLOS institutions; HRC; Ministry of Information and Communications Technology; United Nations entities; development partners; CSOs</p>	<p>Regular: 8,000 Other: 500</p>

National priority or goal: NDP II, objective 4. To strengthen mechanisms for high-quality, effective and efficient service delivery				
UNDAF (or equivalent) outcome involving UNDP: 1.3. By end 2020, targeted public institutions and public-private partnerships are fully functional at all levels, inclusive, resourced, performance-oriented, innovative and evidence-seeking supported by a strategic evaluation function; and with Uganda's citizenry enforcing a culture of mutual accountability, transparency and integrity				
Related strategic plan outcome: 2				
<p>1. Status of corruption index B: 26 (2013) T: 35</p> <p>2. % of women/men who think Government is fighting corruption very well B: 4 (M/F: 4:4; R/U: 4:1) (2012) T: 10 (M/F: 10:10; R/U: 10:10)</p> <p>3. % of local governments and other implementing agencies meeting standard performance measures of service delivery B: 84 (2013) T: 95</p>	<p>S: Corruption perception index report F: Annual R: UGU</p> <p>S: Afro-barometer/UBOS surveys F: Annual R: UGU</p> <p>S: Local government report F: Annual R: UGU</p>	<p>1.3.1 Selected ministries, department and agencies /sectors effectively coordinate and implement targeted public sector reforms by 2020.</p> <p>1.3.1.1: No. of MDAs developing and implementing strategic development plans and frameworks and complying with NDP II Priorities. B: 1(2013); T: 5; S: Sector review reports; F: Annual</p> <p>1.3.1.2: No. of new PPPs providing innovative solutions for development (IRRF 7.6.1) B: 0 (2014); T: 3; S: Sector review reports; F: Annual</p> <p>1.3.1.3: Existence of strategic functional management information system informing policy direction B: No (2013); T: Yes; S: Sector review reports; F: Annual</p>	<p>OPM; MLG; EAC; NPA; MFPED; UBOS; EPRC; National Research Council; Civil Service College; UNFPA; UNICEF; UN-Women; World Bank; DANIDA; Irish Aid</p>	<p>Regular: 2,000 Other: 500</p>
		<p>1.3.2: By end 2020 targeted accountability institutions (MDAs, CSOs and media) uphold and reinforce standards of accountability, transparency and integrity</p> <p>1.3.2.1: Existence of service delivery standards for key extractives and infrastructure (housing and roads) sectors B: 0 (2014); T: Yes; S: Sector reports; F: Annual</p> <p>1.3.2.2: No. of CSOs that are QUAM¹⁷ certified and participate in ensuring compliance with national standards. B: 76(2013); T: 150; S: QUAM report by DENIVA; F: Annual</p>	<p>CSOs; independent media; Open Society Initiative for East Africa; DEI; IGG; Ministry of Justice; Ministry of Information and Communications Technology; MWT; MLHUD; Office of the Auditor General; UNODC; UNESCO; WHO; ECA; DFID; GIZ</p>	<p>Regular: 4,000 Other: 1,000</p>

¹⁷ A quality assurance mechanism and indicator to measure the extent to which CSOs themselves are compliant to accountability standards and codes; all country programme targets are for 2020.
